SAFETY FOOTWEAR
#enjoyinglife

autumn/winter '20/'21

CLIMA CORK SYSTEM (CCS)

Is an exclusive system of No Risk, which allows to create a natural environment for the feet, both in the field of temperature and their accommodation in shoes. Through the inclusion of an insulating layer of cork between the sole and the insole.

CLIMA CORK SYSTEM regulates the heat and cold inside the footwear and gives extra comfort. The cork allows the creation of a kind of “footprint”, favors its adaptation to the shoe and contributes to the reduction of fatigue, by benefiting the uniform distribution of the weight.

Functionality on top!

If you prefer the functionality and you don't doubt its advantages, you don't want to miss the Norisk professional footwear.

Here, you will find the most dynamic solution for your profession!

Norisk distinguishes itself by its versatility.
