Moving forward

TOGETHER

Innovative solutions and reliable service
for high demands.

1960

Erhard Mödinger set up a two-man business in Weinstadt, Germany for the production of grape vats and barrels made of glass fibre reinforced plastic (GRP) for viticulture and agriculture

1970

The second Chemo plant (called CEMO today) for the production of heating oil tanks was built on a 42,000 m² site in Schnelldorf (Bavaria)

1990

Development of an environmental protection range for the storage of water-polluting substances (GRP drip trays, used battery containers, pollutant collection stations)

2001

Market launch of the DWT tank – the first double-walled tank made of GRP in sandwich construction

CEMO plus points

Sustainability

Durable and well thought-out: In the development of our products, we take environmental protection as well as legal requirements into account.

Quality

Intelligent design and the highest quality manufacturing offer you efficient and economical solutions for safe storage.

Experience

Products with added value, expert technical advice, extensive training: With CEMO, you get everything from one source.

Moving forward together

Partnerships are more than just business relationships. They are connections built on trust, respect and common goals. Together we can pool resources, exchange ideas and develop innovative solutions for tomorrow.

2013

Development of a new tank generation for diesel, AdBlue® and lubricants: CEMO CUBE

2019

Products for the storage and transport of lithium batteries, battery safety cabinets F90

2020

60 years of CEMO – full-range supplier for safe storage

2023

Expansion of the production facility at the plant in Schnelldorf, including new rotation moulding systems

2024

The new CEMO PROline product line offers the latest generation of safety storage cabinets

Made in Germany – and with over 60 years experience

Our products meet the highest quality standards and have been tried and tested in practice. They far exceed the required service life and are tested and approved by independent institutions.

Hazardous material management from one source

Our range of products includes everything you need to ensure safety during transportation and operation – from solutions for small containers and IBC bunds, mobile systems to suitable accessories.

CEMO fuel dispensing areas

- outdoor
- Compact and Basic, indoor

from 32

CEMO tank monitoring

- Fuel level monitoring system, without and with remote monitoring for unpressurised tanks

34

Stationary refuelling systems for diesel

STATUTORY REQUIREMENTS FOR DIESEL REFUELLING SYSTEMS FOR OWN CONSUMPTION

The refuelling system is intended for the refuelling of the company's own vehicles. It is operated by the operator or by instructed persons appointed by the operator, and the total annual output is a maximum 100,000 L.

The self-consumption refuelling system consists of the storage tank and the refuelling system. A summary of the conditions to be met for a self-consumption refuelling system is provided below:

The ordinance on facilities for handling substances that are hazardous to water (AwSV) came into force on 1 August 2017. It harmonizes national requirements and replaces the 16 ordinances on facilities for handling substances that are hazardous to water (VAwS) of the individual German states. TRwS 781 (vehicle fuelling stations) will therefore also be regarded nationwide as the generally acknowledged technical regulation in accordance with Sec. 62 (2) of the Water Management Act (WHG). TRwS 781 defines the requirements for self-consumption refuelling systems.

A Storage facility

1. Storage containers with test mark or National Technical Certification, single-walled GRP containers up to 2,000 L without bund, but on a subsurface that is impervious to fluid with a 1 cm upstand (e.g. R1 sealing surface elements), also pertains to tank batteries up to 10,000 L; other double-walled containers or in a bund.
2. For installation in the open air, the storage tank must be certified for this purpose. This requirement is met by CEMO CUBE tanks, CEMO GRP tanks and double-walled steel tanks (cf. certification); PE tanks in sheet steel jackets only indoors.
3. Collision protection, for example: guard rails, large stones, high threshold or spray protection walls around the compact fuel dispensing area.
4. Automatic dispensing nozzle is required. Exception: Delivery from storage tanks < 1,000 L is also permitted using manually operated pumps with shut-off valve on the dispensing hose. This also applies to delivery with electrically operated pumps, if the pumps are disconnected from the power network by a manually operated switch during downtimes.
5. Permanently connected filling nozzles with tanker coupling.
6. Certified overfill prevention
7. A syphon lock on the pump is required.

8. No requirement for specialist assistance up to 10,000 L installation size.
9. Fire prevention regulations (distances, ventilation, design of walls and doors, etc.) must be met.

B Fuel dispensing area

1. Size of the fuel dispensing area: effective range of the nozzle, i.e. minimum hose length plus 1 m, livewithable by walls or positively guided filler hose, e.g. compact fuel dispensing area.
2. The retention volume for the delivery devices is arrived at from the pump capacity in L/min x 3 min. For example, a pump with a volume flow of 50 L/min has a retention volume of 150 L. When filling the storage container, a retention volume for the fuel volume is required that will contain the volume of liquid that would be discharged at maximum flow, until the self-activating safety devices take effect. This results in a retention volume of $R = 0.1 \text{ m}^3$ when filling using a hose coupling, and a retention volume of $R = 0.9 \text{ m}^3$ when filling using devices with dead man's switch and emergency stop actuator.

Contrary to this, the maximum volume dispensing volume and thus the required retention volume may be reduced at owner-occupied refuelling systems by means of a non-replaceable restriction, e.g. by a smaller hose diameter.

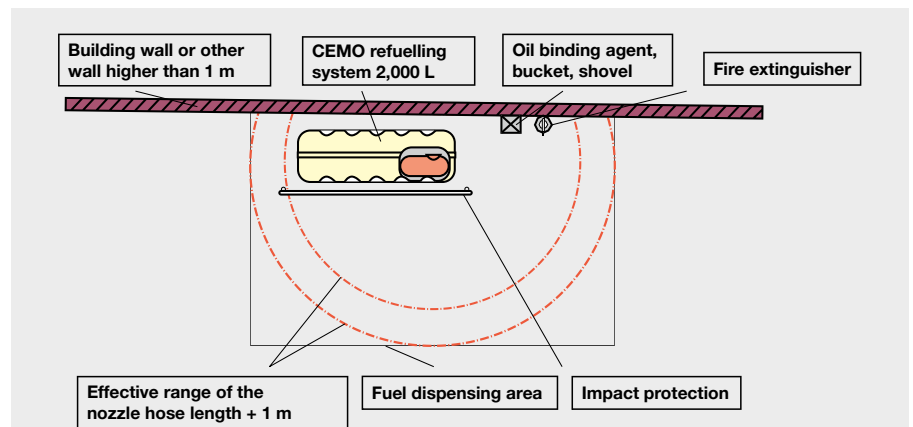

3. Keep binding agents and fire extinguishers ready..

Obligations of the operator:

1. Register refuelling systems with more than 1,000 L with the water authorities below.
2. Inspection prior to commissioning by an expert in accordance with the Water Management Act (WHG) of refuelling systems with more than 1,000 L to 10,000 L. Periodic inspection (every 5 years) by an expert in accordance with the Water Management Act (WHG) of refuelling systems with more than 10,000 litres.
3. Obtain construction certification for refuelling systems with more than 5,000 L.

These principles apply to above-ground refuelling systems outside of water conservation areas. We will be happy to advise you for this purpose.

Example: Refuelling system for own consumption up to 2,000 L

Roof for fuel dispensing areas

CEMO CUBE

Stationary refuelling systems for diesel

Most fuel stations available today have been adapted from oil storage tanks and often give the appearance of being cobbled together as best as possible. Perhaps now is the time to redesign from scratch and produce a purpose- designed fuel station better suited to today's user.

CEMO present the latest in security, function and design in the CUBE. We have introduced features with benefits, not compromises and jigs. The first dispensing station to be designed as a dispensing station with everything in its place, easily accessible and straightforward to use.

It's impressive – a great concept. Take a look and see if you agree.

Video
CUBE-Tank

ergonomic

All equipment is positioned so that it is easy to see and access at an optimum level over the bund.

always tidy

The automatic hose reel helps you keep 8 m of hose in order.

designed-in stability

The honeycomb structure (1,000, 1,500, 2,500, 3,500, 5,000, 7,500 L) and steel supports (1,000, 1,500, 2,500 L) result in superior robustness.

double protection

Integral 110 % bund gives added environmental protection.

electric connection access
integrated in lid

Cable duct allows easy connection to the electric pump.

**lighting**

Easy refueling even in the dark.

**large inspection hatch**

Hinged lid with 380 mm opening for tank inspection (5,000 and 7,500 L).

**cleanliness**

The integrated dispensing nozzle holder catches drops after filling.

**open on all sides**

When open, the lid gives unimpeded access to all components from three sides.

**robust, lockable lid**

Lockable lid secured by toggle latches. Opens upwards on supporting gas struts to allow access from three sides.

**wind damage prevention**

Four points for securing the tank to the ground to protect from strong wind damage (5,000 L version)

**easy to lift**

Connection points on the circumference for shackles or lifting eyes when being lifted from above (3,500, 5,000 and 7,500 L version)

CUBE diesel tank 5,000 L
Outdoor Premium

CEMO CUBE

Stationary refuelling systems for diesel PG 4

Diesel tank dispensing system, Basic and Premium

with general construction inspection certification no. Z-40.21-510

- comprising integrated bund
- visual bund alarm
- tanker coupling
- electronic overfill sensor
- vent
- analogue contents gauge
- suction hose
- 230 V pump 56 L/min (72 L/min on 2,500 L versions)
- 4 m delivery hose
- automatic nozzle with integral nozzle holder
- certified for outdoor installation with hinged lid (outdoor model)
- completely assembled

TOP SELLER

- modem for tank data transfer

CUBE Diesel tank 5,000 L, Outdoor Premium Plus 20 SIM

Meter with access control and tank data management system "CMO 20" for up to 999 user.
 Additional for Premium Plus 20 SIM:
 modem for tank data transfer, GPS function

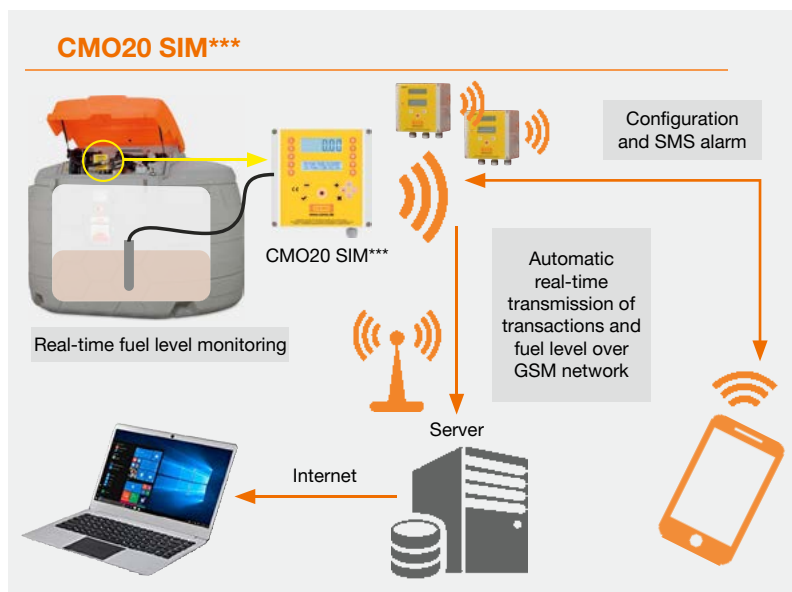

incl. 5 user and 1 master key

CUBE DIESEL TANK 5,000 L OUTDOOR PREMIUM PLUS AND PLUS SIM***

Description	Capacity L	External dimensions cm (w x d x h)	Weight approx. kg	Order no.
Outdoor Premium Plus 20	5000	240 x 230 x 185	212	11323
Outdoor Premium Plus 20 SIM***			212	11324

TANK SYSTEMS PREMIUM PLUS AND PLUS SIM*** WITH TANK DATA MANAGEMENT SYSTEM "CMO 20"

* Pump output in free flow. Please note that the pump output can fall sharply depending on the length and cross-sectional area of the hose.

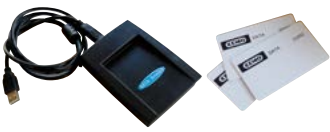

*** SIM card is not included in scope of delivery.

Accessories see page 21.

CEMO CUBE diesel tank PG 4

ACCESSORIES OR CUBE DIESEL TANK 5,000 L (SUPPLIED AS COMPONENTS)

Description	Order no.
 <p>Hose reel with 8 m hose DN25</p>	11092
 <p>K33 flow meter, 3-digit tank display</p>	10376
 <p>Cartridge filter with water separator</p>	11093
 <p>K33 flow meter complete with filter and water separator</p>	11094
 <p>Meter with access control and "CMO 10" tank data management system for up to 250 users, incl. 5 user keys and 1 master key</p>	10745
 <p>Data transfer set with 3 data transfer cards and USB key reader for wireless data transfer to PC, incl. PC software</p>	10746
 <p>Key set with 5 user keys</p>	10747
 <p>LED instrument lighting with motion sensor and battery</p>	10378
<p>Hinged lid, orange, complete with supporting gas struts and mounting accessories</p>	11095

CEMO CUBE diesel tank 5,000 L *fastfill* with high-performance submersible pump CENTRI SP 80 PG 4

Outdoor Basic and Outdoor Premium refuelling systems with General Construction Inspection Certification Z-40.21-565

- bundled
- with visual leak indicator
- filling connection with tanker coupling and over-fill sensor
- mechanical contents gauge
- high-performance submersible pump CENTRI SP 80 AC, 230 V, 80 L/min*
- **NEW:** automatic nozzle A80 fastfill – for fast refuelling – also for passenger cars
- with lockable lid, certified for installation outdoors
- fully assembled, 5 m connection cable

Outdoor **Basic**

Outdoor **Premium**

- CEMO submersible pumps: the superior pumping principle for your refuelling system. Simple, fast and safe.**
- Run time limitation: automatic switch-off after preset time
 - easy start-up: stands on the tank bottom – no suction height
 - submersible centrifugal pump Ø 130 mm, suitable for common tanks and IBCs
 - voltage 230 V/50 Hz, power 800 W
 - high dispensing volume
 - motor thermally protected
 - connection 1" IT without check valve

HIGHER DISPENSING VOLUME FOR SHORTER REFUELLING STOPS – ALSO FOR PASSENGER CARS

CUBE DIESEL REFUELLING SYSTEMS 5,000 L FASTFILL

Description	External dimensions in cm (w x d x h)	Weight approx. in kg	Order no.
CUBE diesel tank 5,000 L Outdoor fastfill Basic, 4 m dispensing hose DN25	240 x 230 x 185	205	11649
CUBE diesel tank 5,000 L Outdoor fastfill Premium, flow meter K33, filter with water separator, hose reel with 8 m dispensing hose DN25	240 x 230 x 185	230	11650

* Pump output in free flow. Please note that the pump output can fall sharply depending on the length and cross-sectional area of the hose.

Accessories see page 21.

CEMO CUBE diesel tank system PG 4

CUBE diesel tank system 10,000 L Outdoor Premium

Suction hose with connection to first tank and switching valves included in the expansion unit.

CUBE diesel refuelling system 15,000 L with expansion unit I and II

CUBE DIESEL REFUELLING SYSTEMS 10,000 L AND 15,000 L

Description	Comprising	Delivery rate L/min *	External dimensions cm (w x d x h)	Weight approx. kg	Order no.

CEMO CUBE diesel tank 7,500 L *fastfill* with high-performance submersible pump CENTRI SP 80 PG 4

NEW

IN AUTUMN
2024

- Diesel tank dispensing system, Basic and Premium with general construction inspection certification no. Z-40.21-565 (applied for)
- bundled
 - with leakage detector device (visual and acoustic)
 - filling connection with tanker coupling, isolation valve and overfill prevention sensor
 - vent
 - contents gauge
 - suction hose
 - quiet and powerful submersible pump CENTRI SP 80, 230 V, 80 L/min*
 - **NEW:** automatic nozzle A80 fastfill for fast refuelling (also for passenger cars) with integral nozzle holder
 - sturdy, lockable pump equipment cabinet
 - lid is also a practical weather protection cover for the user
 - comfortable and ergonomic operation
 - certified for outdoor installation
 - completely assembled

CUBE diesel tank 7,500 L,
Outdoor Premium

CUBE diesel tank 7,500 L,
cross section

- HIGHER DISPENSING VOLUME FOR SHORTER REFUELLING STOPS – ALSO FOR PASSENGER CARS
- Other versions for brine and liquid fertilisers on request.

Description	Capacity L	External dimensions cm (w x d x h)	Weight approx. kg	Order no.
Outdoor fastfill Basic 6 m dispensing hose DN25 with hose holder, pump Centri SP 80, with equipment cabinet	7,500	245 x 295 x 225	400	available from autumn 2024
Outdoor fastfill Premium Meter K33, filter with water separator, swivelling hose reel with 8 m hose DN25, with equipment cabinet	7,500	245 x 295 x 225	430	

* Pump output in free flow.
Please note that the pump output can fall sharply depending on the length and cross-sectional pump equipment of the hose.

CEMO CUBE 980 L PG 4

Stationary refuelling systems for diesel

Complete station, Basic and Premium with General Construction Inspection Certification Z-40.21-589

- compact design, easy to use
- all components at optimum working height
- bunded
- with visual leak indicator
- filling connection with tanker coupling and overfill sensor
- vent and breather
- contents gauge
- 1" suction hose
- pump 230 V, 56 L/min*
- automatic nozzle with dispensing nozzle holder
- with lockable lid, certified for installation outdoors (Outdoor versions)
- with forklift pockets for internal transport
- fully assembled
- for version with ADR certification see page 49

tank with integral bund offers twice the safety

Indoor Basic
4 m dispensing hose DN 19, without hinged lid

Outdoor Basic
4 m dispensing hose DN 19, with hinged lid

Indoor Premium
Flow meter K33, filter with water separator, hose reel with 8 m hose DN 19, without hinged lid

Outdoor Premium
flow meter K33, filter with water separator, hose reel with 8 m hose DN 19, with hinged lid

Description	External dimensions cm (w x d x h)	Weight approx. kg	Order no.
Indoor Basic 4 m dispensing hose DN 19, without hinged lid	130 x 112 x 118	107	11628
Outdoor Basic 4 m dispensing hose DN 19, with hinged lid	130 x 112 x 118	119	11629
Indoor Premium Flow meter K33, filter with water separator, hose reel with 8 m hose DN 19, without hinged lid	130 x 112 x 118	130	11630
Outdoor Premium Flow meter K33, filter with water separator, hose reel with 8 m hose DN 19, with hinged lid	130 x 112 x 118	141	11631

* Pump output in free flow.
Please note that the pump output can fall sharply depending on the length and cross-sectional area of the hose.

CEMO CUBE Slimline 2000 L PG 4 diesel tank

Outdoor safety package CUBE Slimline 2000 L with general construction inspection certification no Z-40.21-593

Double-walled tank with visual leak detection. Certified for outdoor installation without leak detection device, even in water protection areas!

- CUBE tank Slimline 2000 L (order no. 11664)
- Accessory pack for outdoor installation (order no. 7355)
- pump approx. 50 L/min, 230 V (self-priming)
- Mechanical flow meter
- Automatic nozzle
- 4 m extension hose DN 19
- installed within a protective housing (order no. 7354)

Description	External dimensions cm (w x d x h)	Weight approx. kg	Order no.
Outdoor safety package CUBE Slimline 2000 L	86 x 212 x 211	210	11682

CUBE SLIMLINE 2000 L WITHOUT ACCESSORIES

Description	External dimensions cm (w x d x h)	Weight approx. kg	Order no.
CUBE Slimline 2000 L	86 x 180 x 180	180	11664

PUMPS AND ACCESSORIES, DESIGNED FOR CUBE SLIMLINE 2000 L

Description	Order no.	
 <p>Accessory pack for indoor and outdoor installation (on single tank), consisting of: dome lid, vent cap, overfill prevention sensor, filling connection, suction hose with foot valve, installation instructions suitable for electric pump 50 L/min in protective box, order no. 7354</p>	7355	
 <p>Pump approx. 50 L/min, 230 V (self-priming), mechanical flow meter, automatic nozzle with type certification, 4 m hose, in protective box</p>	7354	
 <p>Extension hose DN 19 with 1" connection for electric pump approx. 50 L/min For additional hose lengths, see page 124</p>	2 m	7071
	4 m	7072
 <p>Dome lid steel with two angled threaded nipples 2", for filling and venting, 2 straight threaded nipples 2" and 1", TW coupling and vent cap</p>	1451	
 <p>Tank heater type TH 370, 230 V, dia. 44 mm for electric heating of EL grade heating oil and diesel fuel power 0.22 kW, thermostatically controlled, prevents separation of paraffins at low temperatures</p>	8126	

CEMO UNI diesel tank PG 4

Single tank

- from HDPE with integral galvanised sheet steel bund and base pallet
- standard accessories: contents gauge, visual leakage detector, integral carrying handles
- **no pump**
- or storage of diesel, biodiesel, without additional bund, even in water-protected areas*
- certified for installation indoors
- can be filled with dispensing nozzle (except Uni-Tank 1,500 L)
- **low overall height (up to 1,000 L), thus no step is necessary**

UNI tank
1,000 L

UNI-TANK

Capacity L	Dimensions cm (l x w x h)	Certification no.	Weight approx. kg	Order no.
400	73 x 70 x 117	Z-40.21-365	50	7979

Diesel refuelling system

with UNI-Tank 1,000 L or 1,500 L

Refuelling system comprising:

- UNI-Tank 1,000 L (7380) or 1500 L (7881), 1, 2 or 3 tanks
- filling connection with tanker coupling (7390)
- overfill prevention sensor (1437),
- extraction pipe and vent
- 240 V pump 50 L/min
- components not fitted to tank to avoid transport damage
- pump 230 V self-priming with automatic nozzle, dispensing nozzle holder, meter, 4 m dispensing hose and ventilation
- other lengths for dispensing hose optional, see page 122
- individual filling of the tanks via fixed tanker connection, extraction and venting via common lines

Accessories see page 29.

UNI-Tank 1,500 L with pump 230 V 50 L/min

Diesel tank system with 2 UNI-Tanks 1,500 L
(Order no. 8822)

CEMO UNI diesel tank PG 4

Basic package
UNI tank 1.000 L

- UNI-Tank 1,000 L (order no. 7380)
- Pump 230 V, approx. 30 L/min effective (order no. 8639)
- 4 m connecting cable
- 6 m hose, may be sectioned into suction and dispensing hose
- Suction filter
- Automatic nozzle

Accessory:

- K 24 digital flow meter (8644) see page 29

TOP SELLER

Articolo n. 8683

Basic package Premium 1,000 L

comprising:

- Diesel tank UNI 1,000 L (order no. 7380)
- Pump 230 V, self-priming, approx. 50 L/min (order no. 7768)
- Pump bracket (order no. 7631)
- Automatic nozzle
- 4 m connecting cable
- Suction hose with foot valve
- Nozzle holder
- Hose clamp (order no. 10252)

Accessory:

- K 33 flow meter (order no. 7779 and 7984) see page 118
- Electric flow meter FMT 3/50 (order no. 7574) see page 29

CEMO UNI/MULTI diesel tank PG 4

PUMPS AND ACCESSORIES SPECIALLY DESIGNED FOR UNI- AND MULTI-TANK

Description	Order no.
 <p>Hand pump, flow rate up to 25 L/min suitable for UNI-/MULTI-Tank up to 1,000 L</p>	1452
 <p>Pump 12 V, not self-priming, approx. 30 L/min effective, 4 m connecting cable with crocodile clips, 6 m hose, dispensing nozzle</p>	8640
 <p>Pump 230 V, not self-priming, approx. 35 L/min effective, 4 m connecting cable, 6 m hose, dispensing nozzle</p>	8638
 <p>Pump 12 V, not self-priming, approx. 25 L/min effective, 4 m connecting cable with crocodile clips, 6 m hose, automatic nozzle</p>	8641
 <p>Pump 230 V, not self-priming, approx. 30 L/min effective, 4 m connecting cable, 6 m hose, automatic nozzle</p>	8639
 <p>K24 digital flow meter can be calibrated, measuring range 10 – 120 L/min, 5-digit display, 6-digit total delivery display, inlet and outlet 1" external thread, with 1" steel coupling</p>	8644
 <p>Dispensing hose for electric pump CENTRI Additional DN 19 hose, priced per meter (the standard 6 m hose is still included in the pump kit)</p>	11351
 <p>Electric pump approx. 50 L/min suitable for UNI-/MULTI-Tank 750 L and 1,000 L, 230 V (self-priming), with foot valve, automatic nozzle, 4 m dispensing hose, pump bracket</p>	7573
 <p>Electronic flow meter FMT 3/50 for electric pumps 50 L/min, display can be rotated in 90° steps</p>	7574
 <p>Extension hose DN 19 *** (with 2 x 1" thread) for electric pump approx. 50 L/min</p>	2 m 7071
	4 m 7072
 <p>Fixed tanker coupling suitable for UNI-/MULTI-Tank 750 L, 1,000 L and 1,500 L with tanker coupling, vent pipe and overfill prevention sensor</p>	7857
 <p>Pump bracket suitable for UNI-/MULTI-Tank 750 L and 1,000 L for mounting Cematic pumps</p>	7631
 <p>230 V pump, approx. 50 L/min (self-priming) with flow meter, suction hose, automatic nozzle, nozzle holder, 4 m dispensing hose, mounted on the bracket and can be hung on the side of the UNI-/MULTI tank</p>	8162
 <p>Tank heater type TH 370, 230 V, dia. 44 mm for electric heating of EL grade heating oil and diesel fuel power 0.22 kW, self-regulating, prevents separation of paraffins at low temperatures</p>	8126
 <p>Hose bracket suitable for UNI-/MULTI-Tank 750 L, 1000 L and 1500 L</p>	10252

*** For additional hose lengths see page 122.

CEMO diesel refuelling systems with steel tank PG 4

Above ground refuelling system

steel double-wall for outdoor installation, certified for the storage of diesel fuel and biodiesel

Construction:

- manufactured in accordance with DIN EN 12285-2 class B
- welded on saddle feet
- painted externally with primer and top coats
- ladder (5,000 L model no ladder due to low overall height)
- dip stick
- extraction pipe in dome lid
- anti-siphon device (model with mounted pump)
- bund alarm with liquid control
- overfill prevention sensor
- completely assembled

- factory test certificate

Options:

- paint schemes according to customer specification possible (additional charge)
- The standard containers are primed and painted. We offer a 10-year warranty against rusting through.

Steel tank fitted with optional bracket and suction hose for diesel dispensing pumps

ACCESSORIES FOR DIESEL REFUELLING SYSTEMS WITH STEEL TANK

Description	Order no.
 <p>Level measurement unit, pneumatic, for retrofitting</p>	7565
 <p>Contents gauge OCIO for diesel, 230 V An innovative system for management of the liquid level in tanks at atmospheric pressure. Special features: continuous measurement, display of heights, volumes and refill percentages, minimum and maximum level alarms, high accuracy, simple installation, simple software configuration</p>	7795

CEMO fuel dispensing areas PG 9

Folding fuel dispensing area, for installation outdoors with general construction inspection approval no. Z-38.5-306

For the regulation-compliant, safe filling of your vehicles. Spilled fuel is held back and can be easily disposed of via a collecting channel when folded up. Patent protected.
The tray must lie on a level, stable surface. The folding mechanism must be anchored with the heavy load anchor included in the scope of delivery.

- Special advantages:
- compact design
 - only a small amount of space is needed for the fuel dispensing area when folded up
 - simple operation using an electric chain hoist or manual chain hoist
 - can be set up and used in one day
 - non-slip surface
 - no suitability assessment required
 - painted tray (galvanized on request)
 - with spray protection wall
 - navigable threshold on three sides

- 2" pipe sockets integrated into fuel dispensing area, also making it suitable as a fuel dispensing area for filling of the storage tank by the tanker when using an emergency shutoff function ASS
- integrated protective box for control pendant
- integrated attachment points/eyes for lifting the parts
- integrated wind load protection for securing the floor tray in a vertical position
- tray and accessories are supplied separately, assembly not included

A 400 V power supply is required to operate the electric chain hoist. No power supply is required to operate the manual chain hoist.

Folds up easily with the electrical chain block/ manual chain hoist. This is how little space the fuel dispensing area needs!

Wind load protection

Box for protecting the control pendant in the version with electric chain hoist.

ACCESSORIES FOR DIESEL TANKS AND FUEL DISPENSING AREA FOR OUTDOOR INSTALLATION PG 4

Description	Order no.
<div></div> <p><u>ASS fitting complete with accessories</u> According to TRwS 781 chapt. 6.2.2. If the CEMO fuel dispensing area (order no. 10754) is equipped with this fitting, can also be used to fill the tank system according to TRwS 781 chapt. 4.2.2.3. Scope of delivery consists of:</p> <ul style="list-style-type: none">• ASS fitting G2" with automatic closure• refuelling system module for filler neck• wall fitting for conversion of an existing overfill prevention sensor to ASS version, product ID "diesel" IP 68• 0.9 m earth cable• 1.9 m connecting cable between refuelling system module and wall fitting for overfill prevention sensor	8693

CEMO fuel dispensing areas PG 9

Compact fuel dispensing area with general construction inspection approval no. Z-38.5-107

for approved and safe filling of your vehicles. Spilled fuel is contained and can be disposed of.

Particular advantages are:

- compact design
- mobile and transportable
- can be set up and used immediately
- accessible, anti-slip surfaces
- suitability assessment not required
- up to 50 tons wheel load
- limited operating range of the nozzle due to 1 m high splash protection wall (plug-in)
- accessible from three sides

Also see "Legal basics" on page 11.

Compact fuel dispensing area

Secure filling hose mounting para
anti-kink device y length limiting

Basic fuel dispensing area with general construction inspection approval no. Z-38.5-107

(without splash protection wall and collision protection) for approved and safe filling of your vehicles. Spilled fuel is contained and can be disposed of.

- with two drive-over edge sills on the ends
- no splash protection wall (must be fitted by the customer, e.g. sheet metal board height 1 m at the wall)

Basic fuel dispensing area

Description	External dimensions cm (l x w x h)	Max. collection volume L	Wheel load kN	Weight approx. kg	Order no.
Compact fuel dispensing area	400 x 200 x 100	166	50	478	7827
Compact fuel dispensing area	500 x 250 x 100	266	50	712	8084
Basic fuel dispensing area	500 x 250 x 5	266	50	631	8124

CEMO tank monitoring PG 4

CONTENTS GAUGES AND TANK MONITORING UNITS WITH DATA TRANSFER FOR UNPRESSURISED TANKS

Description / Capacity L		Order no.
	Contents gauge unit pneumatic, for diesel	7565
	Contents gauge unit pneumatic, for AdBlue®	8020
	Mechanical contents gauge with float for diesel and water. No free aperture on tank required.	10717
	Contents gauge Piusi OCIO for diesel, 230 V An innovative system for management of the liquid level in tanks at atmospheric pressure. Special features: continuous measurement, display of heights, volumes and refill percentages, minimum and maximum level alarms, high accuracy, simple installation, simple software configuration, PC connection possible	7795
	Contents gauge Piusi OCIO for oil, 230 V, IP55	7796
	Contents gauge Piusi OCIO for AdBlue®, 230 V, IP55	10219
	Contents gauge GOK SmartBox 1, 230 V, IP54, without sensor Displays fill level in millimeters, litres and percentage as well as free capacity in litres	11172
Analogue data transfer module 4 – 20 mA, for SmartBox		8394
	Contents gauge GOK SmartBox 4, 230 V, IP54, without sensor Fill level displayed in millimetres, litres and per cent and free capacity in litres, data transfer via GSM as SMS or email, depending on provider, required SIM card not included. Event signal input, e.g. to report a system fault. 1 relay with make/break contact	11173
	GOK SmartBox 4 Pro display unit, 230 V, IP54, without probe Connection of up to four probes, otherwise 11173	11174
	GOK SmartBox 4 LAN display unit, 230 V, IP30, without probe Fill level displayed in millimetres, litres and per cent and free capacity in litres, data transfer via LAN connection to a local network. Event signal input, e.g. to report a system fault. 1 relay with make/break contact	11175
	GOK SmartBox 4 LAN Pro display unit, 230 V, IP30, without probe Connection of up to four probes, otherwise 11175	11176
	Pressure probe, stainless steel LC 0 – 250 mbar for SmartBox, 6 m cable, with mounting set, GKL 1 %	11179
	Cable junction box, IP66, breathable, for SmartBox Required when the indicator is installed more than 6 m from the bottom of the tank	11180

Sensors for special media and other pressure ranges for the SmartBox available on request.
Additional interfaces for smart box can be optionally retrofitted e.g. B. 4 – 20 mA, 0 – 5 V, M-Bus, H-Protocol.

Mobile refuelling systems for diesel

Important legal regulations for mobile refuelling system

Legal basics

Mobile tank stations for diesel fuel and petrol are used in many businesses. The legal basics are governed in the ADR (European Agreement Concerning the International Carriage of Dangerous Goods by Road), the GGVSEB (German Regulation Concerning the Transport of Dangerous Goods by Road and Rail) and the GGBefG (German Dangerous Goods Transportation Act). If the Contenedor is used as a fixed refuelling system, the refuelling system regulations for own consumption are applicable, see page 11.

Use of mobile diesel or petrol tank systems/IBC

According to the regulations on hazardous goods, mobile refuelling systems do not exist. They are so-called IBCs. The abbreviation IBC stands for Intermediate Bulk Contenedor. IBCs are used in various sectors for transport and storage, including the transport and storage of hazardous goods. They are filled with fluid or pourable products, but are also used for loose bulk products. This includes, for example, fuels for fueling machines, chemicals, waste products, dusts, but also food products, cosmetics and pharmaceutical products. IBCs contain a volume of up to 3,000 litres.

Exemptions in combination with the type of transport, subsection 1.1.3.1 c) ADR – Craftsman regulation –

If all exemption prerequisites according to 1.1.3.1 c) ADR are observed, complete exemption is granted in terms of hazardous goods regulations. In other words, the hazardous goods regulations are no longer applicable.

This lifts a great burden from agricultural, forestry, landscaping and crafts operations, because they no longer have to use the provisions otherwise applicable to the transport of hazardous goods.

These are:

- Use of design-tested packaging
- Non-observance of identification and tagging regulations
- Exemption from the obligation to carry fire-extinguishing equipment
- Exemption from the obligation to carry accompanying documentation (here: carriage document)

In practical terms, this arrangement represents a significant easement, because deliveries for direct consumption up to max. 450 litres are exempted from the ADR regulations as per RSEB 1-4.1 (German Implementation Guideline for Regulation Concerning the Transport of Dangerous Goods by Road and Rail). Transport for direct consumption means that up to 450 l can be driven to the machine, even in a car. This quantity must not be left there, but must be immediately filled into the consumers' tanks and consumed.

Please also observe our **checklist "Craftsman regulation", page 37.**

Test or examination

From the viewpoint of hazardous goods regulations, the mobile diesel refuelling systems are Intermediate Bulk Contenedors (IBC). The manufacturer uses different names for these serbatoio diesel systems in

some cases, e.g. Contenedor or tank.

However, these terms, which are known from hazardous goods legislation, do not have anything to do with the actually applicable packaging definition under hazardous goods legislation, i.e. Intermediate Bulk Contenedors / IBC.

Unfortunately, tests and examinations are often not performed on the employed mobile tank systems by an inspection body certified by the German Federal Institute for Materials Testing (BAM) for Intermediate Bulk Contenedors (IBC).

Tests and examinations of this kind are specified by regulations and laws such as the ADR (Accord européen relatif au transport international des marchandises dangereuses par route), the GGVSEB and the GGBefG (Regulations for the Transport of Dangerous Goods). The test or examination intervals are between 2 ½ and 5 years – from the date of manufacture.

Check the type plate of your mobile serbatoio diesel system. If the last stamped test / examination was longer than 2½ years ago, you should have a test/examination performed by an authorised inspection body as soon as possible.

Example:
DT-Mobil Easy 460 L

Checklist

Transport of diesel fuel according to the craftsman regulation

Claim to the craftsman regulation [1.1.3.1 c) ADR]	yes	no *
Are the deliveries in question associated with the primary business activity?		
Quantities not exceeding 450 litres per package		
Do not exceed max. quantities according to the table 1.1.3.6 ADR – 1000-point rule – (diesel fuel = 1000 litres net)		
Measures taken to prevent leakage of the contents under normal transport conditions		
Load adequately secured		
Leak-proof and undamaged containment and closures of the packagings		
No adhesion of dangerous residues		
No transport for internal or external supply of the business. Exception: transport for direct consumption according to RSEB 1-4.1		
* Exemption cannot be claimed		
Additional regulations to be observed:		
Instruction given		

Example: DT-Mobil EASY for direct consumption

CEMO diesel trolley

Mobile fuelling on site used to be a tricky topic. Apart from the question of transport, smaller quantities of fuel were easily spilled, depending on whether tank connections, funnels or hoses were used. The new CEMO tank trolleys are a completely different story. They deliver up to 100 litres of diesel fuel or petrol on site in absolute safety and in accordance with regulations.

CAS battery

Totally mobile and cable free, independent of vehicle batteries.

integrated vent

The integrated vent system means that fuel can be dispensed continuously without the filler cap needing to be opened.

anti-kink protection + swivel joint + shut-off valve

The anti-kink protection and swivel joint provide the best possible protection for your delivery hose. The container can be completely closed with an isolation valve for transport.

nozzle holder

Integrated dispensing nozzle holder with lock.

recesses for lashing straps

Integrated guides for ratchet straps (100 L) provide safety for transport in the vehicle.

hose holder

Whether upright or horizontal – everything fits; no hose out of place.

all-terrain wheels

Large tyres for easy handling on terrain and over stairs.

CEMO diesel trolley PG 4

CENTRI SP 30

QUIET

Diesel trolley 60 L and 100 L

- suitable for use under ADR 1.1.3.1 c) for single-site refuelling by a person in the course of their primary business
- polyethylene container with integral hand grip and carry handles
- filler cap with integral vent and breather valve
- outlet connection with isolation valve
- trolley 100 L: 300 mm diameter pneumatic tyres, all-terrain trolley 60 L: 240 mm diameter plastic tyres
- internal baffle
- integral nozzle holder
- trolley 100 L: moulded recesses enabling strapping during transport

Mounted pump:

- crank pump 0,38 L per revolution with 3 m delivery hose DN 19 and nozzle
- self-priming pump CENTRI SP 30, 12 V, 30 L / min, extremely quiet, with 3 m dispensing hose DN 19 and 4 m fly leads or CAS battery

CEMO DT MOBIL EASY

Innovative diesel refuelling systems offering a wealth of useful features.

Video
DT-Mobil Easy

integrated nozzle holder

The integrated nozzle holder with drip cup (470 L, 620 L, 850 L/100 L and 980 L) ensures tidiness and cleanliness.

dispensing hose can be isolated

The isolation valve enables the container to be sealed off completely, thus adding to safety during transportation (125 L, 200 L, 470 L, 620 L, 850/100 L and 980 L).

recesses for ratchet tie-down

Integral recesses (125 L, 200 L, 210 L, 440 L, 470 L and 620 L) and lashing eyes (470 L, 620 L, 850/100 L and 980 L) to allow immobilisation with a ratchet lashing strap during transportation.

integral forklift pockets

The integral forklift pockets make handling easier when the tank is full.

built-in ergonomic carry handles

The built-in carry handles enable the equipment to be handled easily during loading.

folding crane eye and lashing eyes

The folding crane and lashing eyes (470 L, 620 L, 850/100 L and 980 L) make it easier to secure the load in the prescribed manner, and serve at the same time as fastening eyes if the device is lifted by crane.

DT-Mobil EASY 620 L
with electric pump,
automatic nozzle and
hinged lid

DT-Mobil EASY 200 L with
electric pump, automatic nozzle
and hinged lid

DT-Mobil EASY with ADR certification
certified for transport under ADR,
examination every 2 ½ years according to
ADR 6.5.4.4.1 b) and ADR 6.5.4.4.2 b).***
Completely assembled.

Container:

- 200 L, 470 L or 620 L polyethylene, single-walled
- with hinged lid
- with crane eyes (470 L and 620 L)
- integral filler neck
- filler cap with vent and breather valves
- integral forklift pockets and handles
- integral recesses (200 L) or loops (470 L and 620 L) for securing with ratchet straps during transport

Pre-fitted pump:

- self-priming, pump 12 V or 24 V DC, 40 L/min, with automatic nozzle, 4 m dispensing hose DN 19 and 4 m electrical cable
- submersible pump CENTRI SP 30, 12 V, 30 L/min, extremely quiet, with automatic nozzle, 4 m dispensing hose DN 19 or DN25 (model 11919 and 11924) and 4 m cable
- hand pump 25 L/min, 2.7 m dispensing hose DN 19 and manual nozzle

*** Transport certification for all plastic IBCs is limited to a life of 5 years. The 200 L model is therefore also certified for transport for direct consumption under ADR 1.1.3.1 c).

See catalogue page 163 for suitable steel bund SW 600/2

DT-Mobil EASY with ADR certification
certified for transport under ADR,
examination every 2 ½ years according to
ADR 6.5.4.4.1b) and ADR 6.5.4.4.2 b)..**

Completely assembled

- pump Cematic 3000/18, 18 V, 40 L/min or Cematic 56/18, 18 V, 60 L/min
- totally mobile and cable-free, independent of vehicle batteries
- very low self-discharge, no memory effect

- high intrinsic safety and integrated protection electronics
- charger 220 – 240 VAC, output 18 V – 3 A, included (11921+11926)
- with hinged lid
- 4 m dispensing hose

DT MOBIL Easy 470 L with 18V pump
Cematic 3000/18 and CAS battery

Description	Pump flow rate	Capacity of battery	Max. volume (litre) per battery charge	Dimensions in cm (l x w x h)	Order no.
Charger and battery included					
DT-MOBIL EASY 470 L with Cematic 3000/18	40 L/min	4 Ah	900	118 x 80 x 87	11921
DT-MOBIL EASY 620 L with Cematic 3000/18	40 L/min	4 Ah	900	118 x 80 x 103	11926
Supplied without charger or battery – use your own CAS battery					
DT-MOBIL EASY 470 L with Cematic 3000/18	40 L/min	-	-	118 x 80 x 87	11920
DT-MOBIL EASY 620 L with Cematic 3000/18	40 L/min	-	-	118 x 80 x 103	11925
DT-MOBIL EASY 620 L with Cematic 56/18	60 L/min	-	-	118 x 80 x 103	11933

*** Please note that ADR certification for all plastic IBCs is limited to a period of 5 years.

Accessories see page 48.

Battery systems, Li-Power-Block PG 4

SUITABLE FOR PUMPS WITH 12 VDC SUPPLY VOLTAGE

Lithium iron phosphate battery (LiFePO₄)

- totally mobile, independent of vehicle batteries
- 12.8 V nominal voltage, 3.3 Ah or 5.5 Ah capacity
- battery operating temperature range: -30 °C to + 80 °C
- very low self-discharge, no environmentally harmful heavy metals, no memory effect
- high intrinsic safety and integrated protection circuit, electrical protection class IP 67
- terminal protection caps protect against accidental short circuit
- easy to hang or carry due to rope handle
- includes charger 100 – 240 VAC, output 14.4 V – 3 A

Li-Power-Block with rope loop for easy hanging and carrying

LI-POWER-BLOCK

Description	Order no.
 <p>Li-Power-Block 12.8 V – 3.3 Ah with charger Discharge volume of approx. 300-380 litres on a single charge, without idling, depending on the pump, charging time approx. 66 min.</p>	10749
<p>Li-Power-Block 12.8 V – 5.5 Ah with charger Sufficient for an output volume of approx. 500 – 630 litres without idling, depending on the pump, charging time approx. 110 min.</p>	10750

CEMO DT MOBIL Easy 980 L PG 4

ADR CERTIFIED

Certified for transport under ADR. Examination every 2 ½ years according to ADR 6.5.4.4.1 b) and ADR 6.5.4.4.2 b).*** Completely assembled.

Container:

- 980 L polyethylene, single-walled
- integral baffle
- integral dispensing nozzle holder
- integral filler neck
- filler cap with vent and breather valves
- integral forklift pockets
- integral handles
- with crane eyes
- with flap lid
- integral loops for securing the trolley with ratchet lashing strap during transport

Basic versions:

- with powerful electric pump
- 4 m dispensing hose DN25 / 6 m
- with CENTRI SP 80 (without hose reel, meter and filter) and automatic nozzle

Premium versions:

- with powerful electric pump
- hose reel with 8 m hose DN25
- flow meter
- filter with water separator and automatic nozzle

Pumps:

- pump Bipump 12 V, 500 W, approx. 85 L/min**
- pump Cematic Duo 24/12 V, 420 W, approx. 70/35 L/min*
- pump Cematic 72, 230 V, 500 W, approx. 72 L/min*
- submersible pump CENTRI SP80 AC**, 230 V, 8 L/min*
- hand pump 60 L/min*

Maintenance-free, high-performance submersible pump CENTRI SP80 AC, 230 V

Water absorber for diesel PG 4

NEW

Avoid the repairs, machinery failure y costs resulting from the diesel bug or rust in the fuel system by removing the water that causes it from the diesel. A granulate in a bag absorbs free y dissolved water as well as microparticles.

- simple use in the tank
- non-toxic y environmentally friendly. Does away para the need for biocides y additives

- prevents the growth of bacteria y mould
- improves diesel quality y thus engine performance
- extends the shelf life of diesel y biodiésel
- particularly recommended when engines are not operated for longer periods of time, e.g. in boats, vintage cars or emergency power generators

before

after

Description	Maximum absorption capacity in L	Dimensions (l x w) cm	Weight approx. kg	Order no.
Water absorber S	400	4.5 x 30	0.1	11969

Description	Order no.
K24 flow meter for diesel	11111

Mobile COMBI refuelling systems for diesel and AdBlue®

Contractors want complete, time-saving and easy-to-use solutions for the combined filling of diesel and AdBlue® on site. The combination canister (petrol and oil) for petrol-driven saws is an example. CEMO has rigorously implemented the wishes of professionals with the DT-MobilCUBE COMBI.

- with ADR transport certification
- 980 L capacity, therefore below the exemption limit of 1,000 L according to ADR 1.1.3.6.3
- also ideally suited for biodiesel and diesel with increased biodiesel content
- versions with powerful 12 V, 24 V and 230 V pumps
- inner container with integrated equipment such as powerful pumps, hose reel (with hose DN25), meter and filter with water separator, dispensing nozzle holder, optional marquee heaters and power generators.
- DT-MobilCUBE COMBI with second inner tank in polyethylene, for AdBlue®, with CENTRI SP 30 electric pump
- bund volume of 110 %
- certified for use in water conservation areas
- The steel tanks are primed and painted. We provide a 5-year warranty against rusting through.

optional lifting frame
for crane hooks or grabs
Order no. 11112

optimal use of space

Cubic shape, hence optimal use of space.

high-quality coating
Outer container in painted 3 mm steel sheet** – high-quality coating.

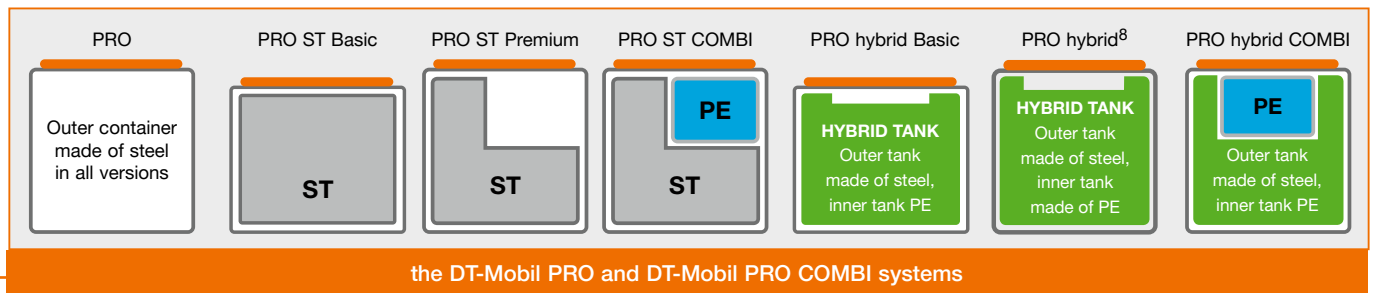

very robust
Inner container in painted 3 mm steel sheet, alternatively in polyethylene, with integrated baffle.

transport-friendly
Galvanised forklift pockets and stacking corners with crane eyes simplify transport and setup. Two tanks can be stacked one on top of the other when full.

lockable

Lid has integrated bar lock to prevent theft. Lid can be locked with a padlock on DT MOBIL PRO ST and hybrid 980.

hose grommet

For routing hoses and cables.

easy to open

Gas struts simplify opening and closing of the lid.

tidies away nice and small

All fittings are on the inside and thus protected. Inner container with equipment, patent protected.

clear

contents gauge

double safety

bund alarm

DT-Mobil PRO ST COMBI 980/200 Premium Plus, with pump Bipump

* National installation laws and conditions must be observed.

We will be happy to advise you.

** Outer container made of 2.5 mm sheet steel on DT MOBIL PRO ST 980 Basic.

The tank revolution – the new CEMO HYBRID-TANK

MOBILE TANK SYSTEMS MADE OF STEEL WITH INNER CONTAINER MADE OF PE

HYBRID TANK

outer tank steel – inner tank polyethylene

NEW

LIGHTER

130 kg less weight, less fuel consumption during transport

MORE SUSTAINABLE

climate-friendly manufacture, fewer CO2 emissions than for solid steel

LONGER CERTIFICATION

one of a kind: ADR certification for 8 years instead of just 5 years

REPLACEABLE PE INNER TANK

replacement service includes ADR test certificate

CEMO PRO mobil hybrid®

The first combination IBC in Germany to obtain ADR certification extended to 8 years.

CEMO PRO mobil hybrid Basic Model with lower overall height

Lighter than comparable double-walled steel IBCs for lower fuel consumption during transport.

CEMO PRO mobil hybrid Generator tank

Connections with quick-coupling for marquee heaters and power generators.

CEMO DT MOBIL PRO hybrid⁸ PG 4

CEMO tank replacement service and Complete Care Package for DT MOBIL PRO hybrid and PRO ST COMBI PG 100

ADR certification is limited to 5 years for all combination IBCs, such as our PRO mobil hybrid and PRO mobil hybrid COMBI.

hereafter, the inner tank for diesel must be renewed. We offer this tank replacement service including ADR test certificate.

This offers you the following advantages:

- The inspection by an officially recognized expert that is required after 5 years as per ADR 6.5.4.4.1 a) for all metal IBCs, all rigid plastic IBCs and all combination IBCs (cost approx. € 260) is included in the tank replacement service.
- Experts inspect the complete refuelling system.
- Any additional repair work required can be inexpensively performed at the same time.

We also offer a 10-year Complete Care Package.

The package includes the following services:

- inspection by experts after 2.5 and 7.5 years
- tank replacement service after 5 years
- scheduling of inspection dates

DT-Mobil PRO hybrid⁸ 980 Basic, with pump Cematic Duo

Reliable energy supply for mobile heaters and generators

Mobile diesel and heating oil tanks for
fan heaters and power generators

Indoor and outdoor

Transport-friendly with tyres, forklift
pockets or foot pallet

Capacities from 60 to 1,500 litres

CEMO Multi tank PG 4

Tank

- made of HDPE with integral galvanised sheet steel bund
- with rigidly connected sheet steel pallet for handling with a forklift or pallet truck from any of the four sides
- standard accessories:
filling contents gauge, visual bund alarm, integral carrying handles
- no pump

- for storage of diesel, biodiesel without a bund, even in water-protected areas*
- certified for installation indoors

Particular advantages:

- certified for transport according to the ADR, but without a pump fitted – examination after 2½ years (see ADR 6.5.4.4.1 b and ADR 6.5.4.4.2 b).***
- lower centre of gravity increases stability and improves handling/transport

Capacity L	Dimensions cm (l x w x h)	Certification no. for storage and transport	Weight approx. kg	Order no.

* National installation laws and conditions must be observed.

*** The transport certification for all plastic-IBC is limited to 5 years.

★ Accessories see page 29.

CEMO diesel and heating oil trolley PG 4

The mobile solution for supplying heating systems and generators.
 The trolley can be used as an emergency supply when a heating oil tank is being replaced.

Diesel and heating oil trolley 60 L and 100 L

- suitable for use under ADR 1.1.3.1 c) for single site refuelling by a person in the course of their main business
- polyethylene container with integral hand grip and carry handles
- fill cap with integral breather valve
- flow connector with 3/8" quick-coupling with counterpart
- return connector with 3/8" quick-coupling with counterpart
- trolley 100 L: 300 mm diameter pneumatic tyres, air-filled, all-terrain
- trolley 60 L: 240 mm diameter plastic tyres
- interior baffle
- trolley 100 L: moulded recesses enabling strapping during transport

Description / Capacity	Dimensions in cm (l x w x h)	Weight approx. kg	Order no.
Diesel and heating oil trolley 60 L with quick couplings	90 x 53 x 38	12	10526
Diesel and heating oil trolley 100 L with quick couplings	100 x 59 x 43	17	10527

CEMO DT MOBIL EASY generator tank PG 4

The innovative diesel and heating oil tank with a wealth of useful features.
 Transport-friendly thanks to rugged construction, ratchet strap recesses and forklift pockets.

DT-Mobil EASY generator tank

- 980 litre: certified for transport according to the ADR*
- 210 and 440 litre: certified for transport for immediate consumption according to ADR 1.1.3.1 c)
- integral filler neck
- filler cap with vent and breather valves
- integral forklift pockets and handles
- integral recesses (210 L and 440 L) or loops (980 L) for ratchet tie-downs during transport
- 980 litre: with hinged lid and contents gauge
- 210 and 440 litre: with hinged lid

Flow and return braided hoses and two pairs of quick couplings 1/2" IT ideal for generators and heaters.

Description	Capacity L	Dimensions in cm (l x w x h)	Weight approx. kg	Order no.
210 generator tank	210	78.5 x 59,5 x 68.5	21	11374
440 generator tank	440	118 x 80 x 71	36	11375
980 generator tank	980	127 x 107 x 112	95	11376

* Please note that ADR certification for all combination IBCs with plastic inner tanks for diesel is limited to a period of 5 years.

CEMO DT MOBIL PRO hybrid generator tank PG 4

CEMO CUBE mobil generator tank PG 4

Our new DT-Mobil PRO tank is characterised by its extremely high strength due to the steel outer container with hot-dip galvanised steel forklift pockets and stacking corners with crane eyes.
The new CUBE-Tank Mobile impresses with its PE sump due to its lower weight.

- certified for transport under ADR (980 L)
- with connections with quick-coupling for marquee heaters and power generators
- PRO mobil hybrid 440 generator tank:** with inner tank for diesel made of polyethylene, ADR certified 1.1.3.1 c), with flow and return hoses with quick-coupling
- PRO mobil hybrid 980 generator tank:** with inner tank for diesel made of polyethylene*** with flow and return hoses with quick-coupling (1 x flow, 1 x return)

- DT-Mobil PRO ST 980 generator tank:** Certification for unlimited period of time, with inner tank for diesel made from painted 3 mm steel sheet, with 4 connections with quick-coupling (2 x flow, 2 x return)

- PRO mobil hybrid 980 generator tank:** with inner tank for diesel made of polyethylene***, with flow and return hoses with quick-coupling (1 x flow, 1 x return)
- CUBE Mobil generator tank 980:** with inner tank and bund made of polyethylene***, with 2 connections with quick-coupling (1 x flow, 1 x return)

Examination every 2 ½ years
(see ADR 6.5.4.4.1 b and ADR 6.5.4.4.2 b).

DT-Mobil PRO
Outer container
made of steel,
inner container
made of steel
or PE

Delivery line with quick coupling set each with counterpart and 1/2" internal thread connection for flow and return line suitable for mobile oil heaters and generators

DT-Mobil PRO ST 980 generator tank

CUBE Mobil 980 generator tank with 2 connections

DT-Mobil PRO hybrid 980 generator tank with 2 connections

DT-Mobil PRO ST 980 Basic generator tank with 4 connections

Protected hose routing

Description	Capacity L	External dimensions cm (l x w x h)	Weight approx. kg	Order no.

ACCESSORY

Description	Order no.
Generator and heater connection set with quick couplings (½" flow and return braided hoses) for DT-Mobil PRO ST	11506

*** Please note that ADR certification is limited to 5 years for all combination IBCs para a plastic inner tank for diesel. The inner tank must be replaced after this time. We offer this tank replacement service..

TANK REPLACEMENT SERVICE see page 60.

Accessory lifting frame see page 56.

REFUELLING SYSTEMS FOR PETROL

Refuelling systems for petrol (page 72 – 77)

Canisters

- 5 L to 25 L
- model with explosion-proof filling
- models with nozzle pump

75

Airfield tank systems
on request

flashback
arrester

CEMO petrol trolley

- 60 L + 95 L
- mobile tank system for petrol
- suitable for use under ADR 1.1.3.1 c) for single site refuelling by a person in the course of their main business
- container constructed from high density electrically conductive polyethylene to eliminate static
- flashback arrester
- large tyres, all-terrain

76

CEMO KS MOBIL Easy

- 120 L + 190 L + 330 L
- mobile tank system for petrol
- certified for transport according to ADR
- electrically conductive highly cross-linked polyethylene
- patented flame suppressant filling

76
77

CEMO KS MOBIL

- 90 L – 300 L
- mobile tank system for petrol
- certified for transport under ADR
- explosion shock proof construction

74

Explosion pressure
resistant

CEMO KS MOBIL

- 400 L – 980 L
- mobile tank system for petrol
- certified for transport according to ADR, also in water-protected areas
- certified as a storage tank according to DIN 6623
- explosion shock proof construction

72

Refuelling systems for petrol

IMPORTANT LEGAL CONDITIONS FOR HANDLING PETROL

The requirements for handling petrol (H 224) are comparable to those of diesel fuel (H 226), but are somewhat stricter. The more stringent requirements are due to the usually higher water hazard classe in accordance para the German Water Management Act y to the lower flash point (extremely flammable liquid according to GHS) of petrol. The more stringent requirements are described below.

Storing petrol

There are many laws y regulations that must be complied para when storing petrol. Excerpts from the German Ordinance on Industrial Safety y Health (Betriebssicherheitsverordnung (BetrSichV)), the German Water Management Act (Wasserhaushaltsgesetz (WHG)), the German Technical Regulations for Hazardous Substances (Technische Regel

Gefahrstoffe (TRGS)) y the regulations related to garages in Germany (Garagenverordnung) are given here. These regulations clearly define the permissible storage quantities, storage site requirements, y the risk assessments required by the employer. This information has been clearly organised in the following table. For storage tanks para a capacity of 200 l or more, a restraining device is required if the tanks do not have a double-walled design.

Storage	Technical Regulations for Hazardous Substances (TRGS) 510	Ordinance on Industrial Safety and Health (BetrSichV)	Water Management Act (WHG)	Regulations on Garages (Garagenverordnung)
in homes	no			
in basements	not regulated			
in retail areas	not regulated			
in work areas	regulation for small quantities applies up to 10 L; quantities exceeding 10 L must be stored in an F90 safety cabinet or hazardous materials storage area	Risk assessment required due to risk of explosion	General duty of care under Section 5 and Duty of Care Principle Section 62	
in garages				20 L in small garages up to 100 m², not permitted in larger garages
outdoors	Active storage – distance of 10 m from building; passive storage up to 200 L – distance of 3 m; passive storage up to <1,000 L – distance of 5 m from building	Risk assessment required due to risk of explosion		

Transporting petrol

The following regulations must be observed when transporting petrol (see page 32). They go above and beyond the scope of requirements for transporting diesel fuel.

- Maximum quantity as defined in table 1.1.3.6 ADR (1000 point rule) is 333 L. For quantities greater than this, a dangerous goods driving licence is generally required and the German Craftsman Regulation in accordance with ADR 1.1.3.1 c) no longer applies.
- Mobile fuel refuelling systems with ADR certification require this for packaging groups II and III.

2. the probability of the existence or creation and the coming into effect of ignition sources, including electrostatic discharges, and
3. the extent of the effects to be expected from explosions.

The assessment must refer to the specific local and operating conditions. Note: More than 10 litres of contiguous explosive atmosphere in enclosed spaces must be viewed as a hazardous explosive atmosphere, regardless of the size of the space.

What does this mean for you in your day-to-day work?

In general, the transferring and filling of petrol must be done in well ventilated rooms or outdoors. According to the Ordinance on Industrial Safety and Health, you should only provide devices/equipment that are state of the art. In addition, you should pay special attention to the risk assessment when handling petrol. The best option for reducing the risk is never to allow a contiguous explosive atmosphere of more than 10 litres to form in the first place. The current state of the art only enables this to be achieved inside containers in use by means of explosion-suppressing inserts. Another option is to prevent the explosive atmosphere from being ignited by ignition sparks by placing flame arresters into the container openings.

If the container has an explosion-proof design, neither an explosion-suppressing insert nor a flame arrester is required up to a container size of 1000 L. As a rule, explosion-proof containers are made from thick-walled sheet steel, although they have the disadvantage of being very heavy.

Should you use equipment that is manufactured without explosion-suppressing inserts or flame arresters, the probability of the existence or creation and the coming into effect of ignition sources, including electrostatic discharges, is to be especially assessed. In practice, this is very difficult to achieve with changing types of work (forest, road, constructions sites or in the workshop). As a rule, the creation of sources of ignition and electrostatic charge cannot be fully prevented and therefore ruled out safely enough.

We therefore recommend using canisters or containers > 10 L, which are not designed to be explosion-proof, with explosion-suppressing inserts or flame arresters.

Important information related to risk assessments can be found in the operating instructions for CEMO petrol tank systems. This will make it easier for you to fulfil your obligations as an employer.

Transferring and filling petrol

The Ordinance on Industrial Safety and Health (BetrSichV) is the German implementation of European Directive 95/63/EC and regulates the provision of equipment by the employer. This also includes the risk assessment of the equipment, which in turn includes the assessment of the risk of explosion in accordance with TRBS 2152 Part 1. If the formation of hazardous, explosive atmospheres cannot be prevented with certainty, the employer is to assess the following:

1. the probability and duration of the occurrence of a hazardous, explosive atmosphere,

CEMO KS MOBIL PG 4

Refuelling systems for petrol, stationary and mobile

Tank system KS-MOBIL double-walled with general construction inspection certification no. D/BAM 6599/31A (400 L and 600 L), D/BAM 6600/31A (980 L)

- for mobile outdoor and indoor use
- indefinite certification period
- certified for transport under ADR, also in water-protected areas*
- certified as a storage tank according to DIN 6623
- certified for petrol
- capacity 400, 600 or 980 litre
- design approved as a complete system in all variations
- KS-MOBIL for bioethanol on request

Construction:

- double-walled steel container
- explosion shock proof construction
- with two crane eyes
- forklift pockets
- guard ring for pump system
- dip stick
- discharge line R 1", lockable
- ventilation pipe R 2", lockable
- filling connection R 2", lockable
- bund alarm and overfill prevention sensor
- long, removable ventilation pipe (3 m above ground)

Explosion pressure resistant

Examinations every 2½ years según ADR 6.5.4.4.1 b y ADR 6.5.4.4.2 b.

Model with pump cabinet, double-walled, hot galvanised, design approved

KS-MOBIL DOUBLE-WALL

	Double sided hot galvanised model	Capacity L	Dimensions in cm (l x w x h)	Weight approx. kg	Order no.
1.	without pump hood, completely assembled (without pump etc.)	400	96 x 96 x 114	211	7754
		600	96 x 96 x 141	253	7755
		980	121 x 121 x 141	300	7756
2.	with lockable pump cabinet, completely assembled (without pump etc.)	400	96 x 96 x 150	229	7760
		600	96 x 96 x 177	271	7761
		980	121 x 121 x 181	318	7762

ACCESSORIES SUITABLE FOR MOBILE FUELING SYSTEMS

Description	Order no.
 Lockable pump cabinet with dispensing nozzle holder (included in model 2)	7763
 Dispensing hose for gasoline/petrol for extension or as a replacement, 4 m, coupling nut on one side, other side 1" outer thread	8521
 Automatic dispensing nozzle for petrol, EN13012, ATEX, with swivel joint 1" internal thread	10142
 Adhesive label set for DT-Mobil and KS-MOBIL retrofitting	10261

According to TRbF (German Technical Regulations for Combustible Liquids), if actively storing petrol, a distance of 10 m between the container and building must be maintained, unless the building wall is constructed according to TRbF or there are fire-resistant components of sufficient width and height between the building and the container (e.g. F90 fire prevention store). According to health and safety regulations, all refuelling systems for petrol must have a permission (applicable when used as fixed refuelling system). We will be happy to advise.

Please note: The permitted max. amount for petrol is according to ADR chapter 1.1.3.6.3, 333 L (basic requirements, e.g. no dangerous good driving permit necessary).

* National installation laws and conditions must be observed. We will be happy to advise you.

CEMO KS MOBIL Easy 120 and 190 L PG 4 ADR CERTIFIED

certified for transport according to ADR D/BAM 14341/31H2

Examinations every 2½ years corresponding ADR 6.5.4.4.1 b*** and ADR 6.5.4.4.2 b. Completely assembled.

Container:

- single-walled 120 L or 190 L
- electrically conductive highly cross-linked polyethylene
- patented flame suppressant filling
- dipstick for checking fill level
- integral dispensing nozzle holder
- integral filler neck
- integral vent and pressure relief
- integral forklift pockets
- integral handles
- integral recesses for ratchet straps during transport

Pre-fitted pump:

- 25 L/min hand pump, 2.7 m dispensing hose (statically conductive) and manual nozzle
- self-priming pump 12 V DC 25 L/min or 230 V AC 40 L/min, ATEX-certified, automatic dispensing nozzle, 4 m filling hose (statically conductive) and 5 m electrical cable (pump 230 V without cable)

KS-MOBIL Easy 120 L with pump 12 V

KS-MOBIL Easy 190 L with hand pump and hinged lid

Explosion-suppressing insert (patent protected), hence no explosive atmosphere inside the container (120 L and 190 L)

*** The transport certification for all plastic IBCs is limited to 5 years.

ACCESSORY

Description	Order no.
Overfill prevention sensor, complete, supply voltage 230 V, comprising: level transmitter (sensor length 250 mm) with screwed connection R 1", display unit (alarm device) with signal light and buzzer.	10703

CEMO UNI PG 4

Stationary refilling systems for lubricants – electric

Tank from HDPE with integral galvanised sheet steel bund, standard accessories such as pallet base, filling contents gauge and visual bund alarm, suction kit, pump, dispensing hose and digital manual flow meter, with holder and drip tray.

Components delivered unmounted to prevent damage during transport. For storage of fresh and waste oil with a flash point > 55 °C and certified for use in water protected areas without a bund* when installed indoors.

Fresh oil

Electric pumps (technical data)

Pump 230 V (cannot be calibrated*). Gear pump with a delivery rate of 9 l/min, max. delivery pressure 12 bar, Adequado para engine, transmission and hydraulic oils up to SAE 140

Pump 230 V (cannot be calibrated*) with a delivery rate of 9 L/min and max. delivery pressure of 12 bar

* see information on weights and measures regulation

i IMPORTANT INFORMATION REGARDING THE WEIGHTS AND MEASURES REGULATION (EXTRACT)

Regulation on the putting into circulation and provision of measuring devices on the market and on their use and calibration (Weights and Measures Regulations – MessEV)

§ 5

Uses exempt from the scope of application

- (1) **The Weights and Measures Act** and these regulations are not to be applied to measuring devices or readings that are used in normal commercial practice
6. **in businesses of the motor trade or at public refuelling systems for determining the volume or the mass of lubricating or transmission oil, brake fluid, refrigerant for air conditioners, anti-freeze or screenwash**

COMPACT LUBRICANT SYSTEM WITH ELECTRIC PUMP

④ UNI 1500*	212 x 77 x 210	15 m, open hose reel	188	8682

Complete assembly of the lubricant system ECO

10211

* incl. filling connection para TW coupling, breather cap y overflow protection

*** National installation laws and conditions must be observed. We will be happy to advise you.

Accessories see page 133

CEMO UNI | MULTI PG 4

Stationary refilling systems for lubricants

Tank from HDPE with general construction inspection certification
Individual tank with integral galvanised sheet steel bund, standard accessories such as filling contents gauge, visual leakage detector device, integral carrying handle, no pump.

For storage of fresh and waste oil with a flash point > 55 °C also certified for indoor installation and in water protection areas without a bund*.

Low overall height (up to 1,000 L), thus no steps are required when filling with waste oil.

UNI-Tank

Tank as described above with foot pallet.

MULTI-Tank

Tank as described above with integral sheet steel pallet for moving with a forklift or hand forklift from any of four sides.

Particular advantages:

- certified for transport according to ADR, but without a pump fitted. Examination after 2½ years (see ADR 6.5.4.4.1 b).***
- lower centre of gravity increases stability and improves handling/ transport.

Fresh and waste oil

CEMO Lubricant tanks PG 4

ACCESSORIES FOR UNI- AND MULTI-TANK

**Fresh and
waste oil**

Description	Order no.
 <p>GRP filling funnel with sealable lid</p>	7389
 <p>Suction pipe with tanker coupling for UNI/MULTI-Tank up to 1,000 L</p>	7390
<p>Suction pipe with tanker coupling for UNI/MULTI-Tank 1,500 L</p>	8323
 <p>Hand pump for engine oils up to SAE 50 for UNI/MULTI-Tank up to 1,000 L</p>	1452
 <p>Overfill prevention complete, supply voltage 230 V, comprising: level sender (probe) with reducer R 1" and 3/4", indicator (alarm arrangement) with alarm lamp and buzzer.</p>	11452
 <p>Leakage detector device 230 V, visual and acoustic, probe with 5 m cable, cable gland</p>	7391

CEMO VISCOTROLL – mobile compact system PG 4

Mobile compact lubricant system is the ideal oil dispenser solution in all cases, where the drum may have to be moved anywhere within the workshop. Thanks to the electric power supply, connection to any type of socket is possible and no compressed air supply is needed.

The unit has a self-priming gear pump, which guarantees a constant dispensing volume as well as even, pulsation- and noise-free flow.

A flow meter with a display integrated into the nozzle enables exact metering and volume control of the dispensed liquid.

Pump technical data – see Viscomat lubricant pump 200/2 see page 132.

Wheeled drum trolley of tubular construction complete with nozzle holder, hose holder and drip tray, self-priming pump with connected 230 V AC asynchronous motor with self-ventilation (protection category IP 55), 1" suction hose with foot valve and filter, 4 m pressure hose 1/2", nozzle with flexible end, drop-free automatic valve.

Viscotroll 200/2 with flow meter pressure switch with incorporated safety valve available on request

Description	Weight approx. kg	Order no.
Viscotroll 200/2 with flow meter K 400	35	7910

CEMO CUBE Profitank 2000 L

PG 4

Stationary refilling systems for lubricants, double walled

Successor to the legendary CEMO DWT tank with general construction inspection certificatio Z-40.21-593

- with two connection flanges
- also suitable for water protection areas
- certified for installation outdoors

- Extensive range of accessories such as sturdy steel dome lids for mounting connection hoses and pumps

Fresh and waste oil

Diesel / biodiesel

Antifreeze fluid

DOUBLE-WALLED –
therefore also certified for
water protection areas
without external bund!

Description	External dimensions cm (w x d x h)	Weight (approx.) in kg	Order no.
CUBE-Profitank 2000 L	86 x 180 x 180	180	11665

CEMO CUBE Profitank 2000 L PG 4

Stationary tank system for fresh and waste oil, double walled

ACCESSORIES FOR FRESH OIL TANK

Description	Order no.
 <p>Dome lid (steel) with 4 threaded pipe couplings (straight), 2" for filling, also 2", 1 1/2" and 1". Supplied with: a blanking cap for each pipe coupling 2", 1 1/2" and 1".</p>	1436
 <p>Dome lid (steel) with 2 threaded tubes (sloping welded), 1 x 2" for filling, 1 x 2" for vent and 2 threaded pipe couplings (straight) 2" and 1". Supplied with: Tanker coupling and ventilation cap.</p>	1451

ACCESSORIES FOR WASTE OIL TANK

Description	Order no.
 <p>Dome lid (steel) complete with suction pipe, with pipe couplings, respectively 1 x 2", 1 1/2" and 1". Supplied with: tanker coupling and a blanking cap for each pipe coupling 2", 1 1/2" and 1" for Profi-Tank 2000 L</p>	7332

ACCESSORIES GENERAL

Description	Order no.
 <p>Electronic overfill prevention, 230 VAC comprises evaluation unit and probe housing protection category IP 54, fitting 1" and 3/4", reduction 2" to 1", probe 500 mm</p>	11452
 <p>Contents gauge Piusi OCIO for oil, 230 V, IP55 An innovative system for management of the liquid level in tanks at atmospheric pressure. Special features: continuous measurement, display of heights, volumes and refill percentages, minimum and maximum level alarms, high accuracy, simple installation, simple software configuration, PC connection possible</p>	7796
 <p>Step, galvanised, step heights 20 cm and 40 cm</p>	3345
 <p>Tank heater type TH 370, 230 V, dia. 44 mm for electric heating of EL grade heating oil and diesel fuel power 0.22 kW, self-regulating, prevents separation of paraffins at low temperatures</p>	8126

CEMO lubricant trolley PG 4

CEMO lubricant trolley – now also available with a CAS battery system.

Professional system with longer battery life.

The practical solution for filling vehicles used on construction sites or in the field.

- for transport and independent filling of unused engine, gear and hydraulic oils (no dangerous goods as per ADR) with a viscosity of up to max. 2,000 cSt.
- polyethylene container with integral hand grip and carry handles

- filler cap with integral vent and breather valve
- outlet connection with isolation valve
- large all-terrain wheels
- equipped with 12 V, self-priming electric gear pump, 6 L/min, max. delivery pressure 5 bar
- 3,2 m dispensing hose (100 L)
- 2,7 m dispensing hose (60 L)

Lubricant trolley 100 L

Lubricant trolley 100 L	-	-	100 x 59 x 43	11866

ACCESSORIES

     	① Charger ASC55, 220 – 240 VAC, 3 A, CAS	11385	
	Li-Power battery 18 V / 2.0 Ah CAS	11386	
	Li-Power battery 18 V / 4.0 Ah CAS	11387	
	Li-HD battery 18 V / 8.0 Ah CAS	11388	
	Electronic K400 meter, oval gear principle, 1 – 30 L/min, ½" inner thread, max. 70 bar, suitable for oil metering pistol and more	8574	

CEMO Transfer trolley KSS 130 L PG 4

NEW

How do you get the emulsion from mixer to machine?

This is how easy, safe and clean refilling can be.

- a clean emulsion every time. Closed, opaque polyethylene tank with handles
- large screw cap with vent/breather for simple refilling and cleaning
- lower centre of gravity and secure standing
- four large plastic steering castors, D = 125 mm, for easy manoeuvring. The two rear steering castors are fitted with a parking brake. The plastic wheels do not pick up any chips or shavings from the floor.
- pump sump with drain connector and ball

- valve for almost 100 % emptying.
- quiet submersible pump with a flow rate of approx. 30 L/min.
- 2 m hose with delivery nozzle. Removable drip tray in dispensing nozzle holder
- totally mobile. No cables or hoses on the ground that can be damaged by the forklift or pose a trip hazard. 4 Ah CAS battery sufficient for approx. five filling procedures.
- all materials resistant to cooling lubricant emulsion

Cooling lubricants

 Accessories see above

Description	Pump flow rate	Dimensions in cm (l x w x h)	Order no.
KSS 130 L with CAS , without battery and charger	30 L/min	50 x 75 x 101	11857
Accessories: Electronic flow meter K24, plastic, 6 – 100 L/min, 1" ET, coupling 1", stainless steel			8609

CEMO MOBIL Easy PG 4

Mobile refilling systems for lubricants

The solution for filling vehicles with clean engine, gear and hydraulic oils (no dangerous goods as per ADR) used on constructions sites or in the field.

- Single-walled Contenedor made of polyethylene
- Recesses for tie-down straps
- Integral dispensing nozzle holder
- DN 100 filler neck with cap
- Vent with pressure relief
- Integral forklift pockets
- Integral handles
- Self-priming, 12 V electric gear pump, 10 L/min, max. delivery pressure 4 bar, 4 m connection cable with crocodile clips for oils with a viscosity up to max. 600 cSt
- Delivery hose 4 m
- Oil dispensing nozzle

Lubricant MOBILE Easy 200 L with 12 V pump and oil dispensing nozzle

Description	Dimensions cm (l x b x h)	Weight approx. kg	Order no.
200 L with pump 12 V and oil metering pistol	80 x 60 x 59	31	10752

ACCESSORIES

Description	Order no.
 Electronic K400 flow meter, oval gear principle, 1-30 L/min, ½" inner thread, max. 70 bar, suitable for oil metering pistol and more	8574
 Lid for Lubricant Mobil Easy 200 L	8963
 Li-Power-Block 13,2 V – 5,5 Ah with charger (see page 45) The battery has the capacity to pump approximately 150 litres of lubricant on a single charge, depending on viscosity.	10750

Li-Power-Block as accessory

Transfer trolley for oil 130 L PG 4

For transport and independent filling of fresh engine, gear and hydraulic oils in the workshop.

- totally mobile and cable-free
- 130 L container made of high-quality polyethylene, with integral handles
- low centre of gravity
- filler neck with integral ventilation
- with contents gauge
- integral pump sump allows the container to be emptied almost entirely
- equipped with four steering castors \varnothing 100 mm (two steering castors with rotation and swivel brake)
- integral dispensing nozzle holder

- equipped with self-priming gear pump, 2.5 L/min, max. delivery pressure 4 bar, with battery and charger, with oil dispensing nozzle and 2 m dispensing hose for oils with a viscosity up to max. 2,000 cSt

FILLING VEHICLES AND MACHINES

Digital flow meter K24 plastic, 6 – 100 L/min, 1" internal thread, 90° elbow for direct attachment to the pump	10274

**REFILLING SYSTEMS
FOR ADBLUE® | DEF**

CEMO refilling systems for AdBlue® / DEF

(p. 90 – 111)

CEMO CUBE 5,000 L

- 5,000 L
- everything fully integrated
- the new dimension of CEMO CUBE-Tanks

94

We also offer tanks and systems for co-generation plants and biogas plants. Please feel free to contact us.

CEMO CUBE „Outdoor“ and „Indoor“ Basic and Premium

- 1,500 L, 2,500 L
- expandable to 5,000 L
- everything packed into a small space

98

CEMO CUBE 3,500 and 7,500 L

- Basic and Premium

101

Trolley for AdBlue®

- All-terrain due to large wheels and integrated baffle.
- 60 L + 100 L
- no ADR certification is required for transport

106

Blue-Mobil Easy

The practical solution for filling vehicles when used on construction sites or in the field.

- 125 L – 980 L
- no ADR certification is required for transport

108

Refilling systems for AdBlue®

Basics and requirements for refilling systems for AdBlue®

Aqueous urea solution AUS 32 (trade name AdBlue®, for example) is a non-hazardous chemical substance as defined in the German Ordinance on Hazardous Substances.

AdBlue® must not be exposed to direct sunlight. The optimal storage temperature is between - 5 °C and +20 °C.

It freezes at -11 °C and should not be stored for longer periods above +30 °C, because vaporisation of ammonia increases with temperature and the urea concentration decreases.

All parts in contact with fluids must be made of stainless steel or certified plastics, because the urea solution is highly pure and must correspond to ISO 22241. CEMO tank systems meet this requirement.

AdBlue® is classified as a low hazard to water (water hazard class 1). Consequently, the relevant provisions of the laws pertaining to water and water-ways apply. These were summarised by the German Association for Water, Wastewater and Waste (DWA) in technical rule **TRwS 781-2**. It covers the filling of vehicles with aqueous urea solution from stationary storage tanks as well as mobile tanks used at a fixed location in refuelling systems for vehicles, both for public filling and private refuelling system.

The capacity constitutes the state of the art and is binding for all operating companies, both for existing tank systems as well as for new systems to be established

In all cases, contamination of the light oil separator or the sewer system by AdBlue® must be avoided.

Thus for filling storage tanks and fueling vehicles a filling area which is impermeable to fluids with an effective range according to TRwS 781: 4.1.2 is required.

Storage containers

- For volumes greater than 1,000 litres, the tank must be double-walled or a means of retention must be present. Please clarify the requirements which apply to your local water authorities. We will be happy to advise you.
- Storage tanks must be equipped para an certified overfill prevention system.
- Collision protection, for example as kerb, guard rail, large stones or similar.

Filling of vehicles para AdBlue®

- Nozzles para automatic shut-off must be used.
- The retention capacity of the necessary filling area must constitute 5 min of the maximum pump delivery rate y at least the maximum defined delivery volume para the use of an automatic pump.
- If this retention volume is not present paraout AdBlue getting into the light oil separator or sewer system, then the requirement is considered met, only if the locking catch of the nozzle is removed y it is ensured that the dispensing hose cannot be run over.

Filling the storage tank

- For a filling area in the open, rainwater need not be considered in the calculation of retention volume when the area is covered.
- The necessary retention volume para the use of a dispensing hose safety system amounts to $R1 = 0.1 \text{ m}^3$; for filling using equipment para a safety button which must be held down while filling y an emergency shutoff function $R1 = 0.9 \text{ m}^3$
- The entire retention capacity present can be filled up to the oil separator if a closure is present at a suitable position before it, which can be closed during the filling of the large tank.

TIP:

No retention capacity is required if:

1. Dispensing hoses are in accordance with the German Technical Regulations for Flammable Liquids (TRbF) 50 Appendix B or Directive 97/23/EC are used and operated in accordance with Bulletin T 002 of the Employment Accident Insurance Fund of the Chemical Industry (BG Chemie)
2. Full hose delivery equipment with dry coupling is used
3. An immobiliser is used on the tank vehicle
4. Filling of the storage tanks takes place on a filling area compliant with TRwS 781
5. The dispensing hose cannot be run over (for example, automatic hose reel with spring return without pawl).

The points listed are abbreviated excerpts from the cited y general regulations in some cases para no guarantee of completeness.

CEMO CUBE 5,000 L

Stationary refilling systems for AdBlue®

The new CUBE-Tank series is the first generation of refilling systems to have been uncompromisingly developed as a complete system from the outset. With the 5,000 L size, CEMO is expanding this concept upwards. Everything has its place and nothing interrupts the filling process. Let us convince you of the advantages of this overall concept.

Video
CUBE-Tank

large access

Hinged lid with 300 mm inspection port.

ergonomically perfect

All components are clearly located at optimal height within the bund.

double protection

Integral 110 % bund gives added environmental protection.

wind load protection

Four fixing points on the floor for wind load protection.

easy to lift

Three attachment points around the circumference Ø 20 mm for shackles or hoists for lifting of the empty tank station from above.

AdBlue® is a registered trademark of the German Automotive Industry Association.

CEMO CUBE 5,000 L for AdBlue® PG 4

Refilling systems for AdBlue® Complete stations Basic and Premium with general construction inspection Z-40.21-565

- bunded tank
- hinged lid (Outdoor)
- visual bund alarm
- filling connection with 2" dry coupling
- electronic overfill prevention
- mechanical contents gauge
- pump 230 V, 35 L/min
- automatic nozzle with dispensing nozzle holder
- fitting heater 250 W (Outdoor)
- completely assembled
- all devices wired ready to connect into a terminal box

Accessory LED instrument lighting

Accessory hose reel

Accessory heater

Accessory K 24 digital flow meter

Accessory: Insulating jacket

ACCESSORIES FOR CUBE-TANK FOR ADBLUE® (NOT ASSEMBLED)

Description	Order no.
Hose reel with 8 m EPDM hose, DN19	10431
Digital flow meter K24 plastic, 6 – 100 L/min, 1" internal thread, 90° elbow for direct attachment to the pump	10274
LED instrument lighting with motion sensor and battery	10378
Hinged lid blue, complete with gas strut and mounting fittings	10437
Tank heater for AdBlue® 230 VAC/435 W, stainless steel, with 6 m connection cable Switching temperatures: Ton (-3) – (-5) °C, Toff (1 – 3) °C, size 700 mm x 47 mm. Suitable for retrofitting at any time. Two or more heaters can be installed for higher output requirements. We recommend insulating the installation surface of the tank system	10756
Insulating jacket for CUBE-Tank 1,500 L Grey insulating cover made from UV and weather-resistant PVC tarpaulin with flexible 20 mm insulation, easy installation with Velcro fasteners, no "BLUE to go" logo (individual printing as advertising surface on request)	10954
Insulating jacket for CUBE-Tank 2,500 L	10955
 Data transfer set with 3 data transfer cards and USB key reader for data transfer to PC, incl. PC software	10746
 Key set with 5 user key fobs	10747

CUBE tank system 5,000 L for AdBlue®, comprising:

- CUBE-Tank 2,500 L for AdBlue®, Outdoor Premium (10306)
- Extension Outdoor 2,500 L (10307)

Mobile car AdBlue® refilling PG 4

Mobile refilling of passenger vehicles for the workshop

The rapidly-increasing number of diesel vehicles with AdBlue® introduces new challenges for workshops in refilling. CEMO presents the ideal solution for your business.

Bluefill PRO X

- chassis for 200 L and 60 L drums
- 230 V pump with 2 m dispensing hose
- dispensing volume preset
- dispensing volume automatic from 2 L/min to 15 L/min
- coupling for vehicle tank to ISO 22241
- self-cleaning sensor for automatic switch-off
- closed system between drum and vehicle tank, venting back into the drum
- with suction pipe for the drum and coupling type SEC
- the SEC coupling can be used for filling the drum or even connecting to an IBC for direct filling

Bluefill
PRO X

Description	Dimensions cm (l x w x h)	Weight approx. kg	Order no.
Bluefill PRO X * 200 L or 60 L, car filling system with automatic shut-off	80 x 80 x 120	37	10868

Cematic Pumps for AdBlue® see page 135.

CEMO trolley for AdBlue® PG 4

Trolley 60 L for AdBlue®

- elegant blue container made from tested polyethylene with integrated handle and carry handles
- large wheels, dia. 240 mm, for simple handling on terrain and over stairs
- integrated sloshing baffle
- low centre of gravity

Trolley 100 L for AdBlue®

- blue container made from tested polyethylene with integrated handle and carry handles
- wheels, dia. 300, air-filled, all-terrain
- integrated sloshing baffle
- integrated recesses for securing with ratchet tie-downs during transport
- low centre of gravity

Version with crank pump

- solid construction for professional operation
- housing in stainless steel and technopolymer
- delivery rate 0.38 L per revolution
- with manual dispensing nozzle
- independent of electrical energy

Version with CENTRI SP 30

- electric submersible pump 12 V, max. 20 A
- delivery rate approx. 25 L/min
- 4 m cable with fuse, switch and crocodile clamps
- always self-priming, extremely quiet
- with lightweight automatic dispensing nozzle in plastic/stainless steel

Version with CENTRI SP 30 and CAS battery

- totally mobile and cable free, independent of vehicle batteries
- very low self-discharge, no environmentally harmful heavy metals, no memory effect
- high intrinsic safety and integrated protection circuit
- extremely quiet
- incl. charger 220 – 240 VAC, output 18 V – 3 A

Transfer trolley Blue 130 L PG 4

- for safe, convenient indoor transfer of AdBlue® from the storage area to the vehicle
- totally mobile and cable-free
- 130 L container made of high-quality polyethylene, with integral handles
- low centre of gravity
- integral pump sump allows the container to be emptied almost entirely
- equipped with four swivel castors ø 100 mm (two castors with rotation and swivel brake)
- equipped with submersible pump, approx. 25 L/min, with LiFePO₄ battery, charger, 2 m dispensing hose and automatic nozzle

- suitable for commercial vehicles, construction and agricultural machinery and modern passenger cars. Not suitable for older passenger cars which can only be filled at a reduced dispensing volume. Please refer to the driver's manual for your vehicle for information about the maximum permissible dispensing volume.

130 L without battery and charger	25 L/min	-	-	50 x 75 x 101	11675

Transfer-Trolley Chem 130 L PG 4

- for safe, convenient indoor transfer of liquid chemicals from the storage area to the dispensing point
- totally mobile
- 130 L container made of high-quality polyethylene, with integral handles and nozzle holder
- translucent container features a fill-level scale
- low centre of gravity
- integral pump sump allows the container to be emptied almost entirely
- equipped with four swivel castors 100mm (two castors with rotation and swivel brake)
- The screw cap is positioned in the centre and has an opening with a 2" BSP internal thread, where an electric or manual drum pump with a length of 1,000 mm can be installed. Our drum pumps can be found on pages 134 – 138.

1,000 mm electric or manual drum pump can be installed (optional accessory)

Description	Dimensions cm (l x w x h)	Weight approx. kg	Order no.
130 L, without pump	50 x 75 x 101	20	11547

PUMPS

The right pump for every application

DIESEL-/BIODIESEL PUMPS

Dispensing pumps

Recommended for easy filling of large annual diesel requirements where tank data management is a must

page
115 – 118

CUBE pumps

Recommended for an annual diesel consumption between 10,000 and 250,000 litres wherever easy filling is required

119

Cematic pumps

Recommended for an annual diesel consumption between 1,000 and 40,000 litres wherever easy filling is required without the need for integral tank data management

120 – 124

CENTRI SP 80

Submersible pump for diesel/biodiesel and heating oil, maintenance free

125

CENTRI SP 30

Compact submersible electric pump

125 – 126

CENTRI diesel pump

Electric fuel pumps – low-wearing pumps with a long service life

127

Hand pumps

For diesel and lubricating oils

128

PETROL PUMPS

ATEX/IECEx-certified pumps

For flammable liquids

129 – 130

LUBRICANT PUMPS

Viscomat pumps

Up to SAE 140

131 – 133

CHEMICAL PUMPS

Pump systems and pumps for AdBlue®

CENTRI SP30, ECO1 and Cematic Blue, Squalo 35

134 – 135, 138 – 139

Drum pumps and pumps for IBCs

For acids, lyes and aggressive chemicals

136 – 137

Hand pumps

Hand pumps for chemicals and urea solution AUS 32

139

WATER PUMPS

Petrol-driven pumps

With a dispensing volume up to 500 L/min

130

All details stated for pressure and delivery volume assume unobstructed suction and dispensing without additional accessories, if not specified refer to effective dispensing volume.
AdBlue® is a registered trademark of the German Automotive Industry Association.

B.SMART PG 4

SIMPLE AND INTUITIVE – THE TANK DATA MANAGEMENT SYSTEM WITH ACCESS CONTROL VIA DEVICE USING BLUETOOTH.

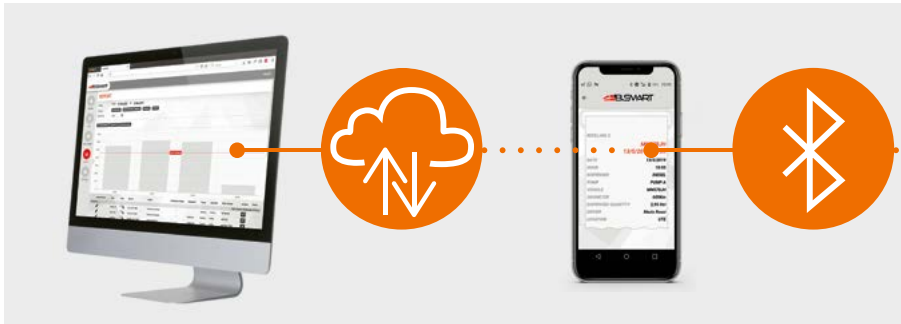

- Everything under a single part number: fuel dispenser, access code for the web app, and licences for driver/user.
- No monthly or annual costs. No ongoing costs when upgrading your operating system. No separate software required.
- The device sends the fuel receipts to the Cloud. The administrator can track each refuelling operation in real time. It works on any device (PC, tablet, smartphone, etc.) and any operating system (Windows, Linux, iOS, etc).
- Any number of B.SMART systems can be monitored from anywhere.
- Suitable for all devices with iOS or Android operating system. The app is available free of charge from the App Store or Google Play Store.
- Data can be exported from the web app as a PDF or XLSX file.
- Drivers can work in the languages set on their smartphones. Drivers without smartphones can refuel using magnetic keys.

ACCESSORIES FOR B.SMART

Description	Order no.
10-User licence pack	11307
50-User licence pack	11309
B.SMART ADD-ON tank level indicator, 1-year period	11492
B.SMART ADD-ON tank level indicator, 3-years period	11493
B.SMART ADD-ON Tank level indicator, unlimited period	11494
 Pedestal for electric pump CUBE 70 MC 50, black	7888
 Key reader complete with USB interface	10878
 Single user key, yellow	10877
B.Smart ADD-ON Fuel Economy, 1-year period	11703
B.Smart ADD-ON Fuel Economy, 3-years period	11704
B.Smart ADD-ON Fuel Economy, unlimied period	11705
B.Smart ADD-ON tank level + Fuel Economy, 1-year period	11706
B.Smart ADD-ON tank level + Fuel Economy, 3-years period	11707
B.Smart ADD-ON tank level + Fuel Economy, unlimited period	11708
B.Smart Fuel Economy 45 QR-Codes	11709
 Level gauge OCIO 2.0 RS485, 230 V	91528

ADD-ON Fill level monitoring

- Management of the tank fill level
- Setting alarms and notifications
- Management of suppliers and prices
- Display of trends and ranges

ADD-ON Fuel Economy monitoring

- Fleet management
- Limit consumption per vehicle and/or driver
- Determine average consumption and costs
- Easy entry of external refuelling
- Vehicle recognition via QR code possible

Diesel dispensers PG 4 for diesel and biodiesel

Diesel dispensers 70 MC + 100 MC

- rotary vane pump 230 V
- up to 250 users
- diesel dispensing volume can be preset
- option of entering vehicle registration number and mileage
- management of date and time of dispensing
- PIN-code access control is standard
- local recording of the last 255 fuel dispensing events
- optional electronic key access control

- data transfer to the PC via electronic key, converter, LAN, W-LAN, 4G (optional)
- equipped with automatic dispensing, design approved in accordance with EN 13012
- 70 MC with passenger car outlet
- 100 MC with truck outlet
- 4 m dispensing hose, DN25
- filter 30 µm with water separator
- choice of 15 menu languages

CUBE 70 MC

- set up for 80 user
- suction vacuum approx. 0.3 bar, so not recommended for underground tanks
- Filter (accessories)

Diesel dispensers 70 K44 + 100 K44

- mechanical volumetric litre meter, 4 digit

Diesel dispensers 70 K44 + 100 K44

Diesel dispensers 70 MC + 100 MC

Electric pump CUBE 70 MC
with pedestal (accessory)

DIESEL DISPENSERS

Description	Dispensing volume L/min	Dimensions cm (l x w x h)	Weight approx kg	Order no.

Dispensers for vegetable oil and AdBlue® on request.

Diesel dispensers PG 4 for diesel and biodiesel

ACCESSORIES

Description	Order no.
 Dispensing hose DN25 (with 2 x 1" external thread) diesel biodiesel resistant	4 m
	6 m
	8 m
	10 m
 Cartridge filter with water separator, max. 70 L/min, 30 µm, 1"-12 UNF, for dispensing pumps 70 MC/FM/K44 (1 piece) and 100 MC/FM/K44 to model year 10/09 (2 pieces)	10031
 Cartridge filter with water separator, max. 150 L/min, 30 µm, 1½"-16 UNF, for dispensing pumps 100 MC/FM/K44 (1 piece) from model year 11/09	10032

ACCESSORIES SPECIALLY FOR DISPENSERS MC AND FM

Description	Order no.
 PW-LAN data transmission interface requires PC-software see below	11310
 PW-WIFI data transmission interface requires PC-software see below	11311
 Converter without PC-software, for data transmission by means of a connection cable to the pump, USB interface, requires PC-software see below	10876
 Key set (1 master key, 10 user keys green yellow, key reader with USB interface) for wireless data transfer to the PC, for dispensers from model year 11/09 requires PC-software see below	10879
 Key reader complete with USB interface	10878
 Master key (1 pc.), red, for data transmission	7826
 1 set of user keys (10 pcs.) green, for dispensers up to model year 10/09	7825
 Single user key, yellow	10877
 1 set of user keys (10 pcs.) yellow, for dispensers from model year 11/09	8705

Software SelfService Management Agilis

Newly-revised version of the tank data management system for SelfService MC, SelfService FM, MC Box and CUBE MC.

- contemporary control panel and intuitive operation
- simple data import from previous versions
- with drivers for key reader, converter, PW-LAN and PW-WiFi

- NEW** now with tank level management by calculation
- NEW** extended options for exporting tank data

Description	Order no.
Software SELF SERVICE MANAGEMENT Agilis – USB: USB stick with software, also acts as licence key	11909

CUBE pumps PG 4 for diesel and biodiesel

- CUBE pumps**
- light and robust construction
 - simple handling due to low weight
 - with anti-siphon device
 - 4 m dispensing hose and automatic nozzle as standard
 - all pumps are equipped with a meter
 - weather-proof housing with integrated nozzle holder and lever switch for automatic pump shut-off
 - suction vacuum approx. 0.3 bar, so not recommended for underground tanks

Electric pump CUBE 56 K 33

Electric pump CUBE 70 K 33

CUBE PUMPS

Description	Order no.
Pump CUBE 70 MC 50 (picture see page 119), 230 V, approx. 70 L/min (self-priming) with electric flow meter, 50 user codes, automatic nozzle, 4 m dispensing hose installed within a protective box, without suction hose	7853
Pump CUBE 56 K 33, 230 V, approx. 56 L/min (self-priming) with flow meter, automatic nozzle and 4 m dispensing hose DN 19, fitted in a protective housing, without suction hose	7776
Pump CUBE 70 K 33, 230 V, approx. 70 L/min (self-priming) with flow meter, automatic nozzle and 4 m dispensing hose DN 25, fitted in a protective housing, without suction hose	7887

We recommend that **assembly and commissioning be performed by trained service technicians**. We would be delighted to give you details of technicians near you.

ACCESSORIES FOR CUBE PUMPS

Description	Order no.	
 <div>Pedestal for electric pump CUBE, grey</div>	7888	
 <div>Wall-mounting bracket</div>	7889	
 <div>Quick coupling for barrels 2" x 1"</div>	7781	
 <div>PVC suction hose 1.6 m with foot valve and filter (with 1" external thread)</div>	7783	
 <div>Dispensing hose DN25 (with 2 x 1" external thread) diesel biodiesel resistant</div>	4 m	7933
	6 m	7934
	8 m	7935
	10 m	7936

Dispensing hose DN 19 for CUBE 56 pump see page 122.

CEMATIC pumps PG 4

for diesel and biodiesel

Cematic pumps

- self-priming / rotary vane pump
- light and robust construction
- simple handling due to low weight
- with anti-siphon device
- 4 m dispensing hose is standard
- additional hose lengths from 6 to 10 m can be purchased at extra cost
- 2" connector for all commercially available tanks and drums
- connection cable for DC-pumps approx. 4 m long with catch and crocodile clips

All versions include: suction hose, dispensing hose, barrel mounting and angle bracket.

Description	Order no.
 <p>Pump Cematic 56 230 V, approx. 56 L/min (self-priming) with nozzle, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7766
 <p>Pump Cematic 56 AZ 230 V, approx. 56 L/min (self-priming) with automatic nozzle, nozzle holder, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7768
 <p>Pump Cematic 56 K33 AZ 230 V, approx. 56 L/min (self-priming) with flow meter, automatic nozzle, nozzle holder, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7769
 <p>Pump Cematic 3000/12 12 V, approx. 40 L/min (self-priming) with nozzle, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7770
 <p>Pump Cematic 3000/12 K33 AZ 12 V, approx. 40 L/min (self-priming) with K33 flow meter, automatic nozzle, nozzle holder, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7772
 <p>Pump Cematic 3000/24 24 V, approx. 40 L/min (self-priming) with nozzle, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7773
 <p>Pump Cematic 3000/24 AZ 24 V, approx. 40 L/min (self-priming) with automatic nozzle and flow meter, nozzle holder, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels</p>	7774
 <p>Pump Cematic Duo 24/12 AZ, 24 V, approx. 70 L/min (self-priming only for use with 24 V) with automatic nozzle, nozzle holder, 4 m dispensing hose, 1.6 m suction hose with foot valve and 2" quick coupling for barrels (can also be operated at 12 V, in which case, the pump dispensing volume is 35 L/min.)</p>	8053

CEMATIC pumps PG 4 for diesel and biodiesel

Cematic pumps ① ② ③

- self-priming rotary vane pump
- suction height up to 2.5 m
- robust pump housing of cast steel
- Induction motor 230 V AC, protection category IP 55
- suitable for continuous operation, protected against thermal overload
- integral pressure relief bypass valve
- integral suction filter on Cematic 56 + 72
- 1" internal thread connection on suction and pressure sides

Cematic pumps DC ④ ⑤ ⑥

- self-priming rotary vane pump
- suction height up to 2 m
- robust pump housing of cast steel
- brush-type DC motor, protection category IP 55
- duty cycle max. 30 min.
- built-in excess pressure bypass valve

Cematic pumps UM ⑧

- 230 V, approx. 56 L/min
- self-priming
- flow meter
- suction hose
- automatic nozzle and nozzle holder
- 4 m dispensing hose
- mounted complete on a bracket that can be hung on the side of the UNI tank

Description

Order no.

①	Pump Cematic 56, 230 V, 370 W, dispensing volume approx. 56 L/min, delivery pressure approx. 2 bar	8565
	Pump Cematic 72, 230 V, 500 W, dispensing volume approx. 72 L/min, delivery pressure approx. 2 bar	8353
②	Pump Cematic 85, 230 V, 700 W, dispensing volume approx. 90 L/min, delivery pressure approx. 2 bar	10764
③	Pump Cematic 90, 230 V, 750 W, dispensing volume approx. 90 L/min, delivery pressure approx. 1.5 bar	8354
	Pump Cematic Duo, 24/12 V, 420 W, approx. 70/35 L/min, delivery pressure max. 1.5 bar, 1" internal thread connection on both sides, without cable	10148
	4 m cable with 30 A fuse and crocodile clips, for Cematic Duo 12V/24 V	11158
④	Pump Cematic 56, 12 V 300 W, max. 56 L/min, delivery pressure max. 1.5 bar, 1" internal thread connection on both sides, without cable	10548
	4 m cable with 40 A fuse and crocodile clips, for Cematic 56 12 V	91021
	Pump Cematic 3000/12, 12 V, 280 W, approx. 45 L/min, delivery pressure max. 1.5 bar, hosedtail DN 19 suction side, 1" internal thread pressure side	10149
⑤	Pump Cematic 3000/12, 12 V, 280 W, 45 L/min, delivery pressure max. 1.5 bar, 90° bent spout on both sides DN 19, for e.g. DT-Mobil Easy 210 L and 440 L	91208
	Pump Cematic 3000/24, 24 V, 280 W, approx. 45 L/min, delivery pressure max. 1.5 bar, hosedtail DN 19 suction side, 1" internal thread pressure side	10150
	Diesel transfer set Cematic 12/40	
⑥	In practical plastic case, 12 V pump, 4 m cable with battery pole terminals, dispensing volume approx. 30 L/min, 2 m suction hose with foot filter, 4 m dispensing hose, auto nozzle with swivel joint	10492
⑦	Bipump 12 V, max. 85 L/min 500 W, 1" internal threads , 4 m cable with crocodile clips, with switch	11160
⑧	Electric pump Cematic UM	8162

CEMATIC pumps PG 4

for diesel and biodiesel

ACCESSORIES

Description		Order no.
	Self 3000 fuel pump nozzle (connection 1" internal thread)	7780
	A 60 automatic dispensing nozzle with hose swivel joint, max. 60 L/min (1" internal thread connection), design approved in accordance with EN 13012	10028
	A 60 automatic dispensing nozzle with hose swivel joint, max. 60 L/min (1" internal thread connection)	7983
	Automatic dispensing nozzle, swivel joint with DN 19 hoesetail	9705
	Automatic dispensing nozzle A80 fastfill, EN13012, passenger car outlet 24 mm, with 1" internal thread hose swivel joint, 80 L/min	NEW 11910
	A 80 automatic dispensing nozzle, truck outlet, max. 90 L/min, with 1" internal thread hose swivel joint	8355
	A 80 automatic dispensing nozzle, design approved in accordance with EN 13012, truck outlet, max. 90 L/min, with 1" internal thread hose swivel joint	10026
	Pump bracket for fitting Cematic pumps on UNI-/MULTI-tank 750 L and 1000 L	7631
	Quick coupling for drums 2" x 1"(with 1" internal thread)	7781
	K33 flow meter (connection 2 x 1" internal thread) 3-digit tank display	7779
	Add-on kit for retrofitting K33 flow meter on Cematic pumps	7984
	K24 digital flow meter, 10 – 120 L/min, 5-digit individual delivery display, 6-digit total delivery display, inlet 1" external thread, outlet 1" internal thread	8644
	Digital flow meter K24 A, aluminium housing, 7 – 120 L/min, 5-digit display, total volume display 6-digit, 1" external thread, 1" internal thread, bi-directional flow	10157
	1.6 m PVC suction hose with foot valve and filter (with 1" external thread, DN25)	7783
	Dispensing hose DN 19 (with 2 x 1" external thread) diesel resistant	4 m 7899
		6 m 7900
		8 m 7901
		10 m 7902
	Dispensing nozzle holder suitable for 7780, 7258, 7983, etc. for installation on the pump foot or on the wall as required	8566
	O-ring for flange connection, with groove on one sides	10027
	Double O-ring for flange connection, with groove on both sides	8357

Automatic hose reels with spring return PG 4

FOR MOUNTING ON THE WALL, CEILING OR FLOOR

Description	Hose length m	Hose Ø mm	Order no.
Diesel, painted steel plate, with pivot arm			
 Hose reel open, Inlet 1" internal thread, outlet 1" male thread, max. 10 bar, Dimensions 475 x 460 x 246 mm	10	19	10557
Hose reel open, Inlet 1" internal thread, outlet 1" male thread, max. 10 bar, Dimensions 475 x 460 x 246 mm	8	25	8734

 PVC suction hose DN 25, RME-resistant, with plastic helix, sold by the metre	10040
 Dispensing hose DN 19, PU/PVC, sold by the metre	11351
 Dispensing hose DN 25, PU/PVC, sold by the metre	11554
 Hosetail 1" external thread - 19 mm, brass, with O-ring	5522
 Hosetail 1" external thread - 25 mm, brass, with O-ring	10042
 Hose clamp 20 - 32 mm, 9 mm wide, galvanised	7030
 Hose clamp 32 - 50 mm, 9 mm wide, galvanised	10043
 Threaded ferrule compression coupling 1" ET for hose 19/4 mm, reusable	11555
 Threaded ferrule compression coupling 1" ET for hose 25/6 mm, reusable	11556
 Spring-loaded foot valve, brass, with filter, 1" internal thread	10044
 Swivel joint, brass, ¾" external thread, 1" internal thread	11719
 Swivel joint, brass, 1" external thread, 1" internal thread	10155
 Swivel joint 3/4" external thread - DN 19 hosetail, nickel-plated brass, Viton seal	11495

Submersible pump CENTRI SP 80 AC PG 4 for diesel/bio diesel and fuel oil

CEMO submersible pumps: the superior pump principle for your tank system.

Simple, fast and safe.

- running time limitation: automatic switch-off after a preset time
- simple start-up: stands on the tank bottom – no suction height
- submersible centrifugal pump Ø 130 mm, suitable for common tanks and IBCs

- electrical supply 230 V/50 Hz, power 800 W
- high dispensing volume of 80 L/min
- motor thermally protected
- connection 1" internal thread without non-return valve
- connection cable 3 m without plug

Submersible pump CENTRI SP 30 PG 4

- low-cost entry-level solution
- low-wear centrifugal pump
- electric motor 12 V, max. 20 A
- version with power pack for 230 V
- self-priming as submersible pump on container bottom
- user-friendly

- compact, lightweight design
- dispensing volume approx. 30 L/min with automatic dispensing nozzle
- exterior pump dimensions: length 160 mm, dia. 56 mm
- extremely quiet

**Diesel/biodiesel
AUS 32 (AdBlue®)
Fresh water
Antifreeze liquid**

Large splash-proof cord switch

Container opening
from e. g. 2"
BSP and S70 x 6,
Ø 56 mm

Bunghole adapter in NBR rubber

- suitable for 2" BSP and S 70 x 6
- hose and cable continuous, hence infinitely adjustable to any tank height
- simple to change from drum to drum without screws
- anti-kink sleeve for cable and hose
- integrated vent
- hose clamp for fixing

4 m cable with crocodile clips and blade fuse (versions 10488, 10489, 10490)

Cable connection directly on the 230 V power pack (variants 10590, 10591, 10592)

Electric pump CENTRI SP 30 PG 4

Images with optional nozzle holder accessory

ELECTRIC PUMP CENTRI SP 30

Description	Order no.
① Submersible pump CENTRI SP 30, 12 V, max. 18 A, max. 50 L/min, cable length 1.5 m, hose barb DN 19	91000
Submersible pump CENTRI SP 30, 18 V, max. 13 A, max. 50 L/min, cable length 1,2 m, hose barb DN 19, for CAS battery system	91646
PUMP KITS	
② 12 V for AdBlue®, fresh water and antifreeze liquid 4 m cable with switch and crocodile clips, 4 m hose, automatic dispensing nozzle	10488
③ 12 V for diesel, 4 m cable with switch and crocodile clips, 4 m hose, automatic dispensing nozzle	10489
④ 12 V for AdBlue®, diesel, fresh water and antifreeze liquid 4 m cable with switch and crocodile clips, 4 m hose, dispensing nozzle	10490
⑤ 12 V for AdBlue®, fresh water and antifreeze liquid with power pack 230 V, 4 m hose, automatic dispensing nozzle	10590
⑥ 12 V for diesel, with power pack 230 V, 4 m hose, automatic dispensing nozzle	10591
⑦ 12 V for AdBlue®, diesel, fresh water and antifreeze liquid with power pack 230 V, 4 m hose, dispensing nozzle	10592

ACCESSORIES

Description	Order no.
 4 m fly lead with crocodile clips and 25 A fuse	91026
 In-line switch 16 A/250 V, two poles, black plastic	90958
 Li-Power-Block 12.8 V – 3.3 Ah with charger Sufficient for a volume of approx. 300 – 380 litres without idling, depending on the pump, charging time approx. 66 min	10749
 Li-Power-Block 12.8 V – 5.5 Ah with charger Sufficient for a volume of approx. 500 – 630 litres without idling, depending on the pump, charging time approx. 110 min	10750
 Power transformer 230 VAC/13.8 VDC, 20 A, cable 1m	10491
 For AdBlue®: digital flow meter K24, plastic, 6 – 100 L/min, 1" male thread, with two hose connecting pieces and sleeve for mounting at the hose or to the dispensing nozzle	10595
 Trolley for steel and plastic drums 200 L, 2 steering castors and 2 fixed castors, painted steel tube frame, with holder for dispensing nozzle, hose and cable	10607
 Dispensing nozzle holster for drums complete with clamping screws and drip container	11044

AdBlue® is a registered trademark of the German Automotive Industry Association.

Diesel pump CENTRI PG 4 non self-priming

- light and robust construction
- also for continuous operation
- simple handling due to low weight
- 2" connector and M 64 x 4 for all commercially available tanks and drums
- suction hose with foot filter
- integrated hand pump for priming

Submersible pump CENTRI 230 V

Submersible pump CENTRI 12 V with accessory meter K24

Diesel/biodiesel

Antifreeze liquid

Windshield cleaner

ELECTRIC PUMPS CENTRI (EFFECTIVE OUTPUT)

Description	Order no.
 <div> <div>Pump CENTRI, 12 V, approx. 30 L/min effective dispensing volume, 4 m connecting cable with terminals, 6 m hose, dispensing nozzle</div> </div>	8640
 <div> <div>Pump CENTRI, 12 V, approx. 25 L/min effective dispensing volume, 4 m connecting cable with terminals, 6 m hose, automatic dispensing nozzle</div> </div>	8641

 <div> <div>Pump CENTRI, 230 V, approx. 30 L/min effective dispensing volume, 4 m connecting cable, 6 m hose, automatic dispensing nozzle</div> </div>	8639
 <div> <div>K24 digital flow meter can be calibrated, measuring range 10 – 120 L/min, 5-digit display, 6-digit total delivery display, inlet 1" external thread, outlet 1" internal thread, with 1" steel coupling</div> </div>	8644
 <div> <div>Dispensing hose for pump CENTRI, DN 19 other sizes available, price is per metre of hose (The standard hose is still included in the package)</div> </div>	11351

Hand pumps for diesel and lubricants PG 4

- robust construction
- no energy source required
- low-cost
- 2" connector
- suction tube can be shortened as required

Diesel/biodiesel
Lubricants
Windshield cleaner
Fuels

Description	Order no.
① Hand pump with 1.5 m discharge hose with outlet spout DN 19, suction pipe 1450 mm Pumping media: oil up to SAE 50, fuels, undiluted antifreeze, low viscosity mineral oils, heating oil EL/L, diesel, petroleum, biodiesel Dispensing volume: 15 L/min	1452
② Steel drum-pump with spout for drums 60/200/220 L, Telescopic suction pipe 480 – 900 mm Pumping media: oil up to SAE 90, self-lubricating, non-abrasive media, undiluted antifreeze, heating oil, diesel, petroleum Dispensing volume: 15 L/min	7892
③ Hand pump with curved spout and anti-drip nozzle for filling measuring cups, measuring buckets, canisters for drums 60/200/220 L, suction tube 840 mm, quick coupling for drums m 64 x 4 and 2" thread Pumping media: oil up to SAE 90, self-lubricating, non-abrasive media Dispensing volume: 10 L/min	8577
④ Aluminium rotary pump with curved spout 25 mm, for drums 60/200/220 L, threepart suction pipe 950 mm Pumping media: oil up to SAE 90, self-lubricating, non-abrasive media, undiluted antifreeze, heating oil, diesel, petroleum Dispensing volume: 20 L/min	10010
⑤ Aluminium rotary pump with curved spout 25 mm, for drums 60/200 L, three-part suction pipe 950 mm Pumping media: oil up to SAE 90, self-lubricating, non-aggressive media, heating oil, diesel, petroleum Dispensing volume: 25 L/min	11162
⑥ Hand pump with 1.5 m with conductive discharge hose with dispensing spout DN 19, telescopic suction pipe 470 – 925 mm Pumping media: fuels, undiluted antifreeze, low viscosity mineral oils, heating oil EL/L, diesel, petroleum, biodiesel Dispensing volume: 15 L/min	11685

ACCESSORY FOR ALUMINIUM CRANK PUMP

Description	Order no.
 Hose package 2 m, DN 25, with manual nozzle and pipe clamp, compatible with crank pump 10010	10011

Petrol pumps PG 4 for fuels

ATEX/IECEx-certified pump Cematic 50 EX

for flammable liquids

Complete set consisting of:

- pump 230 V, max. 50 L/min, with dispensing nozzle holder
- 2" drum adapter with coarse filter and check valve
- telescopic suction pipe max. 1100 mm
- cartridge filter 30 µm with water separating function
- 4 m dispensing hose, DN 19
- automatic dispensing nozzle with swivel joint

No connector cable is supplied with the pump. The electrical connection must be made by an expert technician after a risk assessment has been made.

Petrol 2-stroke mixture
Avgas | Kerosene

Electric pump Cematic 230/50 EX, flow meter available as accessory

Petrol pump Cematic 12/25 EX PG 4 for flammable liquids

- vane pump, 12 V, max. 25 L/min
- suction and pressure connection ¾" internal thread
- motor thermally protected

- Ex dbh II A T4 Gb
- dry self-priming, max. 2 m
- 5 m cable with crocodile clips and cable switch

ATEX/CE-certified pump Cematic 12/30 EX

for flammable liquids

- pump 12 V, approx. 30 L/min
- suction and pressure connection can be mounted on side or top
- compact design with carry handle
- thermally protected
- dry, self-priming, max. 1.5 m

Electric pump
Cematic 12/30 EX

Petrol transfer set Cematic 12/30 EX in practical plastic case

PETROL PUMPS CEMATIC EX

Description	Dispensing volume L/min	Pressure (max) in bar	Order no.
Cematic 230/50 EX, complete. ATEX, 230 V, filter, 4 m dispensing hose, automatic dispensing nozzle	40	1.1	10249
Cematic 12/30 EX, 12 V, 14 A, 220 W, 4.1 m cable with crocodile clips and earthing cable with crocodile clips, connection of both sides ¾"	30	1.1	10647
Petrol transfer set Cematic 12/30 EX In practical plastic case, 12 V pump, 4.1 m cable with battery pole terminals and earthing terminal, dispensing volume approx. 25 L/min, 2 m suction hose with foot filter, 4 m dispensing hose, manual nozzle with swivel joint	25	1.1	10730
Cematic 12/25 EX, 12 V	25	0.7	11645
Cematic 230/50 EX, 230 V 50 / 60 Hz (pump only)	50	1.1	11646

Petrol pumps PG 4

Accessories for petrol pumps Cematic EX

Description	Order no.
 K33 flow meter, upward flow, 20 – 120 L/min, ATEX	10236
 Retrofit kit for K33 ATEX flow meter, on Cematic 50 EX, Viton O-rings, flange	10410
 Digital flow meter K24 A ATEX/IECEX; II 2 G Ex ia IIB T4 Gb, aluminium housing, 7 – 120 L/min, 5-digit display, 6-digit total quantity display, 1" outer thread, 1" inner thread	10411
 Manual dispensing valve for fuels, outlet diameter 20 mm, with swivel joint 1" IT	90506
 Automatic nozzle for petrol, EN13012, ATEX, with swivel joint 1" internal thread	10142
 4 m dispensing hose, DN 19, 1" external thread, electrically conductive, antistatic	10263
LC-Mix fuel hose, dia. = 19 mm, electrically conductive R < 10 MOhm	10731
 Cable gland 1/2" NPT for cable 7 – 12 mm, to Cematic 50 EX	10264
Connector cable, 3 x 2.5 mm ² , sold by the metre	10265
 Reducer 3/4" external thread x 1" internal thread	10659
Suction hose 3/4", conductive, sold by the metre	10660
 Plastic foot filter, hose connector 3/4"	10661
 Automatic rewind hose reel, open, for petrol, with swivel bracket/ Inlet 1" internal thread, outlet 1" external thread, max. 15 bar, hose 10 m DN 19 antistatic, dimensions 495 x 460 x 246 mm	11041
 Automatic rewind cable reel, with 16 m earth cable 10 mm ² green/yellow, earthing clamp, feeder cable 1 m with open end	11042

Motorised pumps with petrol engine PG 8

Water

Motorised pump 500 L/min

with Honda petrol engine

- pump permanently installed
- 2" suction and pressure port
- DN 50 hose connections
- suction strainer
- max. 3 bar

Motorised pump with Honda petrol engine

- dispensing volume approx. 130 L/min
- pump capacity up to 3.5 bar
- 1" suction and pressure port
- DN 25 hose connections
- suction strainer

Motorised pump 500 L/min with Honda petrol engine

Motorised pump 130 L/min with Honda petrol engine

Description	Dimensions cm (l x w x h)	Order no.
① Motorised pump with Honda petrol engine, dispensing volume approx. 500 L/min	47 x 35 x 39	8337
② Motorised pump with Honda petrol engine, dispensing volume approx. 130 L/min	33 x 25 x 40	8348

Lubricant pumps PG 4

Lubricants

Vegetable oil

Lubricant pump
Viscomat 70 and Viscomat 90

- rotary vane pump, thus high delivery volume flow at high pressure
- die cast aluminium pump body
- sintered steel rotor with resin vanes
- seal on the rotary shaft with access from the pump side
- bypass line integrated into the pump body
- suitable for oils up to 500 cSt, corresponding to approx. SAE 90 at 20 °C
- also suitable for vegetable oils e.g. cold pressed rape seed oil

Lubricant pump Viscomat 70 + 90

LUBRICANT AND VEGETABLE OIL PUMP VISCOMAT 70 AND VISCOMAT 90

Description	Dispensing volume L/min	Pressure (max) in bar	Order no.
Lubricant pump Viscomat 70, 230 V, self-priming, 750 W, 1" internal thread connection on both sides, without accessories	25	6	8727
① Viscomat 90, 230 V, self-priming, 1600 W, 2 m cable with connector, fixed bypass, 1" internal thread connection on both sides, without accessories	50	5	8070
Viscomat 90, 400 V, self-priming 2000 W, connection socket, adjustable bypass, 1" internal thread connection on both sides, without accessories	50	5	7985
Lubricant pump Viscomat 70, 230 V, self-priming, with nozzle, 4 m pressure hose, 1.6 m suction hose 1" with foot valve and quick coupling for drums	25	6	7928
② Lubricant pump Viscomat 70 K33, 230 V, self-priming, with nozzle, flow meter K33, 4 m pressure hose, 1.6 m suction hose 1", with foot valve, quick coupling for drums	25	6	7929

ACCESSORIES FOR VISCOMAT 70 + VISCOMAT 90

Description		Order no.
	Self 3000 nozzle (connection 1" internal thread)	7780
	Quick coupling for drums 2" x 1"(with 1" internal thread)	7781
	1.6 m PVC suction hose with foot valve and filter, DN 19, 1" external thread	7783
	Mechanical flow meter K33 Oil, 20 – 120 L/min, 3-digit display, 1" internal thread on both sides	8728
		4 m 7933
		6 m 7934
		8 m 7935
		10 m 7936

Lubricant pumps PG 4

Lubricant pump Viscomat 200/2

- gear pump design, thus high dispensing volume at high pressures, no pulsation, uniform flow
- die cast aluminium pump body
- sintered steel gears, with a specially designed internal profile
- mechanical seal on the engine shaft, accessible from the pump side
- bypass line integrated into the pump body
- suitable for oils up to 2000 cSt, corresponding to approx. SAE 140 at 20 °C

The pump principle:
gear pump design

Lubricant pump Visco-Flowmat 200/2

- like Viscomat 200/2, but with pressure switch
- pump switches on automatically when the nozzle is opened
- after delivery the pump continues to run for a few seconds to refill. Afterward it shuts off automatically.

LUBRICANT PUMPS VISCOMAT 200/2 AND VISCO-FLOWMAT

Description	Dispensing volume L/min	Pressure (max) / bar	Order no.
Lubricant pump Viscomat 200/2, 230 V, self-priming, with nozzle, 4 m pressure hose 1/2", 1.6 m suction hose 1" with foot valve and quick coupling for drums	9	12	7896
① Lubricant pump Viscomat 200/2 K400, 230 V, self-priming, with nozzle, flow meter K400, 4 m pressure hose 1/2", 1.6 m suction hose 1", with foot valve and quick coupling for drums	9	12	7897
② Lubricant pump Viscomat 200/2 230 V, 800 W, 1" internal thread connection on both sides, without accessories	9	12	8571
③ Lubricant pump Visco-Flowmat 200/2 with pressure switch, 230 V, 800 W, 1" internal thread connection on both sides, without accessories	9	12	8572

Compressed air diaphragm pump PG 4

- max. 60 L/min, self-priming
- aluminium housing and motor, NBR membrane
- inlet 3/4" IT, outlet 1/2" IT
- temperature range - 20 °C to + 90 °C (or briefly + 120 °C)
- particles up to 1.5 mm permissible
- max. 8 bar, air consumption 600 L/min
- explosion-proof (equipotential bonding on site)
- accessories, other versions and sizes on request

Waste oil
Lubricants
Antifreeze liquid
Windshield cleaner
Dirty water

Description	Order no.
Compressed air diaphragm pump, max. 60 L/min	10176

Lubricant pumps PG 4

ACCESSORIES FOR LUBRICANT PUMPS VISCOMAT 200/2, VISCO-FLOWMAT AND VISCOAIR

Description	Order no.
	Pressure hose ½" for oil, 2 m, both ends ½" inner thread, with union nuts
	10697
	Pressure hose ½" for oil, 4 m, both ends ½" outer thread
	8608
	Pressure hose ½" for oil, 6 m, one end ½" external thread, other end union nut and ½" double male connector
	8351
	Pressure hose ½" for oil, 10 m, one end ½" external thread, other end union nut and ½" double male connector
	8352
	Quick coupling for drums 2" x 1" (with 1" internal thread)
	7781
	1.6 m PVC suction hose with foot valve and filter, DN25, 1" external thread
	7783
	Oil dispensing nozzle with ½" swivel joint, fixed outlet with anti-drip nozzle. The K400 meter can be integrated between the handle and outlet.
	8573
	Electronic K400 meter, oval wheel principle, 1 – 30 L/min, ½" inner thread, max. 70 bar, fits equipment including nozzle 8573
	8574
	Oil dispensing nozzle K500, with electronic meter, ½" inner thread connection with swivel joint, 2-fold adjustable angle outlet with anti-drip nozzle, 1 – 30 L/min, max. 70 bar, with quantity pre-setting from 0.1 – 99.9 L. When the preset quantity is reached, the nozzle shuts off automatically.
	8576
	Steel telescopic suction pipe, 1" male thread max. 1,100 mm
	10748
	Suction pipe and hose set for drums 200 L, incl. wall bracket
	10698
	Nozzle holster with drip tray
	10696

Pump systems for AdBlue® PG 4
Compact refuelling systems for AdBlue®

AUS32 (AdBlue®)

- Low-cost entry-level solution
- self-priming as submersible pump on container bottom
 - electric pump approx. 25 L/min
 - external pump dimensions: length 160 mm, dia. 56 mm
 - extremely quiet

CENTRI SP 30
EXTREMELY QUIET

Bluetroll Mobile 12 V
Battery not included.

Cost-effective entry-level solutions for drums including 12 V submersible pump CENTRI SP 30 and trolley see on page 126.

Description	Order no.
① Pump set CENTRI SP 30 12 V, with power pack for 230 V, 4 m hose, automatic nozzle	10590
② Pump set CENTRI SP 30 with 4 m cable and battery crocodile clips, 4 m hose, automatic nozzle. With transport trolley for drums.	10781

Drum pump ECO-1 for AdBlue® PG 4
COMPLETE PUMP SET ECO-1 FOR AdBlue®

- Pump kit ECO-1 for AdBlue®**
- motor 230 V
 - variable dispensing volume, 6 speeds can be selected
 - sealless pump unit
 - with bung adapter S 70 x 6
 - 4 m filler hose

Accessory: digital flow meter K 24

Drum pump set ECO-1 with manual nozzle

Drum pump set ECO-1 with automatic nozzle

Description	Order no.
① Drum pump set ECO-1 with manual nozzle, max. 80 L/min	10869
② Drum pump set ECO-1 with automatic nozzle, max. 35 L/min	10870

ACCESSORIES

Description	Order no.
③ K24 electronic flow meter, with attachment screws and hose connector DN 19	10871

CEMO Cematic Blue pump systems PG 4

Compact refuelling systems for AdBlue®

AUS32 (AdBlue®)

- high-quality diaphragm pump made of plastic, delivery rate approx. 30 L/min supply voltage 230 VAC
- pump self-priming
- dispensing hose 6 m
- automatic nozzle, plastic

Accessory:
long life 3D filter

Optional flow meter, see accessories

Accessory: 3-piece suction pipe with coupling AF2

Accessory: digital flow meter K 24

Accessory: 2-piece suction pipe for IBC and 220 L tanks

Accessory: coupling SEC

Drum not included in the system.

Description	Order no.
① Cematic Blue pump system BASIC auto nozzle, with universal bracket for IBCs as described above, suction hose 1.5 m with SEC coupling	10215
② Cematic Blue pump system for drums 220 L as described above, suction hose 0.5 m with AF2 coupling and adapted suction pipe	10276
③ Bluetroll Mobile, mobile tank system for drums, consisting of a painted chassis, with steering and fixed castors and the Cematic Blue pump system BASIC AZV and adapted suction pipe	10277

ACCESSORIES FOR CEMATIC PUMP SYSTEMS

Description	Order no.
④ AdBlue® long life 3D filter, replaceable cartridge, suitable for electric pump Cematic Blue and crank pump for AdBlue®	10782
Replaceable cartridge for AdBlue® 3D filter, 70 µm	11915
⑤ 3-piece suction pipe with coupling AF2, S 70 x 6 thread, external thread DN 19	10872
3-piece suction pipe with coupling AF2, 2" BSP thread, external thread DN 19	11063
⑥ Digital flow meter K24, plastic, 6 – 100 L/min, 1" internal thread, 90° elbow for direct attachment to the pump	10274
⑦ 2-piece suction pipe for IBC and 220 L tanks (can be shortened), suitable for SEC and CDS coupling, S 56 x 4 thread	10201
⑧ SEC coupling with elbow hoesetail DN 19	10256

Electric drum and IBC pumps PG 4

for liquid chemicals

Complete pump sets for your liquid chemicals

- motor, 230 VAC
- ex-rated version available
- sealless pump unit with sturdy 8 mm driveshaft without guide tube
- robust, no dead space, easy to clean
- brief running on empty possible
- quick-lock coupling for super-fast connection with robust gear coupling, insensitive to soiling and aggressive environments
- contained in each set:
PP drum adapter, 2" outer thread and wall bracket for storage

① Basic set, for occasional use, can be used for diluted acids and lyes

② Allround set, for regular use, can be used for concentrated acids and lyes

③ Chemical set, for professional use, can be used for aggressive liquids

④ Ex-klusiv set, can be used for solvents and highly flammable liquids

Wall bracket

Drum adapter made from PP, 2" outer thread

ELECTRIC DRUM AND IBC PUMPS

Pumps PG 4 for chemicals

Electric pump Cematic Blue

- or AUS 32 (AdBlue®), antifreeze fluid and windshield cleaner with flash point > 55 °C
- self-priming plastic diaphragm pump
- 1" external thread connection on both sides incl. DN19 hose connecting pieces with union nut
- OFF/ON switch
- can be installed in any orientation

Cematic Blue 230 V

Cematic Blue 12 V + 24 V

ELECTRIC PUMPS CEMATIC BLUE

Description	Dispensing volume L/min	Pressure (max) in bar	Order no.
Electric pump Cematic Blue ① self-priming plastic diaphragm pump, 230 V, 370 W, 2800 rpm, 2 m cable with Schuko plug	35	1.5	8730
Electric pump Cematic Blue ② self-priming plastic diaphragm pump, 12 V, 280 W, 2 m connecting cable with crocodile clips	35	1.5	10152
Electric pump Cematic Blue self-priming plastic diaphragm pump, 24 V, 280 W, 2 m connecting cable with crocodile clips	35	1.5	10153

ACCESSORIES FOR ELECTRIC PUMPS CEMATIC BLUE

Description	Order no.
 DN19 hosetail with 1" IT union nut with locknut	8731
 90° elbow with union nuts for K24 flow meter	8732
 Connecting piece, straight with union nuts for K24 flow meter	8733
 DN19 hosetail, 90° elbow with union nut	8611

For other accessories such as hoses and meters, see pages 104.

Submersible pump Squalo 35

- submersible centrifugal pump ø 140 mm, suitable for common tanks and IBCs
- 230 V, 370 W
- Innovative pressure regulation system. Almost constant pressure and flow over the entire operating range.
- 1" connection with internal thread, with non-return valve
- 5 m connection cable without plug

AUS32 (AdBlue®)
Water

SUBMERSIBLE PUMP SQUALO 35

Description	Dispensing volume L/min	Pressure (max) in bar	Order no.
Submersible pump Squalo 35, 230 V/50 Hz, with timer ca. 11 min	35	2.0	11255

Hand pumps PG 4 for chemicals

Please read the datasheet for the chemical resistance of the medium to be conveyed, and decide for yourself on the basis of our material specification list!

Hand pumps for chemicals

- material: plastic, polypropylene and polyethylene
- food-safe
- double-action
- outlet tubes suitable for connecting a hose DN25
- suitable for propionic acids, molasses, detergent, lubricants, AdBlue®, liquid fertilisers, liquid feeds, pesticides, etc.
- not suitable for highly flammable substances and strong solvents

Chemicals
AUS32 (AdBlue®)

HAND PUMPS FOR CHEMICALS

Description	Dispensing volume L/min	Order no.
① Hand pump for canisters up to 30 L, inclusive of adapter C57 and C63, tube diameter 41 mm, max. immersion depth 420 mm	0.16	10054
② Hand pump for drums up to 220 L, inclusive of adapter S70x6, S56x4 and 2" BSP tube diameter 41 mm, max. immersion depth 930 mm	0.4	10055
③ Hand pump for IBC 1000 L, inclusive of adapter S56x4 and 2" BSP, tube diameter 41 mm, max. immersion depth 1185 mm, output connection 20 mm	0.4	10273

Rotary hand pump for AUS 32 (AdBlue®)

- solid construction for professional operation
- housing in stainless steel and technopolymer
- drum adapter with connection thread S56x4
- multi-part suction pipe 1 m, can be shortened as required
- PVC dispensing hose 3 m
- stainless steel outlet pipe 19 mm with protective cap

CRANK PUMP FOR AUS 32 (ADBLUE®) ANTI-FREEZE, WATER

Description	Dispensing volume L/min	Order no.
④ Crank pump for AdBlue® with PVC hose 3 m	25	10517
⑤ Crank pump for AdBlue® with PVC hose 3 m, mounting plate for IBC suction hose 1.5 m. For accessories see page 100	25	11163
 Accessory: plastic manual dispensing nozzle, with lever lock, polypropylene (PP) body, stainless steel valve, Viton gaskets, connection hosetail DN 19, stainless steel spout 19 mm	max. 80	8333
 Accessory: plastic manual dispensing nozzle, housing PA6, stainless steel, Viton gaskets, connection nozzle DN 19, outlet 19 mm, with lever lock	max. 80	11033

STORAGE OF HAZARDOUS SUBSTANCES

BATTERY SAFETY

Practical tip:
Charge and store lithium
batteries separately

The basics of hazardous material storage

When storing hazardous materials, various basic legal conditions must be observed. The essential relevant information is presented below.

Cause for concern principle:

Water is the most important foundation for life and is irreplaceable. This fact has always been true, and endangering the water supply is a threat to our future. This is why the so-called “cause for concern principle” is central to the (German federal) Water Resources Management Act. In the words of a lawyer: “Cause for concern exists not only when a harmful event is likely to occur but even as soon as a harmful event is not unlikely to occur.”

- ✓ Determine your water hazard class
- ✓ Note the classification of flammable liquids (see table on right)
- ✓ Observe the legal requirements
- ✓ Ensure that your collection trays are positioned correctly
- ✓ Check that your tray is made from a material that is resistant to the media held in it

Examples

Examples	WGK	GHS
Alcohol (ethanol), acetone	1	extremely flammable
Anti-freeze for radiators (glycol)	1	not flammable
AdBlue®	1	not flammable
Diesel fuel/heating oil	2	liquid with flash point > 55 resp. 60 °C
Normal petrol	3	highly flammable
Unused lubrication oils	2	not flammable
Old oil (known origin)*	3	liquid with flash point > 55 resp. 60 °C
Old oil (unknown origin)*	3	highly flammable
Coolant lubrication emulsion	3	not flammable
CKW (Tri, Per, etc.)	3	not flammable

WGK

GHS

The ABCs of hazardous materials

WATER POLLUTING CLASSES (WGK)

The German Water Management Act (WHG) sets out substances that are hazardous to water and how to handle them. According to an ordinance (AwSV) under the WHG, system operators are obliged to classify the substances and mixtures they use into one of three water pollution classes (WGK), for the purposes of handling these substances hazardous to water:

- WGK 3** Highly water-hazardous substances, e.g. petrolused oil, halogenated solvents
- WGK 2** Distinctly water-hazardous substances, e.g. diesel, lubricating oil, toluene
- WGK 1** Low water-hazardous substances, e.g. rapeseed methyl ester, AdBlue®, acetic acid

The classification is generally carried out by the manufacturer or distributing company. Operators can find the information on the water pollution classes in the safety data sheets of the products they use. The law does not prescribe a WGK label on the container packaging.

If you mix substances to create a mixture that is not yet classified, you must do so yourself in accordance with the AwSV (see AwSV appendix 1). There are rules concerning mixtures that can be used to derive the WGK of a mixture from the WGKs of the constituent substances. Available toxicity data may also be used in certain cases. **Document the self-classification carefully** (see AwSV appendix 2). The substance lists of hundreds of substances that have already been classified in the annexes of the now obsolete VwVwS provide a brief guide.

CLASSIFICATION OF FLAMMABLE LIQUIDS

After the German Ordinance on Industrial Safety (BetrSichV) replaced the previously valid ordinance on flammable liquids (VbF), the Technical Regulations for Handling Flammable Liquids (TRbF) ceased to be in force at the start of 2013. They were replaced with the Technical Regulations for Industrial Safety (TRBS) and the Technical Regulations for Hazardous Substances (TRGS). One particularly important element is TRGS 510 "Storage of hazardous substances in mobile containers", which substantiates the requirements of the Hazardous Materials Act, such as those concerning responsibilities, certifications, hazard assessments, operating instructions and briefings, warehouse configuration, transport routes, etc. The VbF also ended the classification of flammable liquids into the previous hazard classes A I to A III and B. Flammable liquids used to be classified according to the Hazardous Materials Act (GefStoffV) as follows:

- Extremely flammable (flash point < 0 °C)**
- Highly flammable (flash point < 21 °C)**
- Flammable (flash point 21 – 55 °C)**
- Liquids with a flash point > 55 °C**

Today, the GHS provides the following categories (see table for examples):

Extremely flammable liquids H224

Flashpoint < 23 °C

Boiling point ≤ 35 °C

Highly flammable liquids H225

Flashpoint < 23 °C

Boiling point > 35 °C

Flammable liquids H226

Flashpoint 23 °C – 60 °C

Liquids with a flash point above 100 °C are not considered flammable, e.g. lubrication oil.

Important note:

Since February 2021 the new TRGS 510 is valid and contains some changes! We will be happy to advise you.

Important legal provisions

- Water Resources Management Act (WHG)
- State Water Resources Management Act (LWG)
- Ordinance on installations handling water polluting substances (AwSV)
- Technical Regulations for Industrial Safety (TRBS)
- Technical Regulations for Hazardous Substances (TRGS)
- Health And Safety At Work Act (BetrSichV)
- Ordinance on Hazardous Substances (GefStoffV)
- European Agreement Concerning the International Carriage of Dangerous Goods by Road (ADR)
- GHS Globally Harmonized System of Classification and Labelling of Chemicals

We will be happy to advise you on this topic.

Collection volumes

General rule: The collection tray must be able to hold at least 10 % of the total storage volume or the contents of the largest container stored above it. The tray volume must therefore be equal to the largest of these two volumes. Special rules apply in water protection areas where it is necessary to guarantee a 100 % capture volume for the media stored.

Material resistance

Selection of tray material is dependent on the media stored. In most cases, the high resistance properties of GRP (see page 147) make it a suitable choice.

Certifications

According to the WHG, tanks and collection trays used for the storage of substances that are hazardous to water require a certificate of usability issued by the construction inspection authorities, e.g. a general construction inspection certification.

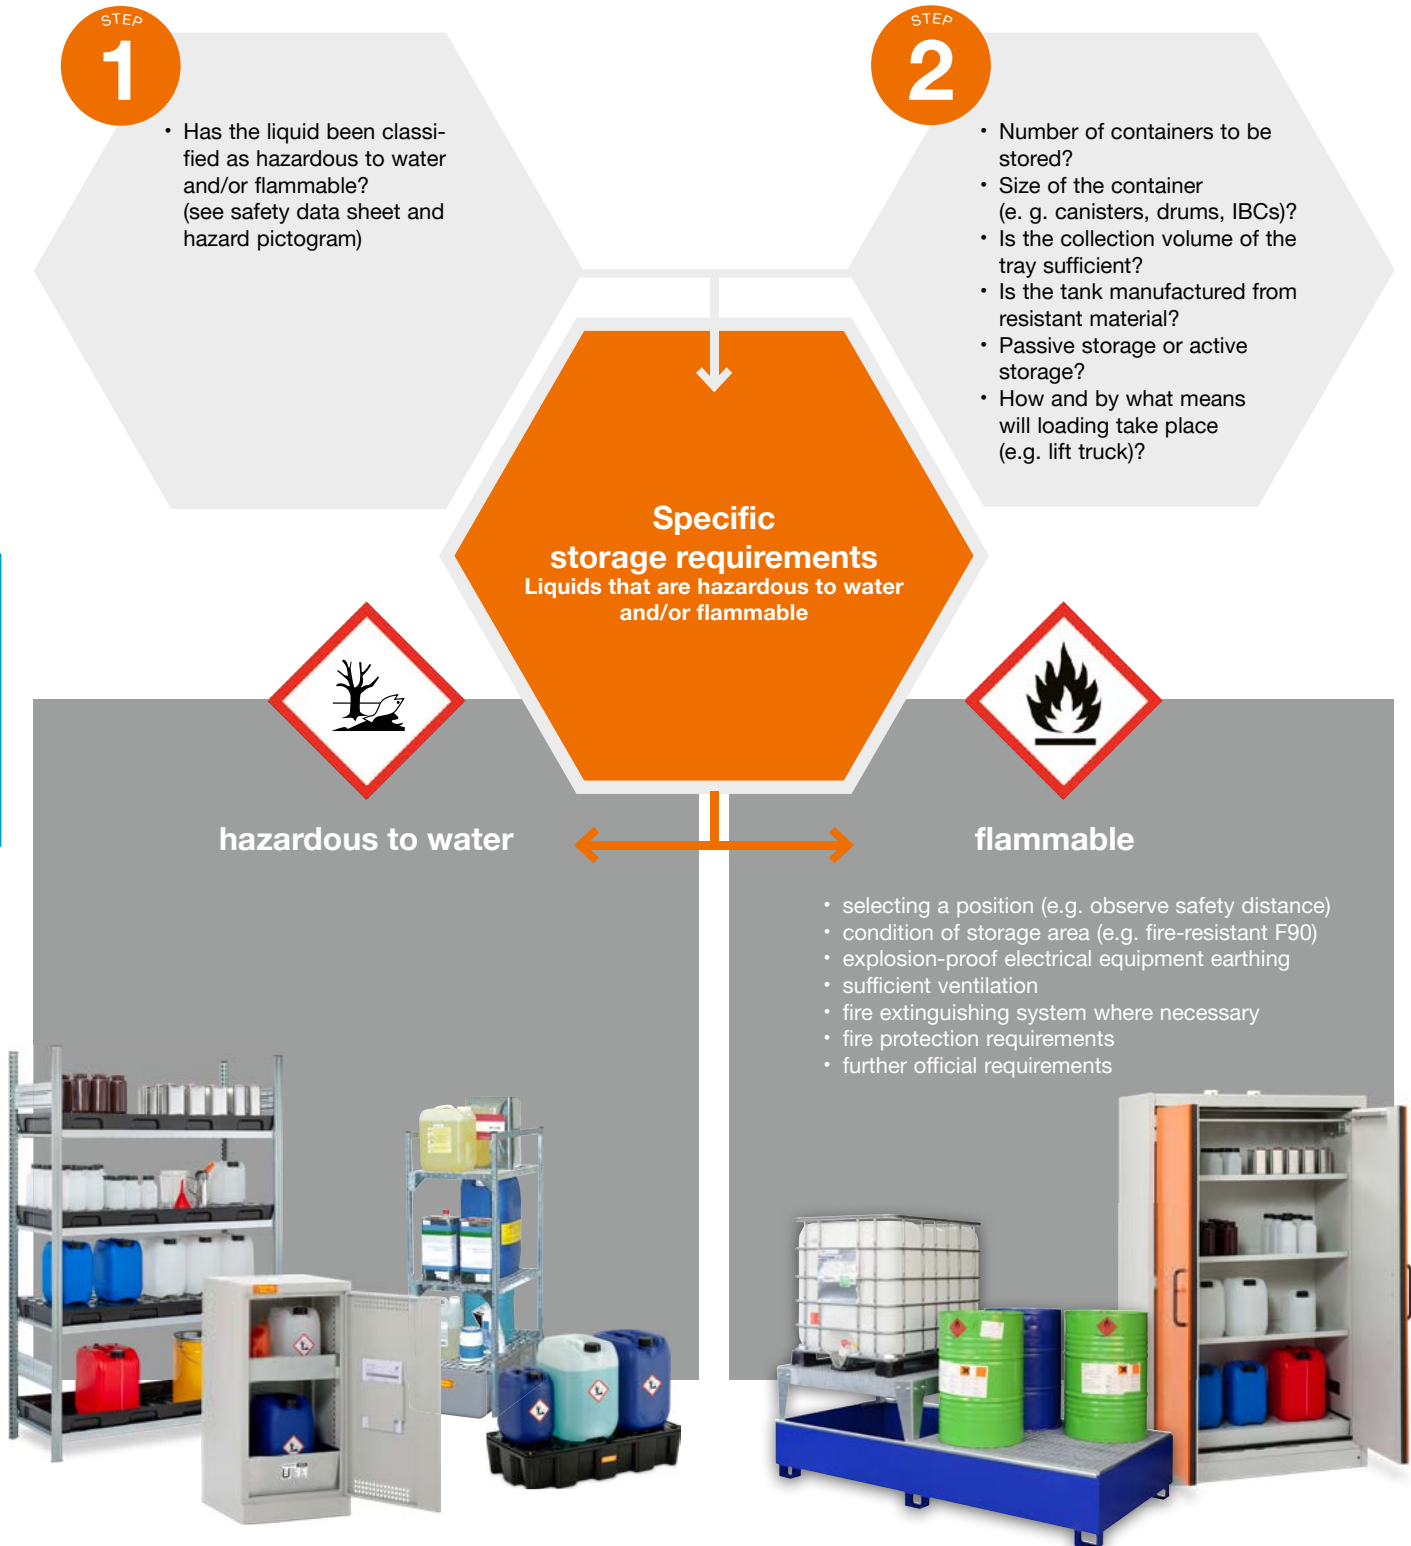

TIP:

A certified collection tray is not required for a total storage volume of < 220 L of liquid, water-hazardous substances.

Guidance for the storage of hazardous materials

The following questions should be addressed prior to purchase:

(Here using the example of the most frequently encountered hazard categories “hazardous to water” & “flammable”)

Collection trays

Collection trays in comparison

Characteristic	GRP	PE	steel
CORROSION RESISTANCE			
Trays must remain impervious to liquids during their entire service life.	No corrosion across entire service life.	No corrosion across entire service life.	Susceptible to corrosion: check regularly.
COMPULSORY CHECKS OF THE TRAY BASE			
The underside of the collection tray and the grating must be visually inspected every two years. The result must be recorded and presented to the responsible water authorities upon request.	No compulsory check, as material does not corrode.	No compulsory check, as material does not corrode.	Susceptible to corrosion: regular checking and recording compulsory.
CLEANING THE INSIDE OF THE TRAY			
The operator must carry out a visual inspection at least once a week to see whether any liquid has leaked out of the containers. Any liquid that has leaked out must be removed immediately.	Smooth inner surfaces make it easy to clean the tray if necessary.	Required reinforcements make cleaning harder.	Smooth inner surfaces enable simple cleaning.
TRAY STRENGTH			
The tray wall thickness must be such that the walls absorb the forces acting upon them. The trays may only be placed on suitable surfaces.	The material structure allows both high strength and low wall thickness.	High wall thicknesses and reinforcements are necessary for strength.	Required minimum wall thickness 3 mm.
TRAY HANDLING			
The handling characteristics depend heavily on the weight of the trays.	Low weight achieved through relatively low material thicknesses.	Higher material thicknesses have a negative effect on the tray weight.	Highest weight results in difficult handling, e.g. when checking the tray base.
TRAY MATERIAL DURABILITY			
The prescribed requirements for the trays remain fully valid across the entire service life.	The material characteristic does not change throughout the entire service life.	Strength is reduced as a result of the natural ageing process.	Corrosion impairs the required impermeability over a longer period.
CEMO recommendation for tray material:	Diesel, fresh and used oils, weak lyes and acids	Lyes and acids	Petrol, highly flammable liquids

Comparison of the suitability of sump/spill pallets made from different materials (confirmed by independent experts) used with various media typical in industrial concerns and workshops

Media stored	Waste oil of known origin (flammable, flash point > 55 °C)	Heating oil and diesel (flammable, flash point > 55 °C)	Petrol, nitro (extremely flammable, highly flammable, flammable)*	Lyes up to pH 8	Lyes over pH 8	Acids up to 10 % salt solutions pH 6-8 fixing baths	Acids up to 20 % battery acid 37%
Tray material

* Special storage location requirements are to be observed. (fire protection, explosion protection).

GRP sumps / spill pallets

GRP SUMPS ARE IDEAL FOR THE STORAGE OF ENVIRONMENTALLY HAZARDOUS SUBSTANCES.

GRP is a universally applicable material for the storage of environmentally hazardous substances. The thermosetting plastic base structure in conjunction with the glass fibre

reinforcement provide an advantageous fire performance and high chemical resistance. GRP sumps combine the properties of steel and plastic. Due to their absolute corrosion

resistance, GRP sumps can be placed directly on the ground. The low installation height facilitates easy handling in factories and workshops.

**EXTREMELY FAVOURABLE
PRICE/PERFORMANCE RATIO**

universal application
e.g. waste oil, lyes and acids

absolutely corrosion-resistant
(no welding seams)

low installation height, because no
ground clearances are required
(compare steel sumps/spill pallets)

smooth inner walls
ensure simple cleaning

minimal inspection requirements,
no additional inspection of
sump floor (compared to steel
sump/spill pallets)

Example:
GRP sump 220/2

Our PREMIUM product line GRP

Due to the excellent material properties created by reinforcing the three-dimensionally meshed duroplastic material with glass fibres, GRP has been used for decades to make high-performance products that are expected to have a long service life in tough environments and at the same time ensure high levels of safety.

GRP combines the positive properties of steel and plastic.

GRP sumps PG 9

GRP sumps with general construction inspection certification no. Z-40.12-227

- for the storage of products with high risk of water pollution

Mobile sump/spill pallets from GRP

- hot-dip galvanised grating
- hot-dip galvanised chassis with collision protection
- 2 steering and 2 fixed castors (castors dia. 12.5 cm) as well as a handle for trouble-free steering

PE sump/spill pallets

PE SUMP/SPILL PALLETS WITH AN IDEAL PRICE/PERFORMANCE RATIO

CEMO always offers a suitable solution when it comes to collecting water-polluting substances. Environmentally compatible, proper and safe storage of hazardous materials is important for every company.

Caustic or toxic substances require special care during handling and storage. For purposes of protection and a clean environment, we have developed a range of PE sump/spill pallets which offer great functionality and high resistance against

acids and lyes thanks to the wide choice of options OR various options which ensures an ideal price/performance ratio for you.

- ✓ high chemical resistance
- ✓ great functionality

various options:
with fixing pins,
feet, skids or castors

the tray can be placed directly
on the floor or a Euro pallet

Example: suitable
for Euro pallets

PE small container and rack trays

PE sump/spill pallet 120 x 80 mm
with a collection volume of 220 L

PE filling station
with a collection volume of 450 L

Euro PE sump/spill pallet 250/2 PG 9

Euro PE sump/spill pallet 250/2 with general construction inspection certification no. Z-40.22-420

- manufactured from high quality polyethylene (HDPE)
- high chemical resistance
- collection capacity without grating 250 L, with grating 224 L

- for storing drums up to 224 L
- high functionality
- tray can be positioned directly on the floor or on a Euro-pallet
- versions with locking pins (for Euro-pallets), feet, runners or castors

Euro PE sump/spill pallet 250/2 – RG without certification no.

- manufactured from high quality recycled polyethylene
- suitable as a collection tray for materials not hazardous to water or for uses for which no certification is required

★ Accessories see page 153

With 4 feet and PE grating

Integrated recessed handles for easy lifting

With 2 runners and steel grating

With steering castors

PE pallet sumps and PE drum bunds

The new generation of CEMO PE pallet sumps and PE drum bunds has arrived. The polyethylene (PE) sumps and bunds are highly resistant to chemicals. Thanks to the different sizes and versions, we have a solution for almost any application.

PE pallet sumps

- Matched to the size of a Euro pallet (120 x 80 cm) or an industrial pallet (120 x 120 cm).
- You can place the transport pallet directly on the bund or use a steel or PE grating as the deck surface.

Small PE container / laboratory trays ^{HD} PG 9

HD = HIGH DENSITY

Small PE container/laboratory trays with general construction inspection certification Z-40.22-548 and Z-40.22-549

- small container/laboratory trays in polyethylene
- fully recyclable
- can be used with/without perforated grating
- stackable for space-saving storage/transport
- non-slip grating surface
- low maintenance
- designed for Euro-pallets
- trays can be connected to form a surface protection system, see p. 168

PE Container/laboratory trays – RG without certification no.

- manufactured from high quality recycled polyethylene
- suitable as a collection tray for materials not hazardous to water or for when no certification is required

PE sump/spill pallet 25^{HD} with and without PE grating

PE sump/spill pallet 30^{HD} with and without PE grating

PE sump/spill pallet 60^{HD} with PE grating

PE sump/spill pallet 120^{HD} with PE grating

A significant plus in safety in the daily handling of hazardous liquids: the visual leakage indicator
If liquid has flowed unnoticed into the drip tray, then the visual leakage indicator free floats and becomes visible.

Folding tray 8/12 PG 9

This flexible, flat PVC tarpaulin can quickly and easily be turned into a resistant collection tray; it can be used as an emergency tray or as a transport and consignment container that can protect people and the environment against water-polluting liquids.

- multi-function container tray
- flexible collecting tray, extremely adaptable to different spaces
- built-in contents gauge
- space-saving when folded up
- ready for use in seconds
- impervious to liquid
- easy forklift access when empty
- resistant to oils, chemicals and technical fluids
- material: PES, surface-coated with PVC on both sides, blue

Steel sump/spill pallets

SPILL PALLETS OFFERING EXCELLENT VALUE FOR MONEY

In the early days of the Environmental Protection Industry, spill pallets/sumps were made of steel. This material offers strength, rigidity and endurance. In the arena of professional manufacturing in a regulated industry, steel sumps emerged as a high-quality, premium sump for

hazardous materials. Before leaving the factory, every sump is tested for being leak-proof.

Companies should only implement products that conform to Water Resources Act standards, and have recognised certification.

All CEMO's steel bunds have the StawaR certification and are allowed to display the Ü mark.

IBC bunds

Designed for the storage of large containers such as KTC/IBC, ASF and ASP containers up to 1,000 litres.

Spill pallets

Our spill pallets come in various sizes and are available with or without hot-dip galvanised, removable grating (required for flammable liquids).

Forklift accessible for assembly and transport

Type SW2
galvanised without
grating

Example application:
Filling from a 60 litre drum.
Spill pallet in combination
with filling stand

Practical tip:

As a rule, CEMO generally recommends using spill pallets with galvanised grating. This provides the clear advantage of a level storage area for ease of loading and unloading. In addition, the full legally required collection volume is not reduced by drums placed directly in the spill pallet and therefore, the spill pallet will not overflow if the drums should leak.

Safety information:

When storing flammable liquids, please note that the German technical regulation TRGS 510 defines special fire protection and explosion prevention requirements applicable above a specific volume. These requirements can be met in practice by maintaining safety distances, earthing equipment and suitable storage spaces such as F90 containers and fire-resistant rooms, for example.

Surface protection system

The modular, matched elements of our surface protection system are also available in steel.

Mobile sump/spill pallet

Two steering and two fixed castors for easy manoeuvring and push handle for trouble-free positioning.

Small spill trays

For containers up to 30 litres. Highly versatile applications, such as decanting liquids on the workbench.

Spill pallet with and without grating

Painted spill pallet GS1a AB1 with filling area and filling stand

Drum rack type 540 with steel bund

Steel sump/spill pallets PG 9

Fireproof storage and safe transport

Steel bunds 3 mm thick ensure safe storage of water-hazardous and flammable substances. The product range offers many

options for a wide variety of applications for small containers, canisters and drums. Sump/spill pallets have 100 mm ground clearance.

PE ground protection systems ^{HD} with grating PE PG 9

PE ground protection systems with general construction inspection certification Z-40.22-548 and Z-40.22-549

- can be used as storage/filling station
- elements can be combined to cover a complete storage area
- connection components (accessories) permit the lining of surfaces of any size that are suitable as storage and transfilling stations
- can be combined in any way with the PE collection trays on page 157 of this catalogue
- rugged, removable PE grating
- sturdy PE access ramp with an integrated fixing bolt for connection to the PE grating, slight incline for easy loading of the floor elements
- PE grating and access ramp are non-slip
- with visual leak detector

① Accessory access ramp

Can be combined in any way with the PE collection trays^{HD} on page 157

PE ground protection systems – RG without certification

- manufactured from high quality recycled polyethylene
- suitable as a collection tray for materials not hazardous to water or when no certification is required

PE sump 120^{HD}
with PE grating

PE sump 250^{HD}
with PE grating

Description / Type	Overall dimensions cm (l x w x h)	Collection volume L	Ultimate load* kg	Weight approx. kg	with General Construction Inspection Certification	without certification PE-Systems ^{HD} RG

PE ground protection systems HD with galvanised grating PG 9

PE ground protection system with general building certification Z-40.22-548 and Z-40.22-549

- implemented as storage and filling station
- components can be combined into a floor-covering storage system
- robust, removable, galvanised steel grating with feet
- optional connecting rails make it possible to cover large surfaces that are suitable as storage and filling stations
- sturdy PE ramps with integrated locating bolts for docking on the grating, with a gentle slope for easy loading on the work floor
- perforated plate and access ramp are non-slip

① Accessory
access ramp

PE ground protection system 270/8 with PE grating PG 9

PE ground protection system with general building certification Z-40.22-579

- can be used as a storage/filling station
- elements can be connected to form a comprehensive storage system

- rugged, removable PE grating
- connection components (accessories) permit the lining of surfaces of any size that are suitable as storage and transfilling stations

- sturdy PE drive-on ramp with integrated angle bracket for docking onto the PE sump, low gradient for easy loading of the floor elements
- PE grating and access ramp are non-slip

PE ground protection systems 270/8
Example consisting of
4x PE spill tray 270/8,
1x access ramp ①,
2x connecting rail, short ②,
2x connecting rail, long ③ and
1x cross connector ④

Ground protection systems made of steel PG 9

Safety when handling water hazardous and flammable substances.

Modular matching elements allow the lining of large surfaces, which are suitable as storage and transfer stations.

- suitable for storage of water-polluting and flammable substances
- modular, matched elements
- with galvanised, removable grating
- available painted (RAL 5002, ultramarine blue) or galvanised

Drum racks

Sump/spill pallets with general construction inspection certification no. Z-40.12-227 granted by DIBt-Berlin.

Drum racks for approved and spacesaving storage of barrels and other containers. All drum racks are completely hot-dip galvanised and have a corrosion free GRP

sump/spill pallet for long-term safe use. Due to their absolute corrosion resistance, GRP sump/spill pallets can be placed directly on the ground. The low installation height facilitates handling in the factory/ workshop. The different rack models permit filling over the projecting sump/spill pallet for a wide range

of barrels and containers. The rack ensures optimum matching to the actual operating conditions.

Delivered in space-saving individual parts, easily and quickly assembled.

- ✓ quick and easy assembly
- ✓ universally applicable
e.g. waste oil, lyes and acids
- ✓ corrosion-resistant
- ✓ heavy duty shelves
- ✓ minimum inspection requirements, no additional inspection of sump/spill pallet base (compare steel sump/spill pallets)

Example:
Drum rack type 540 has three grating shelves and six clip-in individual drum supports, which can be clipped in different positions in two shelves.

ACCESSORIES

Sump/spill pallet supports for secure standing on uneven ground and to make the drum rack forkliftable

Accessory PE collection tray 40 L

Can holder for easy filling of small containers

Ball valve for quick and simple discharge

Rotating roller support for simple movement of drums

Drum supports for tilting drum for optimum emptying of 60 L drums

Drum racks type 120 PG 9

2 shelves
for up to
two 60 L barrels

or

2 shelves
for small containers

or

1 shelf
for one 60 L barrel and
1 shelf
for small containers

HazMat pallet racks with PE sumps PG 9

HazMat pallet racks

These racks are ideal for storing drums on Euro pallets or chemical pallets and for IBC storage. They comply with the legal requirements for the storage of water-hazardous substances.

PE collection trays with General Construction Inspection Certification Z-40.22-579

- several storage versions can be combined
- expandable
- simple plug-together assembly system
- suitable for storage of water-hazardous substances
- two shelves

HazMat pallet rack consisting of:

- 2 support frames
- 2 pairs of cross members
- 2 push-through prevention rails incl. bracket
- 1 PE rack floor tray

Add-on rack consisting of:

- 1 support frame
- 2 pairs of longitudinal members
- 2 push-through prevention rails incl. bracket
- 1 PE rack floor sump

HazMat pallet racks 18/405 and 27/1100, including optional PE suspended rack sumps 18/230 and 27/230, see page 179

PE shelf bunds for small containers PG 9

NEW

For the safe and proper storage of water and environmentally hazardous materials as per TRGS 510 in small containers and on shelves.

- with general construction inspection approval no. Z-40.22-601
- with/without PE grating
- manufactured from high-density polyethylene
- including visual leak indicator
- high resistance to acids and alkalis
- also for the separate installation of small containers
- multiple bunds enable single-type storage of the media
- the biggest variety of these bunds on the market – for 3 shelf depths and 2 lengths
- can also be retrofitted on shelves from other manufacturers
- for canisters of between 20 and 40 litres, depending on the size

PE small container shelf bund 10/5 with PE grating

PE small container shelf bund 10/4

PE small container shelf bund 10/4, 10/5 and 10/6 with PE grating, stacked

PE small container shelf bund 13/4, 13/5 and 13/6 with PE grating, stacked

The truncated cone principle of the grate elements has been patented by CEMO.

The visual leak indicator allows leaks to be spotted quickly.

The bunds have been specially developed for small containers on shelving racks in 3 different depths – also ideal for retrofitting on shelves from other manufacturers.

Environmental/HazMat racks with PE bund PG 9

HazMat rack 10/5-PE and 13/5-PE with general construction inspection certification no Z-40.22-601

For storage of water-polluting substances in small containers up to 27 or 36 L capacity. The tray is completely galvanised and can be assembled without screws or tools. It has four shelf floors which can be

positioned in mounting points that have 25 mm spacing and four 27 or 36 L PE bunds.

Each level can support up to 200 kg.

Environmental / HazMat racks PG 9

Environmental/HazMat rack 10/20 with general construction inspection certification no. Z-40.22-388

For storage of water-polluting substances in small containers up to 30 L capacity. The tray is completely galvanised and can be assembled without screws or tools. It has 5 shelf floors which can be positioned in mounting points that have 25 mm spacing and two 30 L, PE collection trays. Each level can support up to 200 kg.

Environmental/HazMat rack 13/20

For storage of water-polluting substances in small containers up to 20 L capacity. It is completely hot-dip galvanised and equipped with a 20 L leak-tight spill tray base welded in accordance with StawaR (German guidelines for the requirements of steel container trays of capacity up to 1000 L) lowest shelf.

Environmental / HazMat racks PG 9

Space-saving storage for substances in all water-pollution classes

- galvanised steel for racks, sumps and gratings
- accessible from both sides
- 200 kg weight limit per shelf
- 1600 kg floor load limit per rack system
- height-adjustable shelves with grids of 25 mm

- additional wall fixing according to application (not essential)
- expandable storage capacity by increasing the base unit with expansion units
- quick plug-assembly of supplied components

Version with spill tray base:

- 4 shelves with spill tray base
- separated storage of different substances per shelf
- spill tray per shelf
- all shelves can have the full containment volume by using the removable grating (see accessories)

Environmental/HazMat rack 10/5 (base unit) and 13/5 (as expansion unit) with removable grating (see accessories)

Version with grating shelves:

- 4 shelves with grating
- 3 shelves with grating
- bottom shelf with spill tray
- bottom shelf can have the full containment volume by using a removable grating (see accessories)

Environmental/HazMat rack 13/5 (base unit) and 10/5 (expansion unit) with removable grating (see accessories)

Workshop trolley PG 9

Robust mobile workshop trolley for use in working and storage areas. Also ideal as a station for dispensing liquids and safely providing hazardous substances. Three versions are available.

- 3 mm thick steel spill trays tested according to German regulation StawaR
- available with lockable storage space
- push handle for simple manoeuvring
- four castors, including two braked steering castors
- top spill tray shelf positioned at an ergonomic working height of 92 cm
- optional third spill tray shelf can be positioned at half height
- high-quality powder coating in light grey and orange

Version 1: with spill tray shelves

- two spill tray shelves with 89 x 59 cm base area
- spill tray shelf can be fixed at half height as necessary
- includes 1 x perforated plate insert, can be used for both spill tray shelves

Version 2: with compartment

- two spill tray shelves with 44 x 59 cm base area
- lockable door
- height-adjustable shelf inside (42 x 58 cm base area)
- storage area on top with non-slip mat
- includes 1x perforated plate insert, can be used for both spill tray shelves

Version 3: with drawers

- two spill tray bases with 44 x 59 cm base area
- five drawers, jointly lockable
- storage area on top with non-slip mat
- includes 1 x perforated plate grating, can be used for both spill tray bases

Environmental / HazMat cabinets PG 9

For the safe and proper storage of water-hazardous and environmentally hazardous substances in buildings pursuant to German technical regulation TRGS 510.

CEMO environmental cabinets are manufactured from quality sheet steel. All cabinets are certified according to the sump certification according to German Steel Sump Guideline (StawaR). Since the doors are lockable, access can be restricted to persons trained in handling hazardous substances. Also ideal for storage of pesticide. Not suitable for the storage of flammable substances in work areas.

The following applies to all environmental cabinets on this double page:

- floor bund conformant to StawaR in 3 mm-thick steel
- each shelf is a spill tray
- high-quality powder coating in grey (RAL 7035)
- lockable doors by means of a cylinder lock
- doors open to 180°
- vents in the doors for natural ventilation
- supplied fully assembled and ready for immediate use
- the cabinet top has a connection (NW75) for an external ventilation system
- hazard warning label included

Environmental cabinets 5/10, 10/10, 5/20 & 10/20 certified pursuant to StawaR

- floor bund 30 L
- 4 sizes for maximising space
- all shelves are manufactured as galvanised sumps
- height-adjustable shelves, additional shelves available separately
- document pouch on inside of door

Environmental/HazMat cabinets PG 9

① Environmental cabinet with sliding door and certified under StawaR

- ideal for tight spaces
- each sliding door is mounted on rollers and can therefore be operated with one hand
- all shelves are manufactured as spill trays
- height-adjustable shelves
- all spill trays galvanised

① Environmental/HazMat cabinet 15/20 with sliding doors

③ Canister cabinet 10/20 (canisters not included)

② Environmental cabinet with fully extending drawers and certified under StawaR

- removable galvanised shelf trays allow access to all stored containers and tanks
- with interlock protection as standard so that not more than one sliding shelf can be open simultaneously
- all trays galvanised

③ Environmental/HazMat cabinet designed as a canister cabinet and certified under StawaR

- filling directly from the canister store (up to 15 canisters)
- the floor tray can be pulled out at the same time as the canister shelf to catch any spillage during filling
- the canister holder is suitable for most popular designs
- with interlock protection as standard so that the shelf tray cannot be open at the same time as more than one canister level
- all internals painted in RAL 7035
- shelf tray galvanised

Fans on pages 208 – 209

Environmental/HazMat cabinet 13/20 PG 9

For the safe and proper storage of water-hazardous and environmentally hazardous, non-flammable substances in buildings pursuant to TRGS 510

The frame of this environmental cabinet is based on drum rack 540, forming a particularly sturdy overall package.

The cabinet is available in two versions.

- hot-dip galvanised frame and grating shelves
- high-quality powder coating in grey (RAL 7035)
- vents at the top and bottom of the doors for natural ventilation
- document pouch on inside of door
- hazard identification labels included
- load bearing capacity up to 200 kg per shelf
- 600 mm shelf depth allows horizontal storage of 60 L drums including tap for version 1

GRP sump with certification:

Version ①
with GRP sump 150 L

Version ①:

Environmental cabinet 13/20 with GRP sump

- collection volume 150 litres
- with General Construction Inspection Certification Z-40.12-227

Version ②:

Environmental cabinet 13/20 with spill tray

- bottom shelf as seamlessly welded steel spill tray with 20 litre collection volume

The cabinet is delivered unassembled.

Drum cabinet 14/20 PG 9

For the safe and proper storage of drums containing water-hazardous and environmentally hazardous, non-flammable substances in buildings according to German regulation TRGS 510

60 and 200 litre drums can be safely stored in this drum cabinet. The cabinet is large enough for you to work with a hand pump or handle the drums. The additional spill tray base at the top can accommodate small containers.

Drum cabinet 14/20

- high-quality powder coating in grey (RAL 7035)
- lockable doors by means of a cylinder lock
- vents in the doors for natural ventilation
- the cabinet top has a connection (NW75) for an external ventilation system
- document pouch on inside of door
- hazard warning label included

Version ① with large, certified collection tray:

- floor tray made of steel or PE, both with grating
- additional spill tray at top (height adjustable, 25 mm grid)
- supplied fully assembled and ready for immediate use

Version ② with drum rack type 360 and certified collection tray:

- base made of steel, PE or GRP
- with drum supports for 6 x 60 L drums
- optional third shelf using grating

Drum cabinet with steel base for upright 200 litre drums

Drum cabinet with drum rack type 360 inside for horizontal 60 litre drums, steel grating as as third shelf (see accessories), GRP base

Connection option (NW75) for external ventilation system

Pesticide cabinets PG 9

For the safe and proper storage of pesticides in buildings pursuant to TRGS 510

Pesticides are useful but, in the wrong hands or if released unintentionally, they can cause great harm to people and the environment due to the water hazard they pose. These substances can be safely stored behind locked doors and on trays in CEMO pesticide cabinets. The cabinets are suitable for the storage of non-flammable substances in work areas.

Pesticide cabinets 5/10, 10/10, 5/20 and 10/20

certified pursuant to StawaR:

- four sizes for different storage quantities
- high-quality powder coating in green (RAL 6011)
- floor tray (30 litres) pursuant to StawaR, made of 3 mm thick steel
- all shelves are manufactured as galvanised trays
- height-adjustable shelves (25 mm grid)
- see accessories for further spill tray bases as additional shelf
- lockable doors by means of a cylinder lock
- doors open to 135°
- vents in the doors for natural ventilation
- delivered fully assembled and ready for immediate use
- document pouch on inside of door
- hazard warning label included

Perforated plate insert for floor tray (30 litres)	10/10, 10/20	3.5	11061

Gas cylinder store PG 9

NEW

For installation outdoors

For proper storage of gas cylinders as per TRGS 510

- ideal for the storage of propane gas cylinders
- sturdy welded sheet metal construction, galvanised and powder-coated, RAL 7035
- vents in the doors and side walls for natural ventilation
- inclined roof for optimal water run-off
- protects against unauthorised access, lockable with cylinder lock

- hazard sticker with warning symbol enclosed for identification as hazardous material storage
- delivered fully assembled

Single-door version:

- 1-leaf door, door hinge on right
- with a galvanised grating shelf and a removable intermediate shelf as additional deck surface
- for the storage of up to 8 gas cylinders of 11 kg each or 4 gas cylinders of 33 kg each

Two-door version:

- 2-leaf door, central partition, doors to be opened independently of each other
- with 2 galvanised grating shelves and 2 removable intermediate shelves as additional deck surfaces
- for the storage of up to 16 gas cylinders of 11 kg each or 8 gas cylinders of 33 kg each

Gas cylinder store, single door version

Gas cylinder store, two-door version

GAS CYLINDER STORE

Description	External dimensions cm (l x w x h)	Internal dimensions cm (l x w x h)	Quantity gas cylinder	Weight approx. kg	Order no.
Gas cylinder store, single door version	85 x 70 x 150	84 x 67 x 144	8 (11 kg), 4 (33 kg)	55	11878
Gas cylinder store, two-door version	170 x 70 x 150	169 x 67 x 144	16 (11 kg), 8 (33 kg)	105	11879

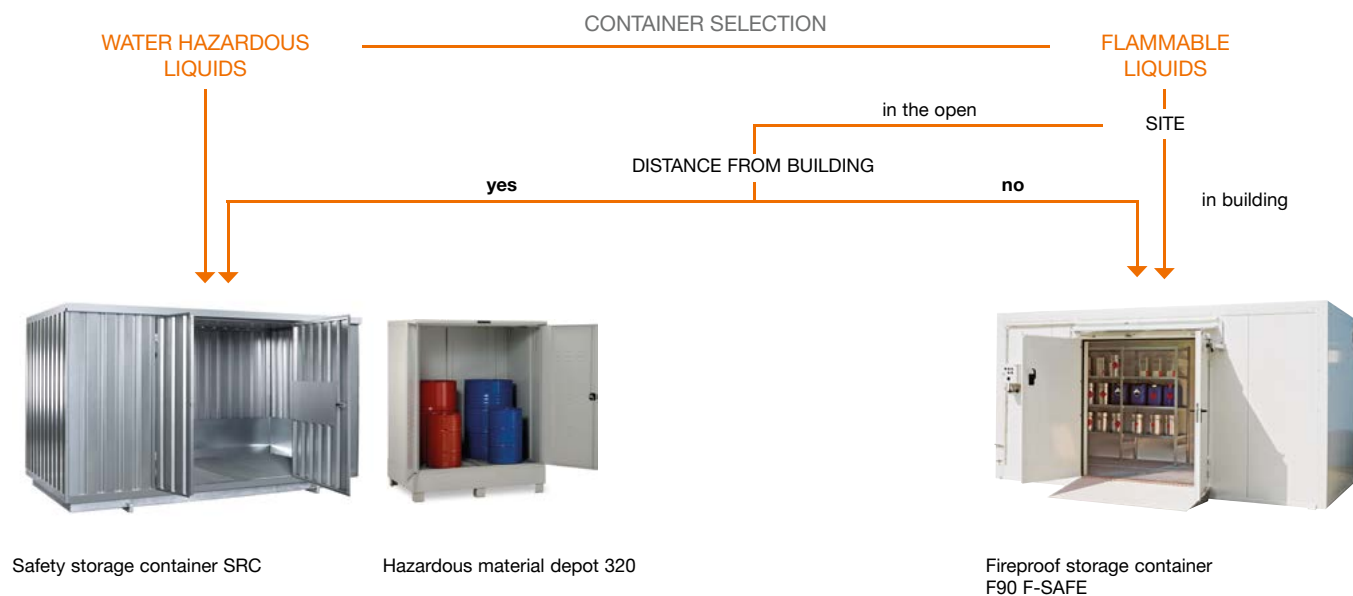

Storage of hazardous substances outdoors

It is not always possible for businesses to store hazardous substances indoors. Sometimes it is recommended to reduce risk by storing hazardous substances outdoors in suitable containers. One needs to distinguish between storage containers without fire protection features (Safety Storage Containers (SRC) and hazardous substance depots) and those with fire-resistant features (F90 fireproof container).

When storing flammable substances, EX-protective equipment is generally required due to the risk of explosion. In principle, the hazardous substances store should be fitted with a liquid-tight sump that should be certified.

The collection volume of a hazardous substance store must be capable of containing 10 % of the total volume of liquids stored, or the volume of the largest container (e.g. drum or IBC).

Please note: there are different regulations in water protection areas, if storage is permitted there

SAFE DISTANCES

When **flammable liquids** are not stored in a fireproof container, a safety distance must be maintained. This distance depends on the quantity to be stored in accordance with **TRGS (Technical Rule for Hazardous Substances) 510, Annex 5, Nr. 4, para. 2.:**

- Combined stored volume **less than 200 kg:** **3 metres**
- Combined stored volume **between 200 kg and 1,000 kg:** **5 metres**
- Active storage (see below) or combined stored volume **more than 1,000 kg:** **10 metres**

Alternatively, either fire-resistant building exterior walls (F90 in accordance with DIN 4102) or fire-resistant components between buildings and hazardous material storage in specified height and width would be sufficient, but in practice this occurs in very few cases. However, if a hazardous materials store is to be erected directly against a building, an F90 Fire proof container in fireproof material is required.

ACTIVE AND PASSIVE STORAGE OF FLAMMABLE LIQUIDS

- Passive storage is when storage takes place in tightly closed containers. During the storage containers may not be emptied or filled and even opening for other purposes is prohibited. Generally natural ventilation is sufficient.
- Active storage refers to those storage situations in which the containers are opened for dispensing or refilling. Mechanical ventilation is mandatory in these cases. An exception can be made for small hazardous substance stores (observe risk assessment).

Description	Passive storage	Active storage
Safety distance available	SRC (Depot) Natural ventilation (0.4 times air change)	SRC (Depot) Mechanical ventilation (5 times air change)
No safety distance possible	F 90 fireproof container Mechanical ventilation (5 times air change)	F 90 fireproof container Mechanical ventilation (5 times air change)

Hazardous material depot (steel) PG 9

- can be installed outdoors due to weather-resistant coating (similar to RAL7035)
- certified according to German regulation StawaR for the storage of water-hazardous (WGK 1 – 3) and flammable liquids (H224-226)
- cover can be held open as required by means of gas struts
- vents for natural ventilation
- doors can be locked
- forkliftable
- space to accommodate chemical and Euro pallets
- supplied fully-assembled
- hazard warning label included for identification as a hazardous material storage facility
- horizontal drum storage possible with installation of drum rack (optional accessory) with 2 shelves for 2 x 200 L or 3 x 60 L drums per shelf
- additional shelves for canisters etc. available with the small container rack (optional accessory)
- for the storage of flammable liquids please note the safety distances from buildings specified in the regulations TRGS 510, no. 12.4.1 (2).

Wide-opening doors for easy access

Hazardous material depot 400 with optional drum rack

Hazardous material depot 320 with optional small container rack

Description	Dimensions cm (l x w x h)	Collection volume L	Capacity	Weight approx. kg	Order no.
Steel hazardous material depot 320	150 x 120 x 189.5	320	2 x 200 L / 6 x 60 L	209	11015
Steel hazardous material depot 400	150 x 150 x 189.5	400	4 x 200 L / 9 x 60 L	250	11016

ACCESSORIES FOR STEEL HAZARDOUS MATERIAL DEPOT

Description	Dimensions cm (l x w x h)	Order no.
Drum shelf for steel hazardous material depot, horizontal drum storage, galvanised design, per shelf either 2 x 200 L drums or 3 x 60 L drums	135 x 52 x 90	11017
Small container shelf for steel hazardous material depot, 3 spill trays, galvanised design, up to 4 height-adjustable shelves	135 x 61 x 135	11018

Mobile HazMat depot see page 185.

For more hazardous material depots see page 177.

PE hazardous material depot PG 9

with General Construction Inspection Certification Z-40.22-591

- for use outdoors and indoors
- made of high-quality polyethylene (PE)
- high chemical resistance
- lockable with sturdy stainless steel bar lock
- with document pouch on inside of door
- with integral forklift pockets for loading with pallets or IBCs
- ideal for Euro pallets (120x80), industrial pallets (120x120), plastic pallets of similar size or IBCs
- loaded pallets or IBCs can be placed directly into the depot
- a steel or PE grating is not required, but can be used if required on PE hazardous material depot 220/2
- PE hazardous material depot 1100/1 is fitted with a separate, sturdy stand
- the stand is already integrated in the housing with PE hazardous material depot 220/2
- door opens to 270° for stand-alone installation
- door opens to approx. 180° for serial installation
- doors can be latched at increments of 90°
- integrated rain gutter at top of door opening
- domed roof withstands higher snow loads
- option for fitting interior lighting
- cable duct option on the rear wall

PE hazardous material depot 220/2
with Euro pallet and two drums

PE hazardous material depots 220/2
and 1100/1

PE hazardous material depot 220/1
with industry pallet and four drums

Wind load protection for PE hazardous material depot 220/2 and 1100/1	-	-	11360

HazMat collection station PG 9

Hazardous substance collection stations from glass fibre reinforced plastic (GRP) with General Construction Inspection Certification Z-40.12-228 granted by DIBt-Berlin

Offers centralised, safe storage for a variety of containers and liquids. The GRP sump

with splash protection wall is suitable for storage of liquids of all water-polluting classes.

The wide opening lockable lid with gas struts allows easy loading/unloading and allows outdoor use – station has galvanised floor frame with grating.

★ Accessory drum support see page 177

GRP HAZARDOUS SUBSTANCE COLLECTION STATION

Description	Surface area cm (l x w)	Height cm	Weight approx. kg	Order no.
Collection station with grating floor for outdoor installation (with lid), with 200 L containment volume	150 x 85	211	85	3412

Safety storage containers PG 9

This accessible container offers a compact solution for storage of a variety of hazardous materials.

By the modular principle, this can be supplied in a variety of sizes and can be tailored to individual demands on site.

Surface area coverage from 2 to 42 m²

SRC 5.1W
with 2 swing doors fitted to long side

Storage for plant pesticide
(example painted green)

- ✓ Fully-assembled model
- ✓ Galvanised sheet steel
- Alternative: Galvanised and painted (RAL 5002 ultramarine blue, other colours available on request)
- ✓ Wall and roof elements from galvanised trapeze profile corrugated sheet steel
- ✓ Floor sections made as hot dipped galvanised steel sump floor.
 - resistant to chemicals according to Chemical compatibility guide DIN 6601
 - steel S235JR according to EN 10025
- ✓ 100 mm ground clearance
- ✓ Removable floor grating (load limit 1000 kg/m²)
- ✓ Large, single swing door (width 1240 mm)
- ✓ Traversable roof (designed to withstand 125 kg/m² snow load)
- ✓ drainage via interior gutters
- ✓ Spill guards on walls to protect against spills
- ✓ Door handles inside and outside

SRC 3.1W with door on narrow side

THE CORRECT CONFIGURATION FOR EVERY APPLICATION

Type series SRC-W		Storage of water-polluting liquids (WGK [water hazard class] 1-3)	<ul style="list-style-type: none"> ✓ Sump/spill pallet, walls and roof made of sheet steel 	Example storage situation: Chemicals, water-polluting liquids
Type series SRC-N		Storage of combustible and flammable liquids (WGK 1 – 3, H224-226)	<ul style="list-style-type: none"> ✓ Sump/spill pallet, walls and roof made of sheet steel ✓ Perforations for natural ventilation (min. 0.4 air changes guaranteed) 	Example storage situation: Fuel, petrol, oils, solvents
Type series SRC-TB		Storage of temperature-sensitive, water-polluting liquids (WGK [water hazard class] 1 – 3)	<ul style="list-style-type: none"> ✓ Sump/spill pallet made of sheet steel ✓ Walls and roof made of thermal insulation material (building material class B1: flame retardant) 	Example storage situation: Pesticides, cleaning agents, chemicals, housing for dosing systems
Type series SRC-TA		Storage of temperature-sensitive, flammable liquids (WGK 1 – 3, H224-226)	<ul style="list-style-type: none"> ✓ Sump/spill pallet made of sheet steel ✓ Walls and roof made of thermal insulation material (building material class A1: non-combustible) 	Example storage situation: Sensitive paints and varnishes

* Multi-module containers from size 4.x are delivered in individual modules

Safety storage containers PG 9

STORAGE OF SUBSTANCES HAZARDOUS TO WATER (WGK [WATER HAZARD CLASS] 1-3):

Safety storage containers can be installed both indoors and outdoors.

Observe official requirements for larger storage quantities, in particular for WGK 3 (highly hazardous to water).

STORAGE OF FLAMMABLE SUBSTANCES (H224-226):

Normal case: passive storage

Four fundamental specific features must be taken into account here:

- The prescribed safety distance between material and buildings is maintained
- Sufficient ventilation is guaranteed
- The electrical equipment is explosion-proof and the container is earthed
- For versions with thermal insulation: only type series TA

Special feature: active storage

e. g. decanting, removing, filling, etc. into and from drums, IBCs and small containers

In addition to the technical requirements for passive storage, the container must have mechanical ventilation (forced ventilation) for 5 times air exchanges. We also recommend exhaust air monitoring of the ventilation system for maximum safety.

If the container location on the property does not permit a safety distance, an F90 fireproof storage unit with DIBt certification must be used. (see p. 202)

See the detailed explanation of the regulations on page 196.

EQUIPMENT OPTIONS (STANDARD OR OPTIONAL)

Natural ventilation

Min. 0.4 times air change rate confirmed by expert. Micro-perforation protects against penetration by small animals and rodents.

Mechanical ventilation

Forced ventilation for 5 times air changes.

Thermal insulation

For protection against frost and cold. Dependent on the storage medium in building material A1 or B1. Frequently used in conjunction with heating and ventilation (accessories see p.198).

Grating

In addition to the standard grid, a closer-meshed grating with better lift truck access is also available if required.

Single or double-wing doors

Single-wing door already in place creates an opening of 1240 cm (e.g. for chemical pallets), two-wing version provides significantly greater opening.

Sliding door

Convenient access. No slamming in the wind compared to winged doors. Not possible for thermo-insulated containers.

Safety storage containers

	Set of 4 crane eyelets with bars for up to 3 t total load for safety storage container SRC 3.1, SCR 4.1, SRC 5.1 and SRC 6.1		10071

Delivery/shipping costs for a one-off delivery: Delivery ex works.

- When a delivery is made, the customer must provide a crane or forklift for unloading. Please note container weight!

- For crane unloading of container SRC x .1 with straps, the customer can also order crane lugs with our order no. 10070 or 10071 for the container.

- For crane unloading of containers SRC x .2 and SRC x .3, the customer must, in addition to the crane, order a crossbar that extends across the full width of the container.

Rack containers

These certified rack containers are always used when high storage capacities are required in the tightest space. The hazardous material storage facility can be set up for water-polluting or flammable liquids and can be individually adapted to the operational requirements.

- certified by the DIBt for the storage of water-polluting liquids (WGK 1 – 3). Flammable liquids (H224-226) are also included here (dependent on container version).

- storage capacity can be arranged at will thanks to different rack widths, 1-3 shelves and single or double rack width and depth.
- ideal for storing large quantities of drums and IBCs, dimensions match IBC, Euro and chemical pallets
- welded frame construction made of steel profiles
- adjustable levels thanks to removable, hot-dip galvanised gratings
- 100 mm ground clearance and therefore accessible for handling devices

The following versions are available:

- with wing door (single rack width) or sliding door (double rack width)
- wall model: either sheet metal (with or without natural ventilation) or thermal insulation in A1 or B1 model
- for vertical or horizontal drum storage or IBC storage
- accessible on one side (single rack depth) or both sides (double rack depth)
- extensive range of accessories (e. g. heating, mechanical ventilation, chemical-resistant model)

Safety information:

When storing flammable liquids, please pay attention to the outdoor setup and the required safety distance between liquids and buildings in accordance with TRGS 510.
Safe alternative: F90 fireproof storage (see page 202)

Vertical drum storage in 3 shelves

IBC storage over 2 shelves

Vertical drum storage in 2 shelves

POSSIBLE CONFIGURATIONS

Description	Possible rack widths in m	Rack depths (single/double)	Rack heights according to shelves	Load	Order no.
horizontal drum storage	3.00	1.34 / 1.27	2 x 0.95 / 3 x 0.77	400 kg / drum support	on request
vertical drum storage	2.70 / 3.00 / 3.90	1.34 / 1.27	1 x 2.00 / 2 x 1.24 / 3 x 1.24	1000 kg/m ²	on request
IBC storage	2.70 / 3.38 / 3.90	1.34 / 1.27	1 x 2.00 / 2 x 1.50 / 3 x 1.50	1200 kg/m ²	on request

F90 walk-in fireproof storage F-SAFE

The standardized BLS fireproof storage units were developed with the expertise gained in hundreds of hazardous material storage facilities built to individual customer specifications.

The BLS storage units are fireproof inside and outside for up to 90 minutes as required by DIN 4102. They have integrated sumps and are suitable for both indoor and outdoor use.

Each BLS storage unit is a separate fire compartment.

- F90 fire protection inside and outside
- delivered ready for use
- sturdy, welded design
- thermally insulated with a high thermal insulation value
- with integrated sump made of galvanised sheet steel

- load-bearing surface with removable, galvanised steel gratings, 1000 kg/m²
- automatically closing doors with anti-panic function
- door optionally in the narrow or long side, single- or double-leaf
- low threshold, 160 mm
- corrosion protection via 2C paint in RAL 9002 grey-white

BLS 2460 with 2-leaf door on the long side with optional access ramp*

Other sizes, equipment versions and accessories such as technical ventilation, door retainer system with fire detection, heating, air-conditioning, stainless steel collection tray, access ramp, lighting, small parts racks, lightning protection, fire alarm system, fire extinguishing system, etc. upon request.

Secure cabinets FWF 30 and FWF 90 F-SAFE PG 9

Cabinets for proper storage of hazardous substances in work areas in accordance with DIN EN 14470-1 and TRGS 510 (Annex 1). The F-SAFE secure cabinets are design approved in accordance with DIN EN 14470-1 and comply with DIN EN 14727 (Laboratory Furniture Directive).

The cabinets are resistant to fire for 30 or 90 minutes.

Secure cabinet
PROline 12/20
from CEMO:

and manufactured
to the latest
standards

NEW

NEW TO CEMO:
TWO PRODUCT LINES
TO CHOOSE FROM:

Type 12/20 with 3 spill trays
and 1 x 44 L bottom tray

Collection volume

While the collection volume of 10 % of the total amount of stored liquids must be ensured when using collection trays, a different regulation applies in the case of secure cabinets: it must be possible to collect at least 110 % of the largest container.

Ventilation

A mechanical ventilation system (see page 208) with 10 air changes per hour has the advantage that, in normal operation with closed containers, no explosive atmosphere can occur outside the cabinet. Operation is also possible without mechanical ventilation. For this, however, the cabinet must be earthed via equipotential bonding to prevent electrostatic charging. If a secure cabinet is not connected to a mechanical ventilation system, this may also affect the explosion-proof zone. Zone

1 applies to the inside area, Zone 2 applies to the surrounding area within a radius of 2.5 m.

We generally recommend using technical ventilation (page 208 / 209).

Secure cabinets fwf 30

Secure cabinets with 90-minute fire resistance are considered to be "state of the art" in Germany. However, secure cabinets with 30-minute fire resistance may also be used with restrictions, pursuant to TRGS 510 (Annex 3).

The restrictions for FWF 30 cabinets are as follows:

1. only one cabinet is installed per separate building unit/fire (-fighting) compartment; if the area of the separate building unit/ fire (-fighting) compartment is greater than 100 m², one cabinet may be installed every 100 m², or

2. the building unit/fire (-fighting) compartment is protected by an automatic fire detection system and recognise plant fire brigade with a response time of at most 5 minutes from the alarm being raised, or an automatic extinguishing system is in place.

Exceptions in the case of extremely flammable liquids (H224):

Flammable liquids whose ignition temperature is below 200°C and which have been classified as "extremely flammable" (H224) may only be stored in FWF 90 secure cabinets with mechanical ventilation.

FIRE SAFETY

The newest generation of secure cabinets

CEMO PROline PG 9

NEW

The PROline series meets the current DIN EN 14470-1 standard, making it even safer and more practical. In a fire chamber test at an accredited test institute, this secure cabinet achieved perhaps the best fire resistance on the market of over 107 minutes. To do justice to the requirements of a professional cabinet, top priority was given to safety and well thought-out functions.

Connection for supply air and exhaust air

Cable duct

Load test for fan

Door closing mechanism with door locking mechanism

lighter

more practical

safer

body constructed with a modern mix of materials

bottom bund with perforated plate grating

forkliftable

innovative door locking at top and bottom

TIP: Gives users the certainty that the secure cabinets based on the newest standards will also meet relevant requirements over the coming years. In this way, the secure cabinet can fulfil any risk assessment when used properly and can also pass safety audits.

Requirements of the newest standard

DIN EN 14470-1:

CEMO already fulfils the updated requirements of the draft standard and is therefore deemed a secure cabinet in accordance with the new standard.

Fire chamber test (image on left)

CEMO PROline

Secure cabinet 6/20 and 12/20 type 90 PG 9

NEW

Complies with the newest version of DIN EN 14470-1

- 90 minutes fire resistance
- for containers up to 30 litres / 60 litres (order no. 11975)
- safe 2-point locking for optimal access protection
- locking mechanism activates when closing the doors
- self-closing doors in the event of a fire
- door holding in an open condition as standard
- extra safety: load certification for fan centre of gravity on the top of the cabinet
- height-adjustable spill tray shelf, load capacity 75 kg, grid dimension 32 mm
- for connection to mechanical ventilation, diameter of ventilation opening DN75
- forkliftable, height-adjustable feet, removable base trim
- earthing point on the outside of the cabinet to avoid ignition hazards due to electrostatic charging
- optional: cable duct for installation of measuring equipment, for instance
- cabinet body in grey, doors in RAL 2008/orange (other colours on request)

① storage of flammable liquids

② storage of containers up to 30 litres / 60 litres (11975)

③ removable base trim for forklift access

Ventilation systems PG 9 for secure cabinets FWF 30 and FWF 90

Escaping vapours and hazardous gas-air mixtures are always possible when flammable liquids are stored in secure cabinets. These Ex-zones form not only inside a secure cabinet, but can also arise within a radius of several metres around it.

Suitable ventilation systems can remove escaping vapours and gases directly where they are produced, effectively preventing an explosive atmosphere forming. Subdivision into Ex-zones is no longer necessary.

There are two different ventilation systems:

- exhaust air fans, which discharge the extracted air to the outside through an exhaust line
- recirculation fans, which pass the extracted air through integrated filters and thereby render it harmless with regard to explosion hazard before discharging it into the environment

Note from **TRGS 510**, Appendix 1:
Not only fire resistance class FWF 90 but also mechanical ventilation systems are required for extremely flammable liquids (H224).

The ventilation systems on pages 208 / 209 can be used for our environmental cabinets as well.

EXHAUST AIR FAN WITH AIRFLOW MONITORING

For placement on the secure cabinet and discharge of the extracted air into an external exhaust line

- sheet steel housing, powder-coated, light grey RAL7035
- floating output via DIN socket
- intake fitting diameter 75 mm
- output volume: 50 – 200 m³/h with volume flow monitoring
- sound pressure level Lp2A: 35 dB(A)
- voltage: 230 V
- frequency: 50 Hz
- power consumption: max. 0.45 A

Ready to go solutions
for extraction from Ex-zone 2
and installation in Ex-free zone
protection class: CE II _/3 G IIB T4

Description	External dimensions cm (l x w x h)	Weight approx. kg	Order no.

Storage and charging of lithium batteries

The importance of lithium batteries is increasing constantly in our everyday lives. These powerful batteries are increasingly being used not only in small mobile devices or in bicycles (e-bikes) but, correspondingly sized, also in industrial appliances, vehicles and machines. Lithium batteries are powerful, but not without their hazards. Lithium batteries have long been classified as hazardous goods under transport law and are therefore subject to meticulous hazardous materials regulations which become stricter every 2 years. Lithium batteries require the utmost care during

transport and particularly during storage and handling. If damaged or if handled incorrectly, these batteries can quickly lead to dramatic consequences, usually in the form of a fire. One reason why storing lithium batteries poses a fire safety challenge is that they are not under constant observation, and a fire can spread quickly and unnoticed.

The typical incidence of damage involves the battery igniting and explosively emitting jets of flame and toxic smoke.

Summary of the possible causes of fire:

- mechanical damage (e.g. impact, fall)
- improper charging process
- deep discharging
- overheating due to high ambient temperature

CHARGING

Most of the lithium battery-related fires studied in Germany occurred during the charging process. Safety specialists, fire brigades and property insurers are therefore paying closer attention to this threat.

Unfortunately, practical experience has shown us that there are many (deliberately or unintentionally) incorrect ways to charge batteries. Even a lithium battery which looks perfectly intact from the outside can already be damaged enough on the inside that adding electrical energy via the charger can cause a fire hazard. Charging stresses a lithium battery. Frequent charging, hard use and wear place a burden the battery to the point that any charging process could be the last one.

Charged lithium batteries pose a higher fire hazard (cause) and burn more intensely (effect). Therefore, the charging process must never be underestimated and must always take place under supervision at a designated location. Charging in the workplace therefore requires a risk assessment which takes into account the risk to employees and the environment, as well as the building layout. These findings should be included in the fire prevention plan.

Overheating due to causes such as direct sunlight or heat build-up during charging must also be avoided.

Practical tip:

Charge and store lithium batteries separately!

More Information: www.battery-secure.com

Important:

Lithium batteries are mentioned in German Regulation **TRGS 510**. Due to their higher hazard level, appropriate fire protection measures must be taken.

STORAGE

So far, there are no statutory regulations for the storage and supply of lithium batteries. Occupational safety obligations and, above all, insurance guidelines nevertheless mean that the information to be observed regarding the storage and operation of lithium batteries is just as comprehensive as that applicable to traditional hazardous materials storage.

VdS Guideline 3103 from the German Insurance Association (GDV) is a current source of important information about storing and supplying lithium batteries.

Storage also involves the danger of a nearby fire spreading to the lithium batteries. A small, extinguishable fire source can then become a major challenge to the fire brigade.

A risk assessment in combination with the right charging and storage solution effectively improves safety in the workplace. Not all lithium batteries are the same. Therefore, there is no "one size fits all" protection scheme. In addition, the information provided by the manufacturers of energy storage devices and battery-operated devices must be observed at all times. Suitable technical protective measures, such as tested transport containers, safety cabinets or even fire protection containers, always depend on the circumstances in the workplace.

CHARGING + STORAGE

Storage and charging of lithium batteries

CEMO safety note

Safety rules for charging

- Never charge in the storage area.
- Maintain a clearance of several metres from combustible objects.
- Never charge damaged or faulty batteries.
- Avoid heat build-up during charging.
- Use only the original charger.
- Immediately disconnect the battery from the mains after charging.
- Avoid charging overnight.
- Unsupervised charging poses a higher risk.

Fire extinguishing is still the most disputed topic regarding lithium batteries. Although small quantities of water can worsen the reactions of lithium-ion batteries, large quantities have a cooling effect and, in the ideal case, can interrupt the thermal runaway process.

The fire brigade also fight fires with plenty of water, which at least prevents the flames spreading to the surroundings. It is therefore crucial to alert the fire brigade as soon as possible so they can extinguish the fire.

Safety rules for storage

- Protect against short circuit of the battery poles.
- Protect against mechanical damage.
- Separate storage, i.e. no mixed storage.
- When storing batteries inside buildings, maintain a distance of 2.5 m from other installations or store them in areas that are isolated in terms of fire prevention (e. g. fire protection containers, safety cabinets).
- Immediately dispose of damaged products properly, even in case of slight abnormalities.
- Do not expose directly and permanently to high temperatures.
- Train employees how to handle lithium batteries properly.
- Provide suitable fire extinguishers.

Damaged/defective batteries, prototypes or batteries for disposal require a hazard assessment and possibly additional protective measures.

* Risk assessment depends on additional factors, such as specifications of the property insurer, sprinkler system or works fire brigade

Risk increase of the situation

What happens when lithium batteries catch fire?

A fire involving lithium batteries is more than the appearance of just a few flames; this is because the electrical energy is released in a burst of thermal energy and leads to a rapid increase in temperature. The thermal runaway of a cell and the spread of fire to other cells in the battery pack (thermal propagation) is described as explosive burning, which looks like an intense firework. Further observations include the emission of heavy smoke and particles being flung around like projectiles.

The greatest danger occurs during a gas explosion, when escaping battery vapours suddenly ignite, exerting an explosive pressure of several bar on cabinets or containers. If these are not designed to cope, the result can be the total failure of their intended protective effect.

This is why battery fire testing and induced gas explosions are so important as proof of performance for cabinets and battery safety products.

Extract from TRGS 510

Technical rules for hazardous materials in mobile containers

13 Combined storage, divided storage and separate storage

[...]

13.2 General principles

[...]

(3) Instructions for a possible increase in danger [...] can arise from, for example,

[...]

3. the product-specific hazards, such as, for example, the hazard posed by ignition sources due to a short-circuit involving lithium batteries.

(5) To reduce hazards, divided storage within a storage compartment or separate storage may be required:

1. Divided storage is achieved through sufficient distances or barriers (e.g. walls, cabinets made from non-flammable materials, [...])

2. Separate storage is divided storage in different storage compartments with a fire rating of at least 90 min.

As at 2021

What does that mean for the use of cabinets and containers?

TRGS 510 provides only a recommendation for the minimum standard and can be replaced by more effective protective measures at any time.

The indicated fire rating of a cabinet or container plays a less important role, as these systems are assessed only at the test kiln and the assessment is therefore restricted only to fire and/or heat.

The most up-to-date qualification process therefore involves several real battery fire tests and induced gas explosions. This method makes it possible to demonstrate that the housing system remains intact and that the doors remain closed, even in an abnormal fire caused by lithium batteries. A gas explosion does not occur in every battery fire, but when it does, the consequences can be devastating.

Conclusion:

The actual product qualification is decisive. In the case of lithium batteries, focusing on the time indicated by the fire rating alone is therefore unhelpful. The battery cabinets from CEMO with a fire rating of 60 minutes (inside to outside) or the flame protection cabinets as lightweight fire protection products can therefore, with further qualification measures, be assessed as safer than other cabinet systems on the market that only have a fire rating of 90 minutes.

Which product qualification is recommended?

TÜV Nord testing programme
type tested in 2023 with TÜV NORD certification awarded

Battery storage cabinet FMplus PG 9

Leaving even a single lithium battery from a battery-powered device lying around in the open could be enough to ignite a fire. Based on the risk assessment, this double-walled steel cabinet can be used as a protective measure for new lithium batteries from devices such as power tools or garden equipment.

The cabinet is available in three sizes:

- sturdy, heat-insulating double-walled steel cabinet
- lockable door with three-point lock
- can be locked with a padlock if necessary (profile half cylinder lockable)
- Cold smoke seals help prevent smoke escaping the cabinet
- vent for proper connection to the exhaust pipe to the outdoors
- forklift access clearance (8 – 9 cm) for positioning and removal in the event of an incident
- equipped with smoke detector for audible alarms as standard
- powder coating body light grey (RAL 7035) and door light red orange (RAL 2008)
- includes warning labels and safety instructions

Based on the risk assessment, this double-walled steel cabinet can be used as a protective measure for new lithium batteries from devices such as power tools or garden equipment.

Safe and cost-effective storage: FMplus, the entry-level model.

US version with charger:

- 1 power socket per shelf
- battery-operated smoke alarm
- power disconnection in case of fire
- door contact switch for interrupting the charging current if the doors are open

NEW

Battery storage and charging cabinet PG 9

Fire prevention is important when charging lithium batteries. CEMO now offers a safe solution. Providing important safety equipment can minimise the consequences of these storage devices burning and significantly increase safety.

- lithium batteries in the cabinet
- early alarm in case of damage
- all relevant safety regulations for charging lithium batteries are observed
- ideal for separating batteries on charge from stored units
- can also be used as an under-table cabinet under the workbench
- certifications from the TÜV NORD Group using the latest test programme with real battery fire testing and induced gas explosions
- MPA-tested fire resistance over 60 minutes from inside to outside according to DIN EN 1363-1
- built using non-combustible, fire-resistant components

- **NEW:** Spring-based CEMO lockEX door locking for controlled pressure relief during explosions
- special fire prevention seals prevent flames escaping
- cold smoke-tight sealing system for openings
- transportable for positioning at the place of installation
- lockable double doors with sturdy lock and hinges
- doors painted orange, matching RAL 2004; body grey, matching RAL 7035

New test programme and certification from the TÜV Nord Group

The new test programme of the TÜV Nord Group was developed on the basis of many years of testing experience with lithium batteries in a variety of sizes and performance categories. The result is test requirements that most closely approximate to the real dangers of failing and burning lithium batteries.

The scope of testing comprises both battery fire testing and induced gas explosions. Propane gas is used for the gas explosion because the explosion characteristics are very similar to those of battery gases and ensure a reproducible test format.

The 3 proofs of safety and quality

Test component of the new certification programme of the TÜV NORD Group.

Certificates at
www.cemo-group.com/certificates

Controlled pressure relief as explosion protection.

If a damaged lithium battery explodes, the cabinet doors can burst open. By means of a spring mechanism, the cabinet door is opened very slightly then immediately retracted and locked again. This dissipates the explosive pressure.

NEW

Includes property rights lodged with the German Patent and Trademark Office.

It has long been known in specialist circles that lithium batteries can not only catch fire, which can lead to explosive burning of individual cells, but can also cause gas explosions as a result of the vapour leaking out of the cells. This represents the worse case scenario in the event of a battery fire. In some cases, however, this can render the entire protective effect null and void and is thus the most decisive criterion in performing a risk assessment.

Battery storage and charging cabinet PG 9

Fire prevention meets explosion protection

CEMO now also has the solution for explosion protection.

Sequence of a battery fire:

An explosion can happen even before a thermal runaway occurs. If the cabinet housing gives way or the doors open, the protective effect can be instantly lost. There is then nothing to prevent the burning cells and battery packs being ejected into the area around the cabinet..

The solution:

CEMO lockEX is a spring-based mechanism in the door lock that effectively manages the explosive pressure of gases that ignite inside the cabinet. This NO-BANG technology guarantees that the protective effect is maintained.

NEW

OPERATING PRINCIPLE OF THE LOCKEX LOCKING MECHANISM (PLAN VIEW)

1. Battery failure begins, cells emit flammable vapours which spread throughout the cabinet.
2. An ignition source (possibly initiated by electrical sparks or the build-up of heat inside the battery itself) results in an explosion/ignition of the gas. The lockEX mechanism releases the explosive energy in a controlled way through a narrow gap.
3. The doors are locked again and the batteries can continue reacting without causing any danger. The cabinet system remains operational and protects the employees and the surroundings.

Battery storage cabinet 8/5

Battery storage cabinet 8/10
with 1 shelf as standard at half height.
Optionally 2 more shelves possible
(see accessories).

BATTERY STORAGE CABINETS

Description		External dimensions cm (l x w x h)	Internal dimensions cm (l x w x h)	Weight approx. kg	Order no.
Battery storage cabinet 8/5	Two battery-operated audible smoke detectors - without power connection, without fan -	80 x 66 x 52	73 x 53 x 45	80	11890
	Additionally with stacking feet*	80 x 66 x 62	73 x 53 x 45	83	11891
Battery storage cabinet 8/10	With stacking feet*, two battery-operated audible smoke detectors - without power connection, without fan	80 x 66 x 111	73 x 53 x 91	132	11898
	With castors, two battery-operated audible smoke detectors - without power connection, without fan -	NEW 80 x 66 x 115	73 x 53 x 91	144	11722

Battery storage and charging cabinet PG 9

For all charging versions:

- heat dissipation by fan during charging
- charging current is interrupted if the doors are opened
- charging stops if a malfunction or accident occurs
- vents sealed with thermocouples

Battery charging cabinet 8/5

- power supplied by 6-way socket power strip (3500 W, 16 A)

Battery charging cabinet 8/10

- Charging versions with 2 vertically arranged 6-way socket power strip for power supply
- 230 V version with 1-phase power supply (3500 W / 16 A)
- 400 V version with 3-phase power supply (2 x 3500 W / 2 x 16 A)

Battery charging cabinet 8/5 Basic

Battery charging cabinet 8/10 Premium Plus 3-phase

TIP: The 3-phase version is necessary if, for example, batteries are to be charged with fast chargers that have a greater current requirement than the 1-phase version can provide.

II versions with audible alarm. Premium and Premium Plus: Now with improved connection option for combination alarm transmitter (12V) and connection to fire alarm system.

Battery charging cabinet 8/10 Basic can be supplied on castors

Special application for fire alarm systems

NEW**Battery cabinets for fire alarm systems:**

The current battery cabinets from CEMO, available in the versions **Premium** and **Premium Plus**, are designed to send the alarm through to an in-house fire alarm system or internal warning device via the voltage-free contact. This means that it is not possible to create a permanent link to a fire alarm system with a direct connection to the fire service.

There are now special cabinet versions that are designed for the fire alarm equipment

to be installed in the cabinets by fire alarm specialists, which will be necessary depending on the requirements on site or the manufacturer-specific system compatibility.

Ask for our "Information sheet for battery cabinets for use with fire alarm systems" and talk to your fire alarm specialist.

Version for fire alarm system:

2x cable ducts for self-installation, for flexible installation of your individual fire alarm

equipment by a fire alarm specialist

Storage cabinet:

Two battery-operated audible smoke detectors

Charging cabinet:

Two battery-operated, audible smoke detectors, power supply in the cabinet with socket strip(s), technical ventilation, power disconnection in case of heat build-up or using a door contact switch

Modular system

Battery storage and charging cabinets

NEW

Thanks to the **modular cabinet concept**, the secure storage space can grow with the needs of the business.

- Variable heights in 62 cm increments (8/5) or 111 cm (8/10)

- Variable subdivision of storage levels: One to four storage levels per 111 cm (8/10)
- Fire chamber-tested, stackable modular system for customised assembly
- Signals (Premium/Premium Plus model

- range) can be linked to several cabinets
- Assignment of task areas to dedicated battery cabinets possible
- Easy to move due to stacking at the installation site
- Simple assembly

COMBINATION OPTIONS BATTERY STORAGE AND CHARGING CABINETS

* Notes:

- Battery storage cabinets 8/10 cannot be placed on top of battery storage cabinets 8/5
- Battery storage cabinets 8/5 may be stacked a maximum of three high
- Battery storage cabinets 8/10 may be stacked a maximum of two high

** Premium/Premium Plus 3-phase variants vary slightly in width and weight

For details on the individual modules see pages 216 and 217.

Battery storage and charging cabinet ACCESSORIES PG 9

- ① Extremely flexible, eg. for cabling of the in-house fire alarm system
- ② Stacking feet, set
- ③ Combination alarm unit (strobe light)
Visual and audible alarms if an accident occurs, enabling additional protective measures to be taken promptly
- ④ Set of two network-capable smoke alarms (audible). Included in "Storage" and "charging Basic" as standard.
- ⑤ Effective aerosol extinguishing agent for lithium batteries, for initial, rapid extinguishing and flame suppression, automatic pyrotechnical triggering, maintenance free
- ⑥ Ideal for making the best possible use of available space and enlarging the storage area for small-cell lithium batteries (bear in mind the total capacity of the lithium batteries in the event of a fire)
- ⑦ Simple relocation in the building and removal in the event of an accident; two of the four steering castors are fitted with an integral foot brake

Forkliftable for simple positioning and rapid removal to the outdoors in the event of a fire

⑧ Shelves can be adjusted to the ideal working height; cabinets can be loaded using a high-platform truck or forklift; including wall mounting materials

③ Combination alarm unit, visual and audible alarm (100 dB) (only for charging Premium and charging Premium Plus)	7.3 x 4.3 x 12.2	-	11389
④ Wireless heat and smoke alarms, set of two, battery operated, network capable, incl. two magnetic plates	ø 12.5 x 4.8	-	11560
⑤ Aerosol extinguisher (0.25 m ³ extinguishing capacity)	ø 6.5 x 3.8	-	11561
⑥ Shelf insert (for floor level or as intermediate level)*	72 x 40 x 3.5	-	11508
⑦ Trolley, 240 kg load capacity, for up to two cabinets 8/5	80 x 60 x 15	11.3	11461
⑧ Rack, for up to two cabinets, including wall mounting (only in combination with stacking feet)	106 x 53.5 x 200	50	11562
Circuit breaker box for 1-phase cabinet 8/10 (delivered fully assembled)	Recommended for socket on the building side without own circuit breaker		11713
Circuit breaker box for 3-phase cabinet 8/10 (delivered fully assembled)			11714

Battery safety storage cabinets PROline 6/20 and 12/20 PG 9

For the storage of low-capacity lithium batteries

Complies with the newest version of DIN EN 14470-1

- 90-minute fire rating in accordance with DIN EN14470-1
- for the storage of new, low-capacity lithium batteries (<100 Wh, see VdS 3103)
- safe 2-point locking for optimal access protection
- locking mechanism activates when closing the doors
- self-closing doors in the event of a fire
- door holding in an open condition as standard
- extra safety: load certification for fan centre of gravity on the top of the cabinet

- height-adjustable spill tray shelves, load capacity 75 kg, grid dimension 32 mm
- for connection to technical ventilation, diameter of ventilation opening DN75
- forklifttable, height-adjustable feet, removable base trim
- earthing point on the outside of the cabinet to avoid ignition hazards due to electrostatic charging
- cabinet body in grey, doors in orange (other colours on request)
- door hinge right or left

Battery safety storage cabinet PROline12/20

Battery safety storage cabinet PROline 6/20

Battery charging cabinet 12/20 FWF90-GS PG 9

for storage and charging of lithium batteries

Fire-resistant secure cabinet, specially developed **for the storage and charging of lithium-ion batteries, as well as for the storage of critical batteries.**

- tested fire rating of 90 minutes from inside to outside according to DIN EN 14470-1
- **maximum temperature rise inside the cabinet of no more than 100K at any temperature measurement point**
- tested fire rating of 90 minutes from inside to outside according to DIN EN 1363-2
- **GS symbol – tested as per testing principle EK5/AK4 22- 01**
- self-closing doors, tested for permanent function with profile cylinder lock

- suitable for the storage and charging of lithium-ion batteries
- **suitable for the storage of critical batteries (detection of deformations, escape of liquids, elevated temperature greater than 40°C)**
- **internal real fire test of a filled cabinet**
- **standard surface in CPL light grey, similar to RAL 7035, non-flammable plate with surface treatment, classified A2 – s1, d0**

Transport of lithium batteries

Lithium batteries are classified as hazardous goods under transport law. UN certification of the container is not sufficient to ensure that all requirements for ADR-compliant transport of lithium batteries are satisfied in all cases.

We therefore advise our customers to familiarise themselves with this topic and to provide comprehensive training for their employees on how to use the containers in compliance with regulations. This includes

knowledge about the official packaging instructions (see table), marking as per ADR and implementing transport. It also covers appropriate handling of damaged lithium batteries, for example.

If transport containers are properly packed according to the hazardous materials regulations, they can often also be used for storage purposes at the company. It is nevertheless advisable to conduct a hazard assessment in line with the situation on site, additionally involving the plant safety officer and possibly the property insurer as well.

Battery system fire protection box Li-SAFE PG 9

Video

Battery system fire protection box

- safe transport and storage system for lithium batteries
- special fire prevention lining made of non-combustible materials
- formable special pads prevent the batteries shifting inside the box (included)
- boxes are stackable and can be interconnected
- two sturdy latches
- two handles for ease of handling
- can be locked with a padlock (not included)
- made of durable, impact-resistant plastic
- including hazardous goods labels

stackable and interconnectable

handles

NEW

formable special pads

fire prevention lining

New size 2-L

POSSIBLE APPLICATIONS:

- UN certification for lithium batteries in packaging group II and III
- for lithium battery weighing up to 5 kg
- transport possible on public roads in accordance with the regulations
- additionally usable as a stationary safety container for storage
- fire-protected storage for transport and on construction sites, for example
- Ideal for new and used batteries and for safe separation (e.g. faulty or quarantined batteries)

Faulty batteries must be transported safely during work.

With UN certification and Fire Safety lining.

Battery system fire protection box Li-SAFE PG 9

Development insights:

All boxes have been tested in battery fire tests with garden tool batteries, here the box 2-S

i Overview of ADR regulations see page 221

Essential if battery-powered devices are used in a company, because batteries can fail at any time (fire hazard).

Successful fire test: the CEMO fire prevention box withstands the flames.

Battery safety barrel PG 9

- 60 litre clamping ring lidded drum
- special valve for pressure relief in the event of damage
- UN certification for hazardous goods belonging to packaging groups I, II or III
- for use with vermiculite as a buffer material
- 60 kg permissible total weight
- ideal for use as a storage bin for damaged batteries awaiting disposal
- certified for the transportation of lithium batteries (UN 3480 and UN 3090) weighing 0.5 – 5 kg

- Special ADR regulations apply for transportation (see special regulations and packaging instructions, p. 202).
- Please observe the enclosed packaging instructions!
- incl. 1/2 filled with vermiculite and plastic bag

Pressure relief in the event of damage in accordance with the pressure cooker principle

Ideal for the safe storage of defective batteries for eBikes, power tools, garden tools and much more.

Description	Dimensions cm (ø x height)	Storage capacity L	Weight when empty kg/ maximum weight	Order no.
Battery safety barrel	38 x 66	60	4.9 / 60	11200

ACCESSORIES

Sack of vermiculite (corresponds to approx. 50 L)	-	-	4.5	11205
Lining bag for battery safety barrel				11232
Plastic bag for single battery	-	-	-	11233

Battery steel collection container PG 9

- 120 litre storage capacity
- ideal for use as a storage container for damaged batteries awaiting disposal
- robust, hot-dip galvanised steel container with sturdy closure buckles
- circumferential rubber seal protects against penetrating moisture
- lid can be opened easily and locked in place in a single step
- can be driven under, stacked and lifted by crane for easy handling
- for use with vermiculite or expanded glass granulate as a buffer material (see page 221)
- UN certification for hazardous solid goods belonging to packaging groups I, II and III

- Special ADR regulations apply for transportation (see special regulations and packaging instructions, p. 221), may only be carried out by qualified personnel.

Battery steel collection container

with vermiculite (see accessories)

Description	External dimensions cm (l x w x h)	Internal dimensions cm (l x w x h)	Storage capacity L	Weight when empty kg / maximum weight	Order no.

Sack of vermiculite ① (approx. 50 L)			4.5	11205
Lining bag for collection container				11231
Plastic bag for single battery				11233

Plastic collection container PG 9

Optimal storage and transport system

- UN-certified storage and transport system for solid hazardous goods (classified in packaging groups II and III)
- high-density, impact-resistant PE plastic (PE-HD)
- stackable and safe to transport
- ideal for collecting lithium batteries for recycling and disposal
- For reasons of fire prevention, use only in combination with suitable buffer material (e.g. vermiculite or expanded glass granulate).
- Observe packaging instructions (e.g. P909, p. 221) for ADR-compliant transport.
- delivery with lid and ratchet straps

Plastic collection container S

Lining bag for plastic collection container S		11229
Lining bag for plastic collection container L		11230
Plastic bag for single battery		11233

Buffer material for storage and transport

Expanded glass granulate and vermiculite

- not flammable
- high thermal insulation
- highly effective at absorbing escaping electrolyte
- not electrically conductive

Both materials have long been tried and tested buffers in hazardous goods packaging. Used carefully, these granulates can prevent flames from spreading from one cell to another. Expanded glass granulate is particularly suitable for lithium battery applications, because it forms a protective shielding layer around the cells in the event of a fire.

Expanded glass granulate

Vermiculite

Description	Filling weight approx. kg	Order no.
Sack of expanded glass granulate (corresponds to approx. 55 L)	12.5	11204
Sack of vermiculite (corresponds to approx. 50 L)	4.5	11205

Collection containers for indoor storage PG 9

Battery disposal box

optimal storage and transport system

- high density PE plastic (HDPE)
- maximum acid resistance
- can be loaded up to 600 kg as individual box, up to 450 kg per box when stacked
- stackable up to 7 boxes
- for transporting old batteries (Rh 2807) in accordance with ADR 4.1.4.1 P801
- stackable and safe for transport
- equipped with three runners
- labelled with hazard warnings

Not certified for storage and transport of lithium batteries.

Box 300 L

Capacity L	External dimensions cm (l x w x h)	Weight approx. kg	Order no.

Mobile box para hazardous materials, certified PG 9

Mobile box

The robust design enables clean and safe storage of hazardous solid goods belonging to packing groups II or III and is also certified for transport according to ADR, RID and IMDG codes. The container (grey), with a capacity of 170 L or 250 L, and lid (coloured) are easy to handle, even when the container is full. The specially shaped lid enables storage in 2-layers. Up to 8 boxes can be safely stacked on a Euro pallet. The beading in the container wall enables emptying with a rotary forklift.

The mobile box is particularly suitable for the following applications:

- collection container for waste and materials such as oil binding agents, paint residues, etc.
- collection and transport container for recycling, cleaning cloths, etc.
- collection container for flammable and polluting substances

Up to 8 containers on a Euro pallet, two layer stackable

Lid with PU seal, fire-classified, light and air-tight for moisture-sensitive material, red lid version

Aerosol spray can collection container PG 9

Mobile collection container for empty and partially empty aerosol spray cans. Tested safety via UN certification 1H2W/X150/S...

- certified for UN 1950 (waste aerosol containers)
- integrated opening to dispose of spray cans when the lid is closed
- lid with rubber seal and sturdy latch
- two integral vents for air circulation in the body

- manufactured in anti-static plastic for additional safety, therefore particularly suitable for installation in side buildings
- large wheels and a heat-treated steel axle for easy movement even when filled; maximum weight up to 150 kg
- grey body, orange lid
- delivery includes nonwoven pads (to absorb leaking fluids) and "UN1950" hazardous goods label
- Observe the relevant packaging instructions for transport under ADR.

Anti-static version:

Extra safety for workshop and industrial use

Important note:

Never dispose of empty spray cans as general waste or together with other waste.

Lid with rubber seal and latch

Volume 120 litres

Sturdy latch

Spray cans can be disposed of without opening the lid

Large wheels and integral vents

Including nonwoven pads

Mobile collection container for aerosol spray cans	49.8 x 55.4 x 96	120	11	11346

Safety disposal container PG 9

Essential for every safety-conscious workshop and industrial building. Ideal for cleaning cloths saturated with flammable liquids, for example.

- tightly sealing lid is designed to prevent self-ignition by excluding oxygen
- self-closing due to maximum opening angle of 60°
- ventilation holes and clearance to the

- ground reduce the risk of overheating
- foot pedal for hygienic hands-free opening
- sturdy design made of painted sheet steel
- wear-free, durable mechanism
- light weight for simple handling and emptying
- suitable plastic bags available separately

Description	Capacity L	Dimensions cm (ø x h)	Weight approx. kg	Order no.
Safety disposal container	22.5	ø 36.5 x 39.5	5.6	11558

Mobile oil suction units PG 4

Pneumatic oil suction unit

Compressed-air operated mobile oil extractor
Ideal for quick oil changes on larger vehicles such as lorries, tractors, and cars, etc. A vacuum is generated in the tank with the aid of compressed air. The oil can then be decentrally extracted from the engines using the extraction probes, independently of a compressed-air connection. Ideal oil temperature 70 – 80 °C. Tank is drained by compressed air.

Technical data 8726 and 10145

- mobile 65 L or 90 L container with level indicator, vacuum indicator and 1-bar relief valve
- compressed-air connection ¼"
- removable tool tray
- extraction hose 2 m with probe adapter
- 7 different flexible and rigid probes; direct adapters for Mercedes, VW, BMW and Citroen
- drain hose 2 m
- max. extraction volume 52 L resp. 75 L
- maximum hopper height 188 cm (model 10145)

Technical data 10690 and 10691:

- mobile 80 L container with level indicator, vacuum indicator and relief valve
- compressed-air connection ¼"
- extraction hose 1.5 m with probe adapter
- 5 different flexible and rigid probes from 5 mm up to 8 mm
- drain hose

OIL SUCTION UNITS PNEUMATIC

65 L	60 x 42 x 86	26.9	8726
90 L, with collection hopper	62 x 42 x 138	38.2	10145
80 L	44 x 49 x 77	24.5	10690
80 L, with collection hopper	58 x 49 x 173	27.5	10691

Electric oil suction unit

The mobile oil suction unit meets the growing requirement for sucking waste oil directly out of a car engine via the oil dipstick seating. An integral 12 L reservoir container can hold the removed waste oil directly. The oil suction unit has a special self-priming centrifugal pump which can produce very high vacuum pressures.

Technical data

Mobile frame complete with:

- self-priming centrifugal pump, 230 V, delivery rate 2 to 10 L/min

- vacuum gauge for checking the pump's operation and for successful emptying
- suction hose with fast connection for the probes
- 4 different suction probes (semi-rigid probe dia. 6 x 800 mm, semi-rigid probe dia. 8 x 800 mm, rigid probe dia. 8 x 650 mm, rigid probe dia. 9 x 650 mm)
- removable probe holder with liquid-tight base for collection of any oil drops
- removable transparent collection container 12 L
- suitable for oils up to SAE 140

OIL SUCTION UNIT ELECTRIC

Description	Dimensions cm (l x w x h)	Weight approx. kg	Order no.

EXTRACTION AND REFUELLING TROLLEY FOR PETROL

2-stroke mixture and diesel

Used in the event of misfuelling, accidents, vehicle returns, etc.

- with flashback arrester in filler neck
- 2 m extraction hose DN 10 and 3.2 m delivery hose
- operated with 12 V electric pump
- 4.1 m connection cable and earthing cable with crocodile clips
- automatic dispensing nozzle, hose certified for petrol

- switch between extraction and dispensing via ball valves
- flexible probe dia. 8 mm/1.500 mm
- flexible probe dia. 12 mm/700 mm
- adapter for dia. 6 mm hose
- adapter for dia. 10 mm hose
- holder for probes and adapter (not mounted on trolley)

Description	Dimensions cm (l x w x h)	Weight approx. kg	Order no.
Electric extraction and dispensing trolley 95 L	100 x 56 x 48	23	10762

MOBILE EXTRACTION UNIT FOR FUELS

Petrol, diesel and oil

Unit suitable for vehicle and small tank extraction. Suitable for use in potentially explosive atmospheres. Compliant with the Occupational Safety Directive and the 1999/92/EG (ATEX 137) guidelines on workplace health and safety protection.

- complies with the Explosion Protection Directive ATEX 94/9
- 2 m extraction hose and 2 m drain hose
- operation with compressed air, including pressure reducer and maintenance unit
- load bearing surface of the transport trolley suitable for existing canisters or tanks up to 60 kg
- earth cable, 3 m with clip
- with suction lances Ø 8 mm and Ø 12 mm
- with adaptors for Ø 6/8/10 mm hoses

Description	Dimensions cm (l x w x h)	Weight approx. kg	Order no.
Mobile extraction unit for fuels, 2 stroke mix, diesel and oil	50 x 50 x 100	19,5	10090

Used oil collector PG 4

Mobile used oil collector 80 L

- with collection hopper and fill level display
- emptied using compressed air
- safety valve

Description	Dimensions cm (l x w x h)	Weight approx. kg	Order no.
Mobile used oil collector, 80 L	44 x 49 x 173	25	10692

Mobile used oil collector
80 L

MOBILE collecting and transport container for hazardous materials (HazMat) PG 4

Mobile hazardous substance collector GS-MOBILE for flammable liquids with general construction inspection certification no. D/BAM 6744/31A (400 L, 600 L) and D/BAM 6743/31A (980 L) indefinite certification period

The collection, storage and transport container for flammable liquids without a sump/spill pallet (e.g. waste oil of unknown origin, solvents, thinners and many more).

The integrated forklift pockets enable easy and safe transport. An integrated funnel with a dirt sieve and a fixed installed suction pipe with tanker coupling simplify filling and emptying. Can be used by anybody.

Design: explosion shock-proof

980 L

400 L

GS-MOBILE FOR A I TO A III AND B AS DESCRIBED ABOVE

Go-box for absorbents PG 9

- for granulates, absorbents, etc.
- for indoor and outdoor use and storage
- sturdy rubber wheels
- angled lid so that water runs off
- with eccentric stainless steel latch
- can be locked with a padlock (not included), see page 260
- user-friendly, ergonomic handle
- 70 L capacity
- lid locks open for loading/unloading
- easy to handle thanks to sophisticated balance
- easy to clean
- made of chemical-resistant PE – 100 % recyclable
- partition for insertion into the grooves of the Go-box as an accessory

Accessory: partition

Description / Capacity L	Dimension cm (h x w x d)	Weight approx. kg	Order no.
Go-box 70 for absorbents	107 x 59 x 39	10	11449

ACCESSORIES

Overpack drum	78.7 x 104.7	360	22.5	11023

Nozzle holder for 60 L and 200 L drum PG 4

Nozzle holder for 60 L and 200 L drum

- holder made from galvanised metal bracket with clamping screws and plastic holster for catching drops
- suitable for attaching to tight-head steel drums and L-ring plastic drums
- easy removal of holster for emptying and cleaning

ACCESSORY NOZZLE HOLDER FOR DRUMS

Description	Order no.
Nozzle holder for drums complete with clamping screws and drop holster	11044

Funnels / collection trays PG 9

GRP funnel

- with and without lid
- for placing on drums
- secure seating
- no risk of spillage

PE collection trays

- with swash edge to prevent content spillage
- pouring spout for transfilling
- robust carrying handles
- acid, chemical, oil and petrol resistant
- sizes 15 L and 58 L sealable, provided with holder(s) for oil filters
- version 58 L also mobile (wheels on one side)
- sizes 20 L and 55 L with a 4-chamber system for safe transportation and for emptying using the 4 edges with spouts

PE collection tray 20 L with GRP funnel without lid

GRP funnel for drum use
60 L and 200 L

Cemsorb absorbents “Universal” and “Oil” PG 9

Cemsorb absorbents are high-performance absorbents to absorb accidentally discharged or spilled hazardous substances without delay or to prevent them from spreading.

The area of the accident or the workplace is soon ready to use again.

- Thanks to their high calorific value, they are well suited for thermal utilisation by incineration.

Cemsorb absorbent “Oil” blue

Cemsorb absorbent “Oil” was developed to absorb oil and oil derivatives. Cemsorb oil absorbent is hydroscopic; it does not absorb water.

Advantages:

- Cemsorb absorbents absorb up to 18 times their own weight in fluids.
- Cemsorb absorbents are simple and easy to use. Simply place them on the spilled fluid, and the fluid is quickly absorbed.

Cemsorb absorbent “Universal” grey

The Cemsorb absorbent “Universal” was developed to absorb all types of fluids. We do not recommend using it on water surfaces. Please use the Cemsorb absorbent “Universal” to absorb small quantities of different technical fluids.

Cemsorb cloths „Oil”

Cemsorb cloth roll “Oil”

Multiple Cemsorb cloth rolls “Universal”: both sides reinforced, lint-free and perforated

Cemsorb carpet “Oil”
Non-slip, dense, reinforced

CONTAINERS FOR TRANSPORT AND STORAGE

Load securing – Responsibility

Experience shows that loads are often insufficiently or incorrectly secured. Securing the load properly makes a significant contribution to safety during transport, because insufficient load-securing measures cause damage to the cargo and may cause damage or injury to uninvolved third parties. It is therefore essential to know the relevant legal conditions and to be aware of the resulting responsibilities.

This summary is intended to give an overview with regard to responsibilities in the area of securing loads.

Under German law, the loader/sender (e.g. loadmaster of the sender), the haulier and the vehicle operator as well as the vehicle owner are assigned responsibilities in the area of securing loads. With regard to responsibility, a fundamental distinction must be made between civil responsibility and public responsibility.

1. Civil responsibility

1.1. Load made safe for conveyance (loader/sender):

he loader/sender must place the goods on the load surface, and has the obligation to secure the goods (by means of lashing straps, chains, chocks or other suitable aids) and to stow (load) them so that the goods are secured against falling over and moving around on the load surface as a result of dynamic influences during transport (e.g. knocks, vibrations, braking manoeuvres) as well as against falling from the vehicle.

1.2. Operationally secure loading (haulier):

The haulier is to provide a suitable vehicle with appropriate devices for securing the load (e.g. lashing points) and to ensure that operational safety is not impeded and that the vehicle is fully functional at all times. Furthermore, the haulier is responsible for adhering to the dimensions, axle loads and total weight as well as the load distribution plan.

IMPORTANT: If the haulier transfers the load to another vehicle during transport, the haulier shall be liable for this transfer. In this case, the haulier is liable for any insufficient securing of the load and possible loading errors that arise from the transfer procedure.

2. Public responsibility

The provisions of StVZO [German Road Vehicle Registration Regulation] and StVO [German Road Traffic Regulation] are of importance for securing loads that are subject to **statutory obligations**. **Anyone who does not wish to accept public responsibility in road traffic and does not comply with his/her duty to secure the load can be punished with fines or entries in the central register of traffic offenders and in the central commercial register. In case of negligence, or if regulations are intentionally ignored, criminal proceedings can also be initiated. This applies to the load / sender, haulier, vehicle operator and vehicle owner.**

Statutory regulation of load securing in the public domain:

2.1. Sec. 22 para. 1 StVO: Load

The load, including equipment for securing the load and loading devices, are to be stowed and secured so that they are unable to slide, fall over, roll around or fall off, even under full braking or sudden swerving, or produce avoidable noise. The recognised rules of the technology are to be observed. Responsible: Loader/sender and vehicle operator.

2.2. Sec. 23 para. 1 StVO: Other obligations of the vehicle operator

The vehicle operator is responsible for ensuring that his view and hearing are not impeded by the occupants, animals, load, equipment or condition of the vehicle. He/she must ensure that the vehicle, the tractor, the tractor-trailer combination and the load and the occupants are in compliance with regulations and that the road traffic safety of the vehicle is not impeded by the load or the occupants. He/she must also ensure that the prescribed labelling is always fully legible. Prescribed lighting equipment must be available on motor vehicles and their trailers as well as on bicycles, even during the day, and operationally ready, but otherwise only if it is anticipated that the vehicle is still in traffic when lighting is required (Sec. 17 para. 1).

2.3. Sec. 30 para. 1 StVZO: Condition of the vehicles

Vehicles must be manufactured and equipped so that

- a) their usual operation in traffic does not harm anyone or endanger, obstruct or impede anyone more than unavoidable.

- b) the occupants, especially during accidents, are as well protected as possible against injury and that the extent and consequences of injuries are kept to a minimum.

2.4. Sec. 31 para. 2 StVZO: Responsibility for operation of the vehicles

The vehicle owner is not to arrange or permit operation of the vehicle if he is or is required to be aware that the vehicle operator is not suitable to operate the vehicle independently or that the vehicle, the tractor, the tractor-trailer combination, the load or the occupants are not in accordance with regulations or that the road traffic safety of the vehicle is impeded by the load or the occupants.

3. Summary

The securing of loads is prescribed by Sec. 22 para. 1 StVO. A person who secures the load as a result of this is defined under civil law (see 1. Civil responsibility).

Responsibility for securing the load is transferred to the vehicle operator by Sec. 23 para. 1 StVO.

According to Sec. 30 para. 1 StVZO, the vehicle owner is to use a suitably equipped vehicle and to ensure (see 2.4. Principle Sec. § 31 para. 2 StVZO) that this equipment is sufficient for performing the transport in question.

The acknowledged rules of the technology (Sec. 22 para. 1 StVO; e.g. VDI guidelines 2700 and DIN EN standards) are to be observed when securing loads. The actual measures for securing the load must be carried out on the basis of these rules. Anyone wishing to delegate public responsibility for securing the load through agreements or instructions (e.g.: to the haulier) must observe the following:

- An explicit instruction / order must be available
- The instructed individual must be professionally suitable and technically able
- to perform random inspections in order to check the transferred obligations for proper execution.

The inspections are to be documented. If safety defects are found, measures are to be taken to eliminate these.

Importance for CEMO products

The fundamental health and safety requirements for CEMO products put into circulation or transport are complied with. Attention is paid during design and subsequent production to ensuring that the products are equipped with suitable devices for load securing (e.g. transport packaging, lashing points, sufficiently dimensioned contact areas etc.). In this way, risks caused by falling or ejected objects, risks from surfaces, sharp corners and edges as well as risks from loss of stability (e.g. from small contact areas) are avoided.

In this way, as long as the statutory conditions for securing loads are complied with, an uncontrolled change of position during transport and other general safety risks with regard to the conveyance are precluded.

1. Load securing for CEMO drums

1.1. Anti-slip mat (frictional connection)

Anti-slip mats are virtually standard these days as a means of securing loads. The frictional forces prevent the load from slipping and support all load securing measures. The coefficient of sliding friction μ is always less than 1. Example: The coefficient of sliding friction between metal and wet wood is generally about 0.2-0.25 μ . When using an anti-slip mat, the coefficient of friction increases to 0.6 μ . This corresponds to a load securing of 60% through friction alone! The consequence of this is that it may be possible to reduce the number of lashing straps.

We recommend placing anti-slip mats under the support runners on each side when loading CEMO drums, in order to increase the friction coefficient. If several mats are used, they are to be arranged so that no parts of the support runners remain in contact with the vehicle load surface.

1.2. Lashing straps

(positive fit through lashing down)

Lashing straps, ropes and chains must be used in accordance with the manufacturer's instructions and discarded as necessary. In the case of lashing straps, the permissible tensile force of the strap material must not be confused with the pretension force of the ratchet when lashing down. The necessary indications on tensile force, manual force and clamping force can be found on the label of the lashing equipment.

For the purpose of supplementing the fixing methods in 1.1 and 1.3, the CEMO drum is to be additionally tied down with 2 lashing straps and fixed to the lashing points of the vehicle's load surface on both sides. In principle, the number of lashing straps is based on the weight of the load and the measures used according to 1.1 and 1.3.

1.3. Holder for tension chain (positive fit through direct lashing)

CEMO support rails are equipped as standard, or can be retrofitted, with holders for tension chains with a max. tensile force of 2000 daN. When using tension chains, the number of lashing straps can be reduced (see 1.2).

1.4. Locating surfaces (positive fit)

If possible, locating surfaces are also to be used for securing loads. The forward load space limit (front wall) can be used in addition to installed blocking devices, taking into consideration their strength and the vehicle-specific load distribution plan.

1.5 VDI (Association of German Engineers) guidelines

The following guidelines for securing loads are to be observed:

- VDI 2700 Securing loads on road vehicles
- VDI 2700a Evidence of qualification to secure loads
- VDI 2700 Sheet 1 Training and raining contents
- VDI 2700 Sheet 2 Lashing forces
- VDI 2700 Sheet 3.1 Instructions for using lashing equipment
- VDI 2700 Sheet 3.2 Equipment and aids for securing loads
- VDI 2700 Sheet 4 Load distribution plan

Guideline VDI 2700 Securing loads on road vehicles is the standard work that presents the principles and proven methods for securing loads.

Securing loads with anti-slip mats and lashing straps (lashing down) using the example of a 2000-litre mobile irrigation system

GRP tanks

CEMO tanks are manufactured from GRP (glass-fibre reinforced plastic) using state of the art technology. The vacuum injection method used enables rationalised manufacturing of widely varying sizes and tank shapes.

The finished products have smooth surfaces on both sides and a uniform wall

thickness. Both tank halves are joined together, by a smooth, absolutely leak-free laminate seam, into a single tank unit. CEMO tanks thus guarantee an optimum quality standard, for safe use over many years.

large filling dome for efficient filling and transportation

resistant to chemicals, e.g. ammonia-nitrate-urea solution, pesticides

smooth inner walls, therefore easy to clean

durable - weather and corrosion resistant

translucent tank walls for easy level monitoring

up to 70 % lighter than steel tanks

GRP is easy to repair

Special drum version with air vent in the dome cover and filling connection with air gap

TANKS

INDIVIDUAL ATTACHMENT AND INTEGRATION COMPO- NENTS WITH A WIDE RANGE OF FITTINGS

To ensure safer transport, CEMO tanks can also be equipped with baffles.

The CEMO 3-hole flange enables trouble-free mounting of a wide variety of fittings.

CEMO standard tanks are available in oval, trunk and box shapes for a very wide range of applications. From 200 L - 15500 L.

CEMO pasture water tanks have special light protection to prevent algae growth. They have an opaque colour and are thus particularly UV-resistant.

Intended specially for use on Unimog vehicles there are oval or trunk-shaped tanks of 1000 - 5000 L, high-speed versions with baffles also available.

For municipal use, CEMO offers mobile irrigation systems of 1000 - 6000 L with a variety of optional accessories.

Example of use:
Sewage disposal from trains belonging to the Deutsche Bahn (German Railways).

GRP tanks oval PG 8

Oval tanks made from glass-fibre reinforced plastic, GRP

- for zero-pressure operation
- basic model: filling dome dia. 360 mm with quick closing lid or filling dome dia. 420 mm with flap lid
- vent valves fitted in the lid
- outlet opening with 3-hole flange connection
- fixed support runners attached (high pressure impregnated wood, above 7000 L – steel)
- high-speed model: additional baffles in the top and bottom tank halves

	10771
	5790

GRP tanks trunk-shaped PG 8

Trunk-shaped tanks

- made from glass-fibre reinforced plastic, GRP
- outlet opening with 3-hole flange connection
- steel support runners

Advantages of GRP tanks, trunk-shaped:

- optimal utilisation of the loading area
- more transport volume for permissible total weight compared to steel tanks
- remnants discharge

Tanks for Unimog, Multicar and Pfau:

- filling dome dia. 420 mm and flap lid
- compact shape with vaulted ends (top and bottom)
- baffles in top and bottom tank halves
- vent valves fitted onto the lid
- outlet opening with 3-hole flange connection
- intersecting baffles

PE tanques rectangulares PG 8

- made of high quality, age-resistant and recyclable polyethylene.
- manufactured in one piece using centrifugal moulding
- space-saving, trunk-shaped design
- low centre of gravity
- footprint for the 600 L tank matched to Euro-pallet dimensions
- 2000 L tank fits across a Unimog load-bed
- 2" internal thread connection with indentation on the end
- discharge opening with 3-hole flange connection and indentation (in 600 – 2000 L tanks)
- 2" internal thread connection options on the long sides (2000 L + 3000 L tank)
- option of installing the proven CEMO 3-hole flange onto the 2000 L tank
- 1" internal thread fitting for complete drainage
- 380 mm diameter dome with swash baffle and hinged cover
- vent valve installed on the hinged cover
- handles and lugs for tensioning belts
- integral securing flange for direct mounting on the vehicle loadbed

Valve available as an accessory

2000 L

dome with swash baffle and hinged cover

mounting flange
up to 2000 L 3000 L

stainless steel flange plate with threaded nipple (see p. 244)

1" internal thread fitting for complete drainage

double male connector, as an accessory

PE pasture watering tank, trunk-shaped, impermeable to light and coloured green to prevent algae growth.

	for PE tank 3000 L, trunk-shaped	11517

Additional accessories
see page 244.

ACCESSORIES FOR PE PASTURE WATERING TANK

Description	Order no.
 Single attached drinking trough *	600 L
	1000 L
	2000 L
 Mounting flange for 2 drinking troughs*	1056
 Example: In conjunction with the optional side outlets on the 2000 L PE tank, a maximum of 6 attached drinking troughs is possible with order no. 1056 and 5790. Frame with the minimum dimensions 149 x 120 x 16 cm (l x w x h) required (additional item).	5790

* Accessory installation kit 8445 required (see page 244).

Tanks box-shaped PG 8

Box-shaped tanks

made from glass-fibre reinforced plastic, GRP.

- flat bottom, so no support runners necessary
- strong, all-round gripping rim

GRP TANKS BOX-SHAPED

Description / Capacity L	Dimensions cm (l x w x h)	Filling hole / Dome ø in mm	Weight approx. kg	Order no.
Box-shaped tank, GRP, 200 L	87 x 57 x 57	Filling hole ø 190 mm	12	1043
Box-shaped tank, GRP, 400 L	122 x 62 x 72	with screw cap	19	1045

Tanks, trunk-shaped

made from high-quality, hard-wearing, recyclable polyethylene

- 125 L, 200 L, 450 L or 600 L
- manufactured in one piece using centrifugal moulding
- with S160 x 7 screw cap
- screw cap with integrated vent and pressure relief
- filling hole internal diameter 140 mm
- integrated recesses for securing with ratchet straps during transport
- integral forklift pockets and handles
- integral baffle with 450 L and 600 L models
- 2-tier stackable, with stacking cams
- ideal dimensions for transportation

Various sizes from 125 L to 450 L (600 L not illustrated)

With outlet tap accessory

Stackable, with stacking cams, integral forklift slots and handles

Mobile irrigation system BWS 500 PG 8

Mobile irrigation system BWS 500 for vehicle load-beds or stationary operation

Oval tanks:

- made from glass-fibre reinforced plastic, GRP
- models above 4000 L with baffles
- with extended steel runners
- mounting bracket for pump installation
- stainless steel flange plate with threaded nipple 2"
- filling dome dia. 360 mm with quick closing lid, capacity up to 1500 L
- filling dome dia. 420 mm with flap lid above 2000 L
- vent valves fitted in the lid
- Example application:
Suitable for professional irrigation of large areas and parks and thus the ideal system for municipal or commercial users.

Example: foldable hose reel, ratchet straps not included in the kit

ADD-ON PARTS PUMPS AND HOSE REELS

DEPENDING ON THE APPLICATION, THE IRRIGATION TANK SYSTEMS CAN BE ASSEMBLED FROM THE COMPONENTS LISTED BELOW. THE EQUIPMENT TANK IS SUPPLIED COMPLETELY ASSEMBLED.

Description	suitable for equipment tanks	Order no.
① Motorized pump 500 L/min with petrol engine Integrated pump, with suction and pressure connections switchable using 3-way valves	all sizes	10540
② Pump 100 to 350 L/min (not self-priming), with hydraulic motor including flow control valve, permanently installed, with suction pressure connection, adjustable via 3-way valves		10541
③ Pump up to 60 L/min, 24 V / 19 A / DC, with switch and plug, pump permanently installed, with 1" suction and pressure connection, convertible via 3-way valve		10861
④ Swivel-mounted hose reel, vertically adjustable 145 mm (with connection hose to the pump) for 80 m water-hose ¾" or 35 m water hose 1" * (accessory)		10542
⑤ Automatic hose reel with spring-loaded retraction Painted steel, swivelling (with connecting hose to the pump), for 40 m water hose ¾" or for 30 m water hose 1" *(accessory)		10862
⑥ Foldable hose reel for high vehicles (without hose) securely mounted; for 80 m water-hose ¾" or 35 m water hose 1" *		10543

* Please note that the pump output can fall sharply depending on the length and cross-sectional area of the hose.

Other pumps on request.
Further accessories see page 244 and 246.

ACCESSORIES FOR MOBILE IRRIGATION SYSTEM BWS 500

Description		suitable for equipment tanks	Order no.
Factory fitted	Forklift pockets with supports at the front and rear. Insertion profile 160 x 70 mm, distance between rail centres 700 – 1000 mm (empty tank)	1000 L up to 5000 L	7146
		6000 L	7147
	C-filling coupling with free flowing path, complete with slider for tank filling (fig. page 246)		5689
Supplied unassembled	PVC pressure hose, dia. 60 mm, length 3.5 m; C-coupling at both ends, can also be used to extend the suction hose		5774
	PVC suction hose, dia. 60 mm, length 3.5 m; with strainer and C-coupling at one end		5775

Mobile irrigation system BWS 130 PG 8

Mobile irrigation system BWS 130

- light and robust construction
- simple handling due to low weight
- suitable for all oval tanks of 600 – 5000 L capacity (see page 228)
- hose reel can be swivelled through 135° (without hose) accepts 80 m water hose ¾" or 35 m water hose 1"
- pre-assembled unit
- Example application:
Suitable for irrigating green spaces and parks. This system offers an optimum price-performance ratio for gardening and landscaping service providers as well as for many other service providers (e.g. building cleaning).

The displayed ratchet straps are not included in the system

Accessories see page 246.

ADD-ON PUMP WITH HOSE REEL (FOR RETROFITTING EXISTING TANKS)

Description	Dimensions cm (l ¹ x w x h)	Total weight approx. kg	Order no.
 <p>Add-on pump consisting of:</p> <ul style="list-style-type: none"> • Honda pump (petrol engine), self-priming, output rate approx. 130 L/min, • pump capacity up to 3.5 bar * • hose reel (without hose) • mounting bracket pre-assembled 	70 x w ² x 96	75	7740

¹ = increase in tank length ² = maximum tank width

Mobile irrigation system BWS 130-PE PG 8

The irrigation system enables:

- irrigation: circuit with a safety inlet valve before the pump
- tank can be filled at a standpipe via the 3-way valve system (7 m hose included)
- mixing of optional additives possible using closed circuit in the tank (e.g. fertilisers, pesticides).

BWS 130-PE consisting of:

- frame and mounting surface made from galvanised steel (with mounting points)
- Honda pump with petrol engine 130 L/min* output rate
- pivotable hose reel (without hose) for 80 m water hose ¾" or 35 m water hose 1"
- pressure relief valve to protect the motorised pump
- ratchet straps
- frame with bi-directional forklift pockets
- version with optional baffles available, see below

Setup and securing of the ratchet strap

Bi-directional forklift pockets front and back

Forklift pockets at the side

Honda pump with petrol engine
130 L/min

For the trunk-shaped PE tanks, see page 248.
Accessories see pages 249 and 255.
Further pumps on request.

Mobile irrigation system BWS 130-PE with electric pump PG 8

- version with pump 12 V or 24 V, 60 L/min
- the quiet alternative for mobile irrigation of plants in residential areas, parks and cemeteries
- optionally available with lithium-ion battery (charger incl.) for totally mobile, cable-free operation
- mixing of optional additives (e.g. fertiliser, pesticides) possible using closed circuit in the irrigation system
- galvanised steel frame forkliftable from four sides
- pivotable hose reel (without hose) for 80 m 3/4" water hose or 35 m 1" water hose
- version with optional baffles available, see below

Mobile cleaning and weed control system

MCS 1000 HD PG 8

The mobile cleaning and weed control system enables you to work independently of electricity and mains water. It consists of the following components:

- 600 L, 1000 L or 2000 L PE tank with baffle
- runners and frame made from galvanised steel (with mounting points)
- frame with integral forklift pockets on both sides and at the front

- ratchet straps
- heated Kärcher high-pressure module HDS 1000 De (diesel operation) with high-pressure gun
- hose reel with 20 m of high-pressure hose (optional)
- hose reel with 40 m of high-pressure hose (optional)
- cleaning gun
- with weed control attachment kit

- (temperature sensor). This ensures a constant water temperature of 98 °C at the outlet of the weed control lance
- weed control lance for weed removal without chemicals (optional)

Polyethylene storage tanks PG 8

- **Storage tanks and large reservoirs:** for above ground installation in the garden or for trade and industry
- can be used as water butts for garden watering
- protect water against subsequent dirt collection
- manufactured from high-quality polyethylene
- the green containers are opaque so as to limit algae growth
- can be completed by the addition of custom equipment so they fulfil particular purposes
- can also be installed as a tank battery (except storage tank 5000 L).
- **Storage tanks:** food safe (except storage tanks 1000 L and 5000 L) meet the requirements of the German Environment Agency for plastics in drinking water.
- **Large reservoirs:** are primarily for commercial water use, e. g. in market gardens, washing installations and industrial concerns, but are also suited to rain water storage in the domestic market.

Storage tank 750 L
with 3 x 2" connections
and 1 flange connection

Storage tank 1000 L with large inspection dome,
1 x 2" connection and 1 flange connection

Storage tanks with large inspection dome,
2 x 2" connections and flange connection
(1100, 1500 and 2000 L with steel bands)

Large reservoir with large inspection dome,
1 x 2" connection and 2 flange connections (2000 and 3000 L)

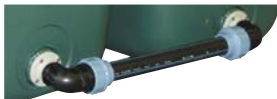

Storage tank 5000 L
with 3 x 2" connections and 1 connection S 160 x 7

Accessories for storage tank 5000 L on request.

Rectangular containers, GRP

Rectangular containers made from glass-fibre reinforced plastic, GRP.

For wherever transport and storage containers with particularly high strength, low weight and extreme resistance to corrosion are required.

- ✓ sizes 100 L to 4500 L
- ✓ reinforced handling rim
- ✓ corrosion resistant and extremely light
- ✓ very strong and rigid
- ✓ stackable
- ✓ UV-resistant
- ✓ smooth inside and outside surfaces for easy cleaning
- ✓ various transport accessories, e.g. removable foot and castor support frame with centering lugs

forkliftable

Integrated forklift pockets for pallet truck and forklift (200 L and 400 L).

stackable

Sideways stackable for space-saving storage and easy separation.

Can be stacked with closed stacking lid (200 L and 400 L).

Our PREMIUM product line GRP

Due to the excellent material properties created by reinforcing the three-dimensionally meshed duroplastic material with glass-fibres, GRP has been used for decades to make high-performance products that are expected to have a large service life in tough environments and at the same time ensure high levels of safety. GRP combines the positive properties of steel and plastic.

RECTANGULAR CONTAINERS

flat lid

GRP lids are available for each rectangular container ranging in size from 100 L to 4500 L. For large containers of 4500 L also with integrated locking lid with Ø 380 mm.

smooth surfaces and reinforced handling rim

Less dirt thanks to smooth external walls (dirt not able to build up); no residues left behind after draining and easy to clean thanks to smooth internal walls in the container. The reinforced edge prevents any deformation and therefore a high-precision fit for the seal of the optional lid. It also guarantees excellent inherent rigidity, even with heavy contents.

screw-in threaded connector

Screw-in threaded connector and screw-through threaded connector as well as drain taps are available as accessories.

forklift pockets

The forklift pockets are mounted impervious to fluids and suitable for rotary forklifts.

castor frame

Accessory:
castor frame with centering lugs.

steel base frame

Accessory:
steel base frame with centering lugs.

Rectangular containers PG 8

Containers with forklift pockets:

- forklift pockets attached in a leak-proof manner using stainless steel coach bolts
- suitable for rotary forklifts, insertion dimension of forklift pockets 160 x 70 mm

Large containers:

- container (grey) in GRP
- for use as a storage and collection container
- chemical-resistant
- can be installed above ground as well as below ground level
- hot dip galvanised external braces for above ground installation
- stainless steel internal braces for installation in the ground

Rectangular container, for example with castor frame (accessory)

Large container: Hot dip galvanised external braces for above ground installation. Stainless steel internal braces for installation in the ground.

One CEMbox – many benefits

stack-able

All models are moulded with lugs and recesses that allow them to be stacked safely and securely.

load-able

The lid is double-walled, therefore particularly stable and robust, and sealed to provide effective protection against the elements.

carry-able

With a CEMbox you have everything in hand. Ergonomically moulded carry handles allow for comfortable lifting by one or two people.

access-able

The 750 litre CEMbox with a side door offers easy and comfortable access from street level, when mounted on a vehicle.

The CEMO tool box for professionals

When you store your goods in transit in a CEMbox you can rest assured that they are safe and protected against outside influences. The CEMbox – the small, smart container for goods in transit.

transport-able

The CEMbox's robust design allows an impressive load bearing capacity of up to 400 kg. Except for the 150 litre box, moulded forklift pockets make handling easy.

crane-able

Crane frame with pivoting crane eyelets (for CEMbox 400 L and 750 L for use with cranes)

The CEMbox can be equipped with a frame to allow them to be suspended and lifted around a work site using a crane (except 150 L box).

lock-able

Adjustable toggle latches with padlock loops help prevent unwanted interference with the contents of your CEMbox.

roll-able

The trolley version of the 150 litre CEMbox provides a convenient solution for movement on site.

label-able

The 150 and 400 litre versions have a moulded recess to allow for marking and labelling.

adapt-able

A range of useful accessories allows the Cembox to be used in a variety of ways. Compartment dividers, installable and stackable trays, foam inserts and more provide for extensive individual adaptation.

CEMbox PG 8

CEMbox, PE

- grey/orange or yellow box made of high-grade PE
- for transport and storage of tools and small parts
- ideal length for shovels
- side door optional (750 L box)
- optimal dimensions for flatbed vehicles
- stackable, with locating lugs and recesses
- forklift pockets (except 150 L box)
- integrated handles

- cover stop
- 3 toggle latches (750 L box) or 2 toggle latches (150 L, 250 L or 400 L box) made of stainless steel
- space for label pocket (150 L and 400 L box)
- water ingress prevented by integral seal around entire lid
- partition that fits in the grooves of the toolbox as an accessory
- insert tray accessory for delicate tools (e.g. spirit level)

CEMbox suitable for use with cranes:

- reinforced design with crane lugs and sturdy crane frame (250 L, 400 L and 750 L box)

Go-Box PG 8

- for grit, sand, absorbents, etc.
- for indoor and outdoor use and storage
- sturdy rubber wheels
- angled lid so that water runs off
- with stainless steel toggle latch
- can be locked with a padlock (not included), see page 273
- user-friendly, ergonomic handle
- 70 L capacity
- lid in a vertical position for filling/emptying
- easy to handle thanks to sophisticated balance
- easy to clean
- made from chemical-resistant PE – 100 % recyclable
- partition for insertion into the grooves of the Go-box as accessories

WINTER SERVICE | SPREADERS

CEMO grit bins

CEMO ensure that your grit is well protected in all weather and ready for action when needed.

- ✓ Material: GRP – durable, tough, rustproof, resistant to salt
- ✓ 20-year service life, 10-year warranty (!)
- ✓ Impact-resistant, able to withstand a blow from a hammer, and inherently robust
- ✓ Temperature- and UV-resistant
- ✓ Protected against water and humidity
- ✓ Well-conceived design for ease of use

smooth surfaces

Less dirt thanks to smooth external walls (dirt does not accumulate); no residues left behind after draining and easy to clean thanks to smooth internal walls in the container.

clean closing

Long-lasting, secure closure thanks to the moulded container edge and overhang which prevent the ingress of dirty water and moisture.

stackable

Sideways stackable for space-saving storage and easy separation.

vandalism-proof lid

Extremely impact-resistant and inherently robust material ("hammer test"), plus increased wall strength (for 550 L and 700 L containers).

lockable from 550 L

Easy to open from outside and inside with a self-locking stainless steel spring closure. Lockable by means of a padlock (accessory)

Video
grit bin PLUS3

CEMO grit bin Plus3

The new grit bin generation **Plus3** adds **three** further plus points to the benefits of our GRP grit bins in terms of handling and assembly.

The additional benefits of the Plus3 grit bin:

- ① can be stacked with closed stacking lid
- ② forkliftable
- ③ lid can be removed without using tools

Can be stacked with closed stacking lid.

Can be lifted with pallet truck and forklift (version 200 L and 400 L).

The lid can be removed without tools. It can be locked simply using removable support bar (400 L).

The lid can be removed without tools. It can be locked simply using removable retaining straps.

Grit bin Plus3 PG 8

As the market leader for grit bins, we receive extensive feedback and a large number of requests. For many local authorities, simple use and handling are paramount. The ability to move with a forklift and stack the containers makes it so much easier to move grit bins in and out of storage and saves time and space.

In addition, tool-free assembly of the very robust lid has been significantly simplified.

The new grit bin generation Plus3 adds three further plus points to the benefits of long-life GRP grit bins in terms of handling and assembly.

- Grit bins Plus3**
The additional benefits of the Plus3:
- forkliftable (optional)
 - can be stacked with closed lid (optionally lockable with padlock, for accessories see page 282)
 - lid can be removed without using tools
 - with support strut for lid (400 L version)
 - strong and robust lid shape

Yellow base and yellow lid version (200 L) without access chute

400 L forkliftable with access chute lockable with optional padlock

can be lifted with pallet truck and forklift

can be stacked with closed lid

Grit bin PG 8

- container and lid in glass-fibre reinforced plastic, GRP
- GRP grit bins are 100 % corrosion- and weather-proof
- stainless steel spring closure, self-closing
- simple opening from the outside and inside
- simple, safe handling
- space and time-saving to store and remove from storage (stackable)
- simple assembly, supplied with lid unassembled
- from 550 L - 700 L with removable retaining straps for lids
- from 1100 L to 2200 L (standard) with stainless steel locking lid stays

Grit bin handling PG 8

Loading frame for loading and emptying of filled GRP grit bins with a truck crane.
This innovative handling concept was developed in conjunction with municipal authorities.

Based on the grit bin, it is now possible to make full use of the advantages (tool-free lid removal). Using the hydraulic loading bracket, the grit bin can now be picked up, emptied and stored by a single person reducing time, space and personnel costs.

Engaging the loading frame from the side after removal of the removable lid (shown with 700 L grit bin)

Lifting the container (shown with 200 L grit bin)

Tipping the grit out onto a truck platform (shown with 700 L grit bin)

Loading frame hydraulic, tilting with auxiliary frame, for grit bin 200 L

Loading frame hydraulic, tilting, for grit bin 400 L

Model		Weight approx. kg	Order no.

Grit spreaders PG 8

Spreader with composite frame
The use of new composite plastics enables the integration of many functions into a single component.

- for use in domestic and commercial areas
- durable design
- composite frame and PE hopper
- stainless steel axles
- rugged transmission
- retractable support foot
- adjustable spreading quantity with fixed stop
- supplied in prefabricated assemblies

Retractable foot support

Spreader SW 20-C and SW 35-C

- for use in tough winter conditions
- for various spreading materials
- with robust agitator finger
- adjustable stainless steel dual handle with three height settings
- with adjustable spreading width limiter
- with strainer insert
- pneumatic rubber tyres with winter tread

SW 20-light

Spreader SW 20-light

- for seeds and fertiliser
- adjustable galvanised steel dual handle with three height settings
- plastic wheels

SW 35-C

Filling strainer (SW 20-C and SW 35-C)

Spreading quantity adjustable with fixed stop

Dual handle, three height settings

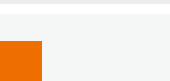

Adjustable spread width limiter at SW 20-C and SW 35-C

SPREADERS WITH COMPOSITE FRAME AND PE CONTAINER

Description	Capacity L	Spreading width m	Spreading steps	Weight approx. kg	Order no.

 Eccentric agitator for slow-flowing salt and grit for SW 20-light, SW 20-C, SW 35-C and SW 50-E	10998

Grit spreaders PG 8

Spreader SW 50-E

- for commercial and domestic use
- suitable for a variety of gritting materials and spreading widths
- quick and easy assembly
- robust construction
- stainless steel axles
- stainless steel frame
- handle has three length adjustments and continuously adjustable in height
- hinged pedestal
- gearbox drive disengagement on wheel

SW 50-E

Volume adjustment lever and adjustable T-bar handle

Hinged support foot

Additional anti-compression assembly

Wheel shutoff

Cover (accessory)

Drop spreader KS 35-E

- for domestic and commercial use
- for various types of spreading material such as salt, grit, sand, oil binding agents, seed or fertilizer with a grain size of between 2 and 4 mm
- accurate spread width of 60 cm
- quantity to be spread can be precisely and continuously adjusted via snail cam
- quick and easy assembly
- all parts that come into contact with media are made from stainless steel or plastic
- hopper made of corrosion-proof polyethylene
- powder-coated steel frame
- retractable support foot
- adjustable-length T-bar handle
- pneumatic rubber tyres with winter or rough terrain treads
- axle divided in the middle, moves around corners easily
- agitator vanes adjustable

Eccentric disk

Hopper attachment 25 L (accessory)

Rugged agitator shaft, axle divided in the middle

Adjustable length handle, large operating lever

Uniform scatter, accurate spread width, adjustable agitator vanes

Cover (accessory)

Description	Capacity L	Spreading width m	Weight approx. kg	Order no.
SW 50-E, for medium spreading areas, 6 spreading steps, yellow plastic hopper, stainless steel tubular frame, pneumatic rubber tyres with winter tread, robust gearing, spreading quantity regulator, adjustable handle, additional anti-compression assembly, axle bearing suitable for lubrication and wheel shutoff . Supplied as pre-assembled modules.	50	1 to 4	14	10742

 Cover with inspection window for SW 180	11950
 Lighting kit for SW 180	11951

Towable grit spreaders PG 8

Towable spreader SW 200 and SW 300 with PE hopper

- for commercial and domestic use
- suitable for different gritting materials and spreading widths
- robust construction
- gearbox with aluminium housing, disengageable
- sturdy, greasable wheel bearings
- stainless steel frame
- all parts that come into contact with the media are stainless steel or plastic
- spreading amount, spreading direction and spreading width can all be set as required (optional)
- 16 x 6.5 wheels with pneumatic rubber tyres, winter profile

- parallel height-adjustable drawbar
- lighting with 7-pin plug
- supplied as pre-assembled modules

Anti-compression prevention bar

Maintenance for safety cabinets, tank stations and drums

– on request –

Services for cabinets

- ✓ Individual inspection or maintenance contracts
- ✓ Competent support by our service technicians
- ✓ Inspection of all safety-relevant components
- ✓ Immediate repair of minor defects (major repairs are offered separately)
- ✓ Exhaust air test
- ✓ Preparation of service reports
- ✓ Attaching of an inspection sticker following successful maintenance
- ✓ Wear parts up to €10.00 per tested safety cabinet are included!

Inspection of filling stations after 2,5 and 5 years by experts in accordance with BAM-GGR 002

- ✓ Inspection of the external condition
- ✓ Verification of labelling
- ✓ Checking the function of the operating equipment, i.e. all fittings associated with the tank
- ✓ Leak test with overpressure
- ✓ Documentation of the periodic inspection
- ✓ Inspection certificate
- ✓ Inspection sticker
- ✓ Documentation of the test on the type plate
- ✓ Wear parts up to €20.00 per tested filling station are included!

Drum maintenance and inspection

Particularly in the case of mobile GRP tanks, initially-small cracks or impact points may lead to more extensive damage. Book our service and avoid leaving things until it's too late.

Optional:

We can also change the oil in your engine pump.

- ✓ Parts and supplies up to €20.00 per tested drum or irrigation system are included!

**ORIGINAL
SPARE PARTS**

**MANUFACTURER
SERVICE**

The CEMO safety concept guarantees you:

- **the functional safety and longevity of your products**
- **legal certainty in the event of damages**

Trust in the service of the specialist.

Our maintenance service will support you in complying with all current regulations. Maintenance service in accordance with DIN 31051.

Container for transport	268-274
Contents gauge	105, 116
Cooling lubricants, transfer trolley	87
Couplings for containers	245
Cover	234, 286, 287, 289
CUBE for AdBlue®	99, 101-103
CUBE for diesel	12-26
CUBE for lubricants	80
CUBE for waste oil	81
CUBE heating oil tank	302
CUBE Slimline	26, 103

D

Data transfer set	16, 20, 21, 96, 99, 115, 116
Depot for HazMat	195
Diesel dispensers	30, 117, 118
Diesel pumps	119-128
Diesel refuelling systems with steel tank	30, 31
Diesel refuelling systems, mobile	35-67
Diesel refuelling systems, stationary	10-34
Diesel transfer set	121
Dieseltrolley	39
Discharge valve	177, 244, 247, 249, 251, 267
Dispensing hose	29, 72, 104, 118, 119, 122, 124, 127, 130, 131
Dispensing nozzle	104, 122, 131
Disposal container	228
Dome lid	26, 86, 103
Double walled tank	85
Drip mat	50
Drum depots	185, 189
Drum/IBC pumps	134, 136, 137
Drum racks	172-177
Drum supports	177, 188, 189
DT MOBIL PRO hybrid	54-57

E

Emergency sets	235
Environmental cabinets	186-188
Electric pumps for AdBlue®	135, 137, 138
Electric pumps for petrol	129
Electric pumps for chemicals	136-138
Electric pumps for diesel	119-127
Electric pumps for lubricants	131, 132
Exhaust air fan	208
Extensions for tanks	14, 16, 17, 19, 23, 97, 99

F

Fans	200, 208, 209
Filling funnels and trays	84, 233
Filling sieve for GRP tanks	246
Filling sieve for PE tanks	249
Filling strainer for grit spreader	286
Filter	16, 21, 58, 73, 104, 124
Fireproof container	202
Fireproof/secure cabinets	203, 204
Flange plates	244

Flow meter	48, 77, 87, 89, 96, 99, 105, 107, 109, 126
Flow meter systems	16, 21, 48, 58, 63, 64, 122, 131
Foot filter	130
Food-safe containers	139, 247, 251, 260, 267, 274
Folding tray	158
Forklift pockets	25, 40-42, 44, 46, 47, 49, 52, 61, 62, 64-67, 72, 74, 76, 77, 88, 97, 108-110
F-SAFE fire prevention	202-209
Fuel dispensing areas	11, 32, 33
Funnel with water separator	73

G

Gas cylinder store	191
General-purpose box	273
Generator tanks, mobile	66, 67
Go-Box	232, 274, 282
GRP containers	262, 264, 266, 273
GRP tanks	240, 242, 243, 250, 252
Grating, PE	153, 155-157, 179, 180
Grating, Stahl	150, 153, 155, 159, 177
Grit bins	278, 279, 280, 281, 282
Grit spreaders	286-289
Ground protection systems	168-171

H

Hand pumps	84, 128, 139
Hazardous material storage, basic legal conditions	142-146
HazMat collection station	195
HazMat depots and cabinets	185-190
HazMat depots, mobile	185
HazMat pallet racks	178-183
HazMat storage, basic legal conditions	142
Hinged lid	16, 21, 48, 80, 88, 96, 99, 109
Hose reel	16, 21, 74, 80, 96, 99, 123, 130, 252
Hose with helical reinforcement	245

I

IBC bunds	165-167
IBC extension bund	167
Indoor refuelling systems	14, 17, 25, 27, 28, 81, 95, 97, 101
Insert plate	266, 280
Insulating jacket CUBE	99
Insulation pack for Blue-Mobil Easy	109
Irrigation systems, mobile	252-257

K

Key set	16, 21, 96, 99, 118
KS Mobil	72-74
KS Mobil Easy	76, 77

L

Laboratory sumps/spill pallets	157
Leakage detector device	84
Level measurement unit	31, 34
Lifting frame	52, 56, 283
Load securing	238, 239
Loading rails	150
Lubricants, compact systems	80
Lubricants, Mobil Easy	88
Lubricants, pumps	131-133
Lubricants, refuelling systems	80, 82-88
Lubricant trolley	87
Castor frames	265, 281
Wheels for CEMbox	271
Fluorescent tube collection box	226
Li-HD battery CAS	48, 87, 107, 109
Li-Power battery CAS	48, 87, 89, 107, 109
Li-Power-Block	45, 88, 109, 126
Li-SAFE battery safety	214-225
Perforated plate inserts	164, 186, 190
lockEX explosion protection	215-217
Logistics box	274

M

Master key	118
Meter	16, 21, 29, 51, 57, 59, 77, 87-89, 99, 105, 107, 109
Mobil-Box	227
Mobile irrigation systems	252-257
Mobile refilling, AdBlue®	100, 106-111
Mobile refilling, lubricants	87-89
Mobile refuelling, petrol	74-77
Mobile refuelling, diesel	35-67
Mobile sumps/spill pallets	149, 159, 164
Motorised pump swith petrol engine	130
MULTI-Tank, diesel	29, 65
MULTI-Tank, lubricants	83

N

Nozzle holder	122, 126, 232
---------------	---------------

O

Oil suction units	229
Oil and fuel filter	124
Oil dispenser	84
Outdoor refuelling systems	14, 15, 17-20, 22-26, 80, 81, 95-98, 101, 102
Overfill prevention sensor	26, 56, 81, 84, 86, 105
Overpack drum	232

P

Padlock	214, 273, 282
Pallet racks	178, 179
Pasture water tanks	242, 248, 249
PE tanks	247-250
PE shelf bunds	180
PE gratings	153, 155-157, 179, 180, 195
PE tanks	260
Pesticide cabinets	190

Petrol, pumps	129, 130
Petrol transfer set	129
Petrol trolley	76
Pipe coupling	245
Pneumatic pumps	132
Power transformer	126
Profitank	85, 86
Pump cabinets	63, 72, 104
Pump hood	63
Pump sets	126, 134, 136, 137
Pump systems	134, 135
Pumps for AdBlue®	134-139
Pumps for chemicals	136-139
Pumps for diesel	119-128
Pumps for lubricants	131-133
Pumps for petrol	129

R

Rack containers	201
Rain water tanks	260, 261
Rectangular containers,	262, 264, 266, 267
Refuelling systems	151, 158, 168, 169, 170
Refuelling systems for fuels, KS mobil	72, 73
Refuelling systems for petrol	70-77
Remote control for spreaders	289
Repair pack for GRP	246, 267
Rinsing tray	275
Rotary pumps	128, 139

S

Safety storage containers	196-200
Screw lid	137, 247, 251
Secure cabinets	203-207
Secure cabinets CEMO PROline	204, 205
Secure cabinets FWF 30	206
Showels	285
Small containers	157, 159, 164
Snow plough	285
Snow showels	284, 285
Spindle valves	251, 267
Spray caddy	257, 288
Spray lance	255, 256
Sprayers	257
Spreading quantity regulator	286, 288, 289
Stacking lid	266
Stationary refuelling systems	10-31, 80-85, 94-99, 101-105
Steel foot-frames	146, 150
Steel gratings	153, 155, 159, 177, 179, 189, 195
Steel tanks	27, 28, 29, 30
Steel sump/spill pallets	160-164
Storage container	262-274
Storage/charging of lithium batteries	211-213
Storage tanks, PE	260, 261
Submersible pump	125
Suction pipe	84, 133, 135
Suction hose	104, 119, 124, 130, 131, 133
Suction units	229, 230
Sumps, GRP	148
Sumps, PE	153-156, 178, 180, 181
Sumps/spill pallets for racks	159
Support runners	246

T

Tank data management	115, 116
Tank heater	26, 29, 86, 96, 99
Tank replacement service	60
Tanks, GRP	240-246, 250
Tanks, PE	247-249
Tanker coupling	29, 104
Tool box	268, 270, 272, 273
Transfer Trolley Aqua	257
Transfer Trolley Blue	111
Transfer Trolley Chem	111
Transfer Trolley KSS	87
Transfer Trolley Oil	89
Transport of lithium batteries	221
Trolley	38, 39, 66, 87, 106, 257
Trolley for AdBlue®	106, 107
Trolley for petrol	76
Trolley for diesel	38, 39, 66
Trolley for heating oil	66
Trolley for lubricants	87

U

UNI-Tank for diesel	82, 83
UNI-Tank for lubricants	82
Used oil collector	231
User key	16, 21, 96, 99, 116, 118

V

Vents	245
Ventilation systems	208, 209
Vehicle storage box	268, 270, 272

W

Water pumps	130, 138
Water storage tanks	260, 261
Watering shower head	255, 256
Weed control	258, 259
Workshop trolley	184
Winter service	276
W-SAFE water safety	145-201, 226-235
