

■ ABM-14 | PLATE AND PIPE BEVELLER

ABM-14 is a beveling machine designed to mill plates and pipes made of carbon steel, alloy steel, stainless steel or aluminum alloys.

In just one single run the machine can bevel up to 12 mm (1/2") width.

Maximum bevel width is 14 mm (9/16"). Depending on materials two or more runs are needed.

The machine can bevel plates from top and bottom. Two optional ergonomic trolleys are available to make operator's work more effective and comfortable.

Using an additional vertical roller guide ABM-14 can bevel concave edges if curvature radius is 1500 mm or larger.

■ Features & benefits

- bevels both small and large pieces to cover most of the common applications for its type
- auto feed on large plates with optional trolleys
- beveling of lower edge in inverted position
- standard shearing cutter for machining stainless/alloyed steel
- 2 optional shearing cutters dedicated to carbon steel and to aluminum
- reversible spindle against stuck milling tool
- versatile and transportable on its own trolleys
- low noise
- possibility to bevel concave edges
