

when it really counts

ONE SYSTEM, EXTRAORDINARY PERFORMANCE
METABO'S COMPETENCE IN COMPRESSED AIR

- COMPRESSORS
- COMPRESSED AIR TOOLS
- ACCESSORIES FOR
COMPRESSED AIR SYSTEMS

metabo®
PROFESSIONAL POWER TOOL SOLUTIONS

METABO'S COMPRESSED AIR SYSTEMS.

Cutting, grinding, spraying, sawing, screwdriving, nailing, tacking, painting, staining, blowing, grouting, sealing, chiselling: With the compressed air products from Metabo there are no more limits for your applications: We offer you the entire system from compressed air generation, system preparation, air distribution and of course the compressed air tools themselves - and this for almost all applications.

PARTNER WITH METABO!

One competent partner for all compressed air technology elements

At Metabo you get the entire portfolio of compressed air technology from a single source. You benefit from the fact that we know the requirements of the trade very well thanks to decades of experience in the power tool sector. Did you know that Metabo is the only power tool manufacturer who also offers a complete compressed air range?

Numerous tools, infinite possibilities

Long service life, uncompromising safety, low weight and highest productivity: The compressed air tools from Metabo impress across the range and in the workplace - in the workshop, on the construction site and numerous other areas.

Perfect performance from A to Z

At Metabo you not only find mobile compressors and tools for any application, but also everything that goes with them. A system, which ensures highest productivity thanks to optimally harmonised components. After sales support including servicing and repairs round off our portfolio.

SYSTEMISED COMPETENCE: COMPREHENSIVE COMPRESSED AIR TECHNOLOGY.

When it comes to compressed air technology, you get all the benefits of an experienced system supplier with Metabo. At Metabo you can source not only sophisticated compressors and tools for any requirement, but also everything that goes along with it: from the preparation components, hoses and high-quality tools/accessories, to reliable support such as servicing and repairs. That's what "system" means to us.

Powerful compressors

You will find the right solution for every application in the Metabo compressor range.

Effective compressed air preparation

Metabo also offers you an extensive control, filtering and lubrication range of components and systems.

Perfect compressed air preparation

With Metabo components, the system preparation and air delivery to the tool will always be optimised and efficient

Robust and ergonomic tools

Metabo compressed air tools provide robustness, power, application comfort and good ergonomics.

STRONG, ROBUST AND COMPACT: THE COMPRESSED AIR TOOLS FROM METABO.

The new professional compressed air tools from Metabo perfectly transform energy into performance - and this for a variety of applications. Thanks to their optimal weight, size and power, they are today, better than ever. Furthermore they impress with robustness and perfect ergonomics

Long service life

- **High robustness** thanks to optimal construction and high-grade materials - made for demanding environments and applications in workshops and on construction sites
- **Long service life** proven in extensive continuous tests
- **Constant high quality** thanks to permanent quality controls

Great application comfort

- **Improved ergonomics and extremely low weight** for comfortable working, low signs of fatigue and minimal hand-arm stress.
- **Compact dimensions and a sophisticated design** - designed also to access difficult to reach areas
- **Rubberised handles** for safe handling and best grip

Convincing service benefits:

- 10 year tank warranty against rust
- 3 year XXL warranty
- 8 year guarantee on spare parts

High productivity

- **High performance** thanks to high-quality, optimally harmonised components
- **Longer and more comfortable working and less signs of fatigue** thanks to excellent ergonomics

Large variety of tools

- **More than 50 different compressed air tools** for countless applications
- **Even more performance in the system** thanks to extensive accessory range

YOU HAVE THE APPLICATIONS, WE HAVE THE TOOLS.

Whether woodworking, metalworking or one of many other applications: At Metabo you find comprehensive solutions for different applications. We have illustrated various examples on this page. See for yourself the benefits offered by Metabo's compressed air tools, and for your own application.

Woodworking

- Just the right thing
- for stapling
 - for nailing
 - for sanding/finishing
 - for interior development

Metalworking

- Robust tools
- for sanding/finishing
 - for cutting
 - for roughing

Automotive service

- Optimally equipped
- when changing tyres
 - when checking the tyre pressure
 - during bodywork/ paintwork

Construction trade and renovation

- Always the right thing
- for demolition work
 - for mounting work
 - for painting work

Painting and varnishing trade

- Sophisticated solutions
- for sanding/finishing
 - for priming
 - for painting

ROBUST, POWERFUL AND RELIABLE: METABO COMPRESSOR CLASSES.

We are well experienced with different compressor applications, and offer the appropriate model to suit every application. This way you can select the compressor that best suits your personal requirements! Our range spans from the light and compact basic models, through to the handy and mobile power class, and on to the extremely powerful mega compressors for more demanding applications. Your application is the decisive factor.

Light and Compact: The Basic Class

- Compact and light starter models for simple, industrial applications
- Power from 1.1 kW to 1.5 kW
- Tank volume from 24 to 50 litres
- Oil-lubricated - alternatively oil-free

Mobility for the Construction Site: The Power Class

- Mobile piston compressor for flexible and demanding applications
- Easy to transport - also in the car or van
- Ideal for interior construction and on construction sites thanks to large wheels and trolley function
- Power from 1.1 kW to 2.2 kW
- Completely oil-free
- Container volume from 5 to 20 litres
- Particularly robust components
- With attachment for MetaLoc, as well as other standard cases and boxes

Powerful and Convenient: The Mega Class

- Dependably powerful, V-belt-driven compressor for professional use in the workshop
- Extra durable thanks to robust components and low speed running - for applications with high air requirement
- Particularly comfortable thanks to numerous ergonomic features, such as a long handle, front castors and full rubber wheels at the rear, plus a console housing all operating elements such as filter pressure reducer and oiler
- Recooler for all 4.0 kW variants for less air humidity
- Performance classes: 2.2 kW, 3.0 kW and 4.0 kW
- Oil-lubricated
- Container volume from 50 to 270 litres

* available from autumn 2016

THE MOST IMPORTANT ASPECT WHEN IT COMES TO SERVICE: YOUR SATISFACTION.

When deciding on a Metabo machine you always get a good feeling when you receive a quick and straightforward solution to any after sales requirements. Be it maintenance, repairs or spare parts: We quickly bring you and your Metabo machine back together. Your machines availability is the measure of all things. We know this, and consequently adjust our service to ensure it.

3-year warranty

Your safety plus: After having registered your Metabo tool online, you receive a certified extension to the standard warranty - resulting in Metabo's full 3 years' warranty.

Online services

At www.metabo.de/service you can obtain all information related to your Metabo machine and it's servicing

10 year tank warranty

10 year tank warranty against rust

8 year guarantee of spare parts availability

Good to know: Even when we stop manufacture of your machine model, we can still supply you with the required spare parts for up to 8 years.

COMPRESSED AIR TECHNOLOGY: USEFUL INFORMATION

From suction rate to noise level: This page provides you with explanations of the most important technical terms relating to compressed air technology.

Suction rate

The suction rate is the theoretical air volume the compressor draws in litres per minute. However, the effective air volume is an important factor in selecting the right compressor.

Filling capacity

The filling capacity is the calculated air volume that the compressor discharges in litres per minute. Using this value you can easily compare the different compressors and thus find the ideal compressor for your application.

Effective delivery volume

The free air delivery is the most important value. It can be compared with the filling capacity, however it is the actual measured air volume that the compressor discharges per minute. Using this value you can easily compare the different compressors and thus find the ideal compressor for your application.

Sound pressure level LpA

The sound pressure level is the relevant noise value for the assessment of protection within the occupational health & safety regulations.

Sound power level LwA

The sound power level, on the other hand, is the noise value that is relevant to statutory limit values - above all when in outdoor areas (see outdoor noise directive).

Operating pressure

The working pressure is set at the (filter) pressure regulator and is the pressure with which the tool is to be operated in working mode. Metabo compressors are always equipped with two manometers: The manometer at the pressure switch indicates the container pressure, the manometer at the (filter) pressure regulator indicates the working pressure. It should always be set to the working pressure of the tool. Important: The tool should be in operation when the setting is carried out in order to have the actual working pressure displayed.

Quality of compressed air

Depending on the tool you are working with, you will require oiled or non-oiled compressed air. Kindly keep in mind that it is important to regularly oil (i.e. lubricate) rotating tools, and tools with impact mechanisms - follow the operating instructions. Ideally, use a mist oiler, which constantly discharges a fine oil mist into the compressed air. On the other hand, other tools, such as paint spray guns or tyre inflating devices require oil-

free compressed air. Special filters should be used for this. Details can be found in the operating instructions of your compressed air tool or in DIN ISO 8573-1.

Determination of specific compressed air requirements

The specific requirement is the air volume required for different compressed air applications.

It can be calculated as follows:
Air volume compressed air tool 1
+ air volume compressed air tool 2
+ air volume compressed air tool x + ...
= y litre/minute

This y-value is the minimum effective air volume your compressor has to deliver. Only this guarantees sufficient compressed air delivery for a prolonged operating period.

THE NEW PAINT SPRAY GUNS: ERGONOMIC AND PRECISE APPLICATION

We offer paint spray guns and appropriate nozzle sets for different applications. This means you always have the perfect solution for your application. If you attach great importance to transfer efficiency and therefore cost-effective working, we recommend the FSP 600 HVLP and FSP 600 LVLP paint spray guns. They are characterised by perfect ergonomics and high transfer rate combined with very low air consumption. The result: particularly fast work progress and excellent paint finishes.

Nozzle kit in stainless steel – for greatest precision

LVLP (LowVolumeLowPressure) – minimum overspray due to very low working pressure and highest material transfer rate

Fine control of the material volume

Infinitely variable change between round jet and broad jet

Suitable for the use of water-based lacquers

FSP 600 LVLP

■ = good suitability/ for continuous use of one tool per compressor
□ = limited suitability/for short use

WHAT ARE YOUR COMPRESSED AIR REQUIREMENTS?

Would you like to know which compressor is the right one for your application? The effective delivery volume that your compressor requires can be calculated easily. You need to firstly know which tools will be used and if these are used on a short or continuous basis. The appropriate air requirements can then be found in the table below. If you would like to operate several tools at the same time, just add up their combined air requirements and you will get the minimum effective delivery volume that your compressor has to deliver for you to have a continuous and sufficient supply of compressed air.

Example: If you use a DSSW 930-1/2" (180 l/min) impact wrench for a short while, and a grease gun for a medium duration (30 l/min), your minimum air requirement per minute is

180 l/min + 30 l/min = 210 l/min.

Using this value you can select the appropriate compressor from the compressor data on page 50. The appropriate compressor for the above example would be the Mega 350 as a filling capacity of min. 210 l/min is required.

	Type	Air requirement for low use of the tool (l/min)	Air requirement for medium use of the tool (l/min)	Air requirement for continuous use (l/min)

AGILE POWER PACKS: THE BASIC CLASS COMPRESSORS

The Metabo Basic Compressors are the first choice for simple industrial applications. The compact and light starter models offer outputs between 1.1 kW and 1.5 kW as well as tank capacities from 24 litres to 50 litres.

Side handle
for easy transport

High-quality Condor pressure switch
with easy to read manometer

Rubber gripped front handle
for comfortable handling
and easy transport

Mini ball valve
for easy condensate discharge

Robust wheels and rubber stand base
for comfortable transport, minimises
vibrations and guarantees a safe support

Basic 250-24 W OF

- Convincing service benefits:**
- 10 year tank warranty against rust
 - 3 year XXL warranty
 - 8 year availability guarantee on spare parts

Product advantages	Oil-free piston compressor: simple transportation and reduced service requirements	Oil-lubricated Piston Condenser	Oil-free piston compressor: simple transportation and reduced service requirements	Oil-lubricated Piston Condenser
	- Powerful, robust compressor for simple, commercial use - For single phase alternating current - Working pressure can be regulated according to application by means of a pressure reducer with manometer - Convenient push button cold start feature complete with safety valve - Overload protection: protects the motor from overheating - Rubberised, stable wheels for mobile use - Additional manometer for displaying the tank pressure - Side handle with rubber grip for comfortable handling 10 year tank warranty against rust			

MOBILE COMPANIONS FOR THE CONSTRUCTION SITE: THE COMPRESSORS OF THE POWER CLASS.

Thanks to their compact design the Power Class Compressors are the ideal solution for the construction site. Used mainly on outdoor construction sites and in interior construction, they can be easily transported in a vehicle and subsequently onto site. Their output ranges from 1.1 kW to 2.2 kW, depending on the model.

- Practical, compact and easy to transport to the workplace in any car.
- For the convenient transportation of other tools: Power 280-20 W OF and Power 400-20 W OF compressors each come with an attachment for MetaLoc cases and other conventional storage cases and boxes on the market

Power 400-20 OF

Convincing service benefits:

- 10 year tank warranty against rust
- 3 year XXL warranty
- 8 year guarantee on spare parts

10 YEARS WARRANTY

8 YEARS WARRANTY

3 YEARS WARRANTY

EFFORTLESS ENDURANCE FOR DEMANDING APPLICATIONS: METABO POWER 400-20 W OF.

The new Power 400-20 W OF construction site compressor has particular endurance. Its special oil-free unit with two axially arranged cylinders and only one piston rod, in combination with especially resistant PTFE-seals, permits 100% continuous operation. This permits the Power 400-20 W OF to ensure a constant and reliable supply of compressed air.

Low maintenance

The oil-free technology saves oil changes and replacement of the valve seats due to wear and tear. Direct drive saves the otherwise necessary replacement and the re-tensioning of the belt

Efficient

20% lower power consumption than standard compressors, with a ratio between suction and output

power of 65%; thus 20% more efficient than traditional, directly-powered piston compressors, and reliable start-up even in case of low voltage (185 Volt)

Long-lasting

100% reliable operation with minimal wear for an enduring supply of compressed air during your daily work

Technical data	Compressor Power 180-5 W OF	Compressor Power 250-10 W OF
Suction rate	160 l/min	220 l/min
Filling capacity	90 l/min	120 l/min
Effective delivery volume (at 80% max. pressure)	75 l/min	100 l/min

2 Universal quick-action couplings		■

Product advantages

- Crane eyelet for safe and easy transport on the construction site

- Compact and mobile piston compressor for flexible use both indoors and on construction sites
- Portable assembly compressor – ideal for tackers and nails as well as for splitting pipes
- For single phase alternating current
- Oil-free piston compressor: simple transportation and reduced service requirements
- Instrument panel with easy to read manometer for tank- and working pressure
- Working pressure can be regulated according to application by means of a pressure reducer and gauge
- Fittings and control elements protected in tubular frames and clearly visible
- Cable winding mechanism
- Convenient push button cold start feature complete with safety valve
- Overload protection: protects the motor from overheating
- Rubberised feet for optimum stability

Technical data	Compressor Power 280-20 W OF	Compressor Power 400-20 W OF

2 Universal quick-action couplings	■	■

Product advantages

- Particularly low-level noise and vibrations
- Designed for continuous operation with S1 motor operating mode

- Compact and mobile piston compressor for flexible use both indoors and on construction sites
- For single phase alternating current
- Oil-free piston compressor: simple transportation and reduced service requirements
- Working pressure can be regulated according to application by means of a pressure reducer and gauge
- Fittings and control elements protected in tubular frames and clearly visible
- Rubberised, stable wheels and pull handle for mobile use
- Cable winding mechanism
- Convenient push button cold start feature complete with safety valve
- Overload protection: protects the motor from overheating
- Rubberised feet for optimum stability
- Attachment and transport option for Metaloc and other common storage case systems
- Crane eyelet for safe and easy transport on the construction site

ROBUST TOP PERFORMERS: THE MEGA CLASS COMPRESSORS

The Metabo Mega Class Compressors are the ideal choice when it comes to professional applications in the workshop. They have an extremely long service life thanks to their robust components and low operating speeds. Our Mega Compressors are available in three output classes between 2.2 kW and 4.0 kW.

Belt drive for low speeds and a particularly quiet operation

High-quality Condor pressure switch with pressure regulator and start-up relief valve

Long pull handle with integrated cable drum

Filter pressure reducer with fine filter and mist oiler for adjustable, application-based working pressure, and ideal air quality

3 Universal steel couplings

Easy access to the condensation outlet

Robust wheels and castors for optimum transport and safe positioning thanks to locking brake

Mega 700-90 D

Convincing service benefits:

- 10 year tank warranty against rust
- 3 year XXL warranty
- 8 year guarantee on spare parts
