

CEMO

for safe storage

The solution that will get you many more litres ahead

CEMO transfer trolleys: safe filling, watering and refuelling.

Easy handling for liquids

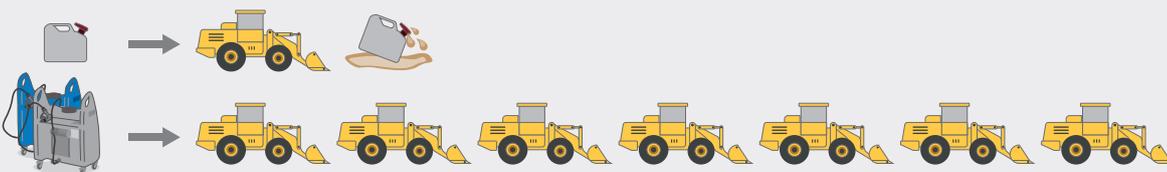

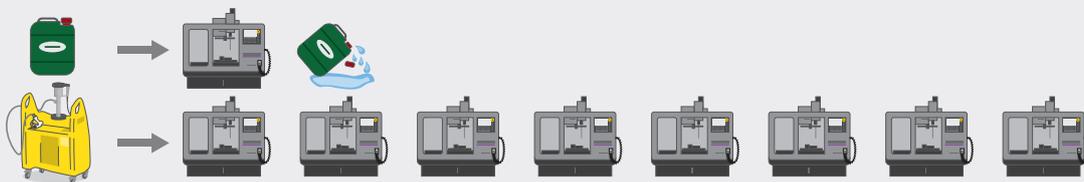

Transfer trolleys for water, chemicals, oil and AdBlue®

From the warehouse to the vehicle, from the water tap to the planter: CEMO has developed mobile solutions for the use of liquids that save a lot of time in daily work. With the transfer trolleys, employees quickly bring water, weak chemicals, oils and AdBlue® to wherever they are needed.

A clear head start for your daily work routine

When it comes to professional use and valuable working time, watering cans, buckets and canisters are truly turning into things of the past. CEMO transfer trolleys bring efficiency to daily operations.

All products and information can be found at www.cemo-group.com

The transfer trolleys hold up to 130 litres and are fully mobile. This means: no cumbersome handling, no spilling, faster work. As a partner of the Cordless Alliance System (CAS), we equip our pumps with rechargeable batteries that can be used in over 200 machines from different manufacturers. The trolleys perform particularly well in locations

such as workshops, factories, vehicle fleets, hotels, department stores or clinics. With CEMO you always play it safe: our solutions, which are manufactured in Germany, impress customers with their high quality and tested materials and accessories, which makes them really easy for you to use.

Quality that protects
– the environment
and your company.

CEMO – Solutions for safe storage

Sustainability

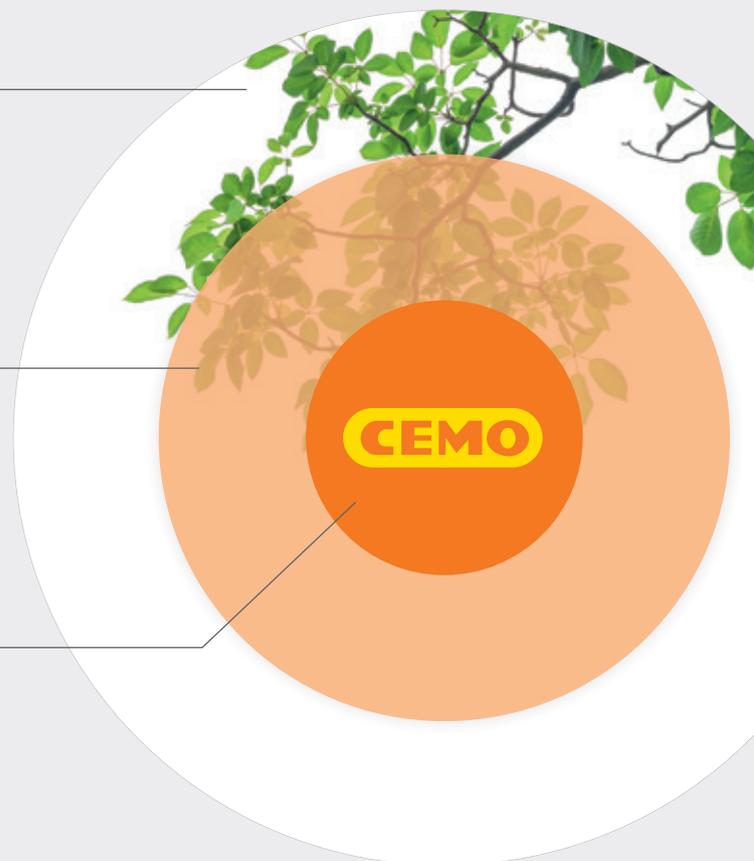

Durable and well thought-out: We take environmental protection and legal requirements into account when developing our products.

Quality

Intelligent design and the highest quality workmanship make the storage of your hazardous materials efficient and economical.

Experience

Products with added value, expert technical advice, extensive training: With CEMO, you get everything from one source.

Transfer trolley Aqua: Flexible watering indoors

Totally mobile, without annoying cables: The Aqua transfer trolley makes water transport effortless. This is particularly practical when watering plants in extensive buildings. Whether it is used in offices, hotel or hospital, the trolley quickly becomes an indispensable companion for plant-saving indoor work. Its 130-litre capacity gives enormous reach when watering – about 13 times that of a conventional watering can.

- 130-litre container made of high-quality translucent PE with integrated handles and contents scale
- Low centre of gravity
- Integrated pump sump for almost one hundred percent emptying
- Quick coupling with water stop for Gardena systems
- Spray head with various spray settings
- Self-priming electric pump with battery and 6m spiral hose

Transfer trolley Chem: Transporting chemicals safely

Long distances from the warehouse to the site? No problem for the Chem transfer trolley. In industrial plants or car workshops, it ensures that liquid chemicals can be conveniently and safely transported to where they are needed. The 130-litre container of the transfer trolley Chem can be filled with coolants for machinery, cleaning agents, diluted acids or screenwash fluid and antifreeze. It is made of high-quality polyethylene, is transparent and its litre scale ensures transparency of the fill level.

- Container made of high-quality polyethylene with 130L capacity
- Integrated handles and nozzle holder
- Low centre of gravity for easy transport
- Integrated pump sump enables almost one hundred percent emptying
- Screw cap with opening and thread for electric or manual barrel pump 1000 mm
- Pump set can be selected to suit the liquid

Transfer trolley Oil: Fill oils independently

Simple operation, large capacity: In workshops that have to fill vehicles or machines with engine, transmission or hydraulic oils on a daily basis, the 130-litre oil transfer trolley saves a significant amount of time. Its compact design helps save space where it is often particularly scarce, such as in the workshop or between vehicles. The trolley is cordless and extremely mobile thanks to its swivel castors. These allow the transfer trolley to be easily stowed, out of the way but accessible.

- Container made of high-quality polyethylene with 130L capacity
- Filler cap with integrated vent and breather
- Integrated handles
- Integrated pump sump
- Self-priming electric gear pump with battery and charger
- with oil dispensing nozzle and 2m dispensing hose

Transfer trolley Blue: convenient AdBlue® refilling

The growing number of diesel vehicles with AdBlue® poses a true challenge for operators of workshops and fleets: How can the urea solution be delivered to the vehicles as simply as possible? With the transfer trolley Blue, it's easy and safe. Up to 130 litres of AdBlue® fit into its tank. Given a consumption of about 1 to 1.5 litres per 1,000 kilometres for passenger cars and commercial vehicles, this is enough to supply even large fleets with the additive in one go.

- Container made of high-quality polyethylene with 130L capacity
- Integrated pump sump for almost one hundred percent emptying
- Submersible pump for approx. 25L/m with battery and charger
- 2m dispensing hose and automatic nozzle

Compact, handy, ready for action: Trolleys and caddies

The extremely mobile CEMO trolleys and caddies easily transport between 60 and 100 litres of liquid to their destination. This enables you to achieve a wide range of efficiency gains, for irrigation as well as for filling, for de-icing agents as well as for fuels and oils.

Aqua Caddy 60L
Irrigates gardens and green spaces

Spray Caddy 60L
Enables rapid disinfection

Spray Caddy 60L
Distributes liquid de-icing agents in winter with the spray lance

Caddy 60L for screenwash liquid or radiator antifreeze
used for filling in workshops and fleets

Fuel trolley 60/95L
Safely transports petrol to the vehicle and into the tank

Diesel trolley 60/95L
Ensures transport and refuelling without spillage

Lubricant trolley 60/100L
provides unused engine, transmission and hydraulic oils

Trolley 60/100L for AdBlue®
Simplifies mobile refilling in the workshop and on site

Our solutions for mobile watering, refuelling and filling – simple, safe, convenient
