Respiratory Protection

3M™ Respiratory Protection Solutions

Disposable Respirators

Disposable respirators are an excellent choice for workplaces where cleaning and maintenance is not practical.

Constructed from advanced materials, including 3M™ Advanced Electret Filter Media, 3M™ Disposable Respirators are designed for comfort and protection, allowing your team to give their best.

Reusable Respirators

Reusable respirators can help to reduce cost and waste* in workplaces where regular cleaning and maintenance is possible.

Designed to be easy-to-use and utilising comfortable, durable materials, 3M™ Reusable Respirators will help to give your team confidence in their protection.

Powered and Supplied Air Respirators

Powered and supplied air respirators can integrate head, eye, face, hearing and respiratory protection, while keeping your team comfortable for long periods.

Designed to be adaptable for different conditions, 3M™ Powered and Supplied Air Respirators will help to protect your team in demanding environments.

*Compared to daily usage and disposal of disposable respirators, when the reusable respirator is properly maintained.

	Disposable Respirators	Reusable Respirators	Powered and Supplied Air Respirators
Can provide protection from particulate hazards (e.g. dust, mists, metal fumes)	✓	✓	✓
Can provide protection from gas and vapour hazards (e.g. solvents)	✕	✓	✓
Requires cleaning and maintenance	✕	✓[1]	✓
Options for wearers who have facial hair	✕	✕	✓
Options for companies who prefer not to face-fit test[2]	✕	✕	✓[2]

1. Maintenance-free options are available. For example the 3M™ Maintenance Free Reusable Respirator 4000+ Series.
2. Face-fit testing is a legal requirement in some countries, and is always 3M recommended best-practice, for tight-fitting respirators.

Filtering Facepiece Respirators

Selecting a Filtering Facepiece Respirator

	FFP1	FFP2	FFP3
Nominal Protection Factor	NPF 4	NPF 12	NPF 50
Typical Applications	Low levels of fine dust particles and oil or water based mist typically found during hand sanding, drilling and cutting	Moderate levels of fine dust particles and oil or water based mist typically found during plastering, cement, sanding and wood dust	Higher levels of fine dust particles and oil or water based mist typically found when handling hazardous powders found in the pharmaceutical industry or work with biological agents and fibres

Nominal Protection Factor (NPF): The theoretical protection level of a respirator based on laboratory measured performance data.

Types of Filtering Facepiece Respirator

3M™ Flat-Fold Respirators
- Ultra soft, flexible and comfortable fit resulting from the multiple panel design
- Comfort Series - Flat Fold only: Individually packed, foldable design prevents contamination before use and allows easy storage

3M™ Cup-Shaped Respirators
- Convex shape, nose clip and twin strap design
- Easy to fit
- Durable, collapse resistant shell

3M™ Cool Flow™ Valve
Effective removal of heat build-up provides a cooler and more comfortable wear
- Provides longer continuous wear time
- Reduces risk of fogging of spectacles and eyewear

3M™ Buckle Strap Respirators
- Robust and durable design provides multishift capability and secure feel
- Adjustable braided headbands
- Soft inner face-seal improves comfort

Respiratory Protection

Disposable Respirators

3M™ Aura Particulate Respirators 9300+Gen3

3M™ Aura™ Particulate Respirator 9300+Gen3 Series is the third generation of the best-selling 3M™ Aura™ flat fold respirator.

- Original 3-panel, flat-fold design fits a wide range of face shapes and sizes
- 3M™ Cool Flow™ Comfort Valve allows a greater percentage of warm, exhaled air to escape, helping to increase your comfort. *compared to 3M™ Aura™ 9300+ equivalent model
- 3M™ Advanced Electret (filter) Media helps you breathe easier

Product ID	Part Number	Product	MOQ	OU

3M™ Aura™ Particulate Respirators 9300+ Series

3M™ Aura™ Particulate Respirators 9300+ Series has an ergonomic, flat-fold, 3-panel design featuring a low breathing resistance filter media. Available in FFP1, FFP2 and FFP3 protection levels, and with valved and un-valved models, our respirators feature an innovative chin tab for easy adjustments and an embossed, sculpted upper panel to help reduce eyewear fogging.

- Product contains recycled content: 3M™ Aura™ Particulate Respirators 9312+, 9322+ and 9332+ contain at least 25 % recycled content*
- Packaging contains recycled content: At least 30% recycled content in individual product wrap, 100% recycled content in primary carton and 76% recycled content in shipper case*
- *Claims apply to products produced since 01/04/2024. Product: 3M™ Aura™ Particulate Respirators 9312+, 9322+ and 9332+ contain at least 25 % pre-consumer recycled content. Percentage recycled content varies by model. Figure stated is the lowest percentage of recycled content for the three protection levels. Percentage recycled content calculated in accordance with EN ISO 14021:2016+A1:2021. Packaging: At least 30% recycled content in individual product wrap – Aura™ 9310+, 9312+, 9320+, 9322+, 9330+, 9332+, 1872V+ and 1873V+ only. 100% recycled content in primary carton, 76% recycled content in shipper case

Respiratory Protection

3M™ Particulate Respirators 8000 Series

The 3M™ Particulate Respirator 8000 Series is our range of cup-shaped respirators, with a lightweight, twin-strap design. They provide FFP1, FFP2 and FFP3 respiratory protection, with a convex shape, nose foam and adjustable nose clip that helps you get a comfortable fit across a broad range of face sizes.

- Robust, cup-shaped respirators
- FFP1 (NPF 4), FFP2 (NPF 12) and FFP3 (NPF 50) protection against dusts and mists
- Lightweight, twin-strap design, nose foam and nose clip help provide a comfortable, custom fit

3M™ Speciality Particulate Respirators 9900 Series

3M™ Speciality Particulate Respirators provide lightweight and comfortable FFP1, FFP2 and FFP3 breathing protection against organic vapours, acid gases, ozone, hydrogen fluoride, and nuisance odours. Our respirators have an activated carbon layer that provides relief against nuisance-level odours. The convex shape, soft inner face seal, nose clip and twin strapping helps adjust to a broad range of faces, and the braided, colour-coded headbands help you quickly identify their protection level.

- Provides FFP1 (NPF 4), FFP2 (NPF 12), and FFP3 (NPF 50) protection against dusts and mists
- Activated carbon layer helps guard against nuisance odours and, in some models, low levels of organic vapours, acid gases and ozone (NPF 10)
- Convex shape, nose clip and twin strapping helps provide a comfortable fit across a broad range of face shapes

Respiratory Protection

3M™ VFlex™ Particulate Respirators 9100 Series

3M™ VFlex™ Particulate Respirators provide economic protection and have a compliable V-shaped pleat design with a proprietary 3M filter material that helps make breathing easier. Our respirators feature an embedded, adjustable metal nose clip for a custom fit and side tabs for easier positioning on your face. The flat-fold design makes storage easy and they're available in two sizes.

- ● Economic respirator solution
- ● V-shaped pleats flex and expand around your mouth for unrestricted comfort
- ● Proprietary 3M filter material helps you breathe easier

Half Mask Respirators

3M™ Maintenance Free Reusable Respirators 4000+ Series

3M™ Maintenance Free Reusable Respirators 4000+ Series are a range of simple and ready-to-use respirators with integrated cartridge and filters. A newly enhanced valve assembly helps to reduce exhalation breathing resistance, and the close-fitting, non-silicone, textured face seal is soft and non-allergenic. Includes a resealable bag for hygienic storage and transportation.

- A newly enhanced valve assembly helps to reduce exhalation breathing resistance for improved breathing comfort
- Lightweight, well-balanced design
- Integrated filters mean it's ready to use and maintenance free

Respiratory Protection

3M™ Reusable Half Mask Respirator 7500 Series

3M™ Reusable Half Face Masks 7500 Series have a bayonet-style twin-filter design that fits a broad range of 3M lightweight filters. Our 7500 Series reusable masks have a 3M™ Cool Flow™ Valve, a soft sealing surface for comfort, and a unique head harness with an optional drop-down strap.

- Soft sealing surface and low breathing resistance makes them comfortable to wear for long durations
- Cool Flow™ Valve helps reduce heat build-up by allowing warm, exhaled air to escape
- Twin-filter design for even distribution of weight and minimal obstruction to field of vision

Full Face Respirators

3M™ Secure Click™ Reusable Full Face Respirators

The 3M™ Secure Click™ Reusable Full Face Mask FF-800 Series helps protect against particulates and/or a wide variety of gases and vapours when used with approved 3M™ Secure Click™ filters. This facepiece comes with exciting features that make it 3M's next generation in comfort, breathability and simplicity.

- The quick, easy, one-touch positive pressure push button seal check helps provide improved confidence in respirator fit
- Two dual-flow gas & vapour filters on each respirator combine to create the world's first quad flow gas & vapour filter system with four airflow paths providing easy breathing and comfort
- Large lens for excellent field of vision, and treated with Scotchgard™ Protector for improved paint and stain resistance

Product ID	Part Number	Product	MOQ	OU

Respiratory Protection

3M™ Reusable Full Face Mask Respirator FF-300 Series

3M™ Reusable Full Face Mask Respirator FF-300 Series is our multi-function full-face mask designed to provide durable and comfortable protection against a wide range of respiratory hazards. Use in conjunction with approved 3M powered air systems or as a negative pressure respirator with the 3M™ DT Series filter range, providing protection against a wide range of industrial hazards.

- Use as a negative-pressure single-filter mask or as a face piece for a powered air respirator
- Sweat port helps to improve user comfort during long periods of use
- Visor provides a good field of view and comes in choice of polycarbonate or high-heat material

Product ID	Part Number	Product	MOQ	OU

3M™ Reusable Full Face Mask 6000 Series

3M™ Reusable Full Face Masks 6000 Series have a large polycarbonate lens and soft, elastomeric facepiece. The 3M™ Bayonet Connection System enables you to connect to a broad range of 3M twin lightweight filters. The 6000 Series is lightweight and features a 3M™ Cool Flow™ Valve and four-strap suspension.

- Soft, elastomeric facepiece for wearer comfort
- Four-strap suspension means the mask is easy to put on and take off
- Large polycarbonate lens offers good visibility and that complies to relevant performance requirements of EN166:B

Respiratory Protection

Respirator Fit Testing

3M™ Training and Fit Testing Kit

Test kits and accessories designed to help your organisation meet regulatory fit testing requirements for tight fitting respirators. The kits can be used to validate face to respirator seal on any disposable respirator or half mask respirator. Not suitable for fit testing full facepiece respirators - this must be through Quantitative face fit testing.

- Fit test kits and accessories can be used to check respirator fit
- FT-10 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- FT-30 uses a test solution of denatonium benzoate to produce a bitter tasting aerosol

Product ID	Part Number	Product	MOQ	OU
7000002042	FT30	3M™ Fit Test Kit, Qualitative, Bitter, FT-30	1	Each
7000001898	FT10	3M™ Fit Test Kit, Qualitative, Sweet, FT-10	1	Each

3M™ Fit Test Collars

The 3M™ Fit Test Collar FT-15 is used with 3M™ Qualitative Fit Test Apparatus Kit FT-10 Sweet and FT-30 Bitter as the test environment.

- Collar for fit testing; to be used in conjunction with 3M™ Test Hood FT-14
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and 3M™ Training and Fit Testing Case FT-20
- Can be used to validate face-to-respirator seal on any disposable respirator or half mask respirator

Product ID	Part Number	Product	MOQ	OU
7000051789	FT15	3M™ Fit Test Collar, FT-15	1	Each

3M™ Nebulizer FT-13

Replacement nebulizer used with the 3M™ Qualitative Fit Test Apparatus FT 10, FT 30 and the 3M™ Training and Fit Testing Case FT 20.

- A replacement part for 3M™ Qualitative Fit Test Apparatus Kits FT-10 Sweet and FT-30 Bitter
- Fast, easy method for performing qualitative fit testing
- Used with the 3M™ Qualitative Fit Test Apparatus FT-10, FT-30 and the 3M™ Training and Fit Testing Case FT-20

Product ID	Part Number	Product	MOQ	OU
7000001897	FT13	3M™ Nebulizer, FT-13	3	Each

MOQ = Minimum Order Quantity, OU = Order Unit

Respiratory Protection

3M™ Sensitivity Solution

3M™ Sensitivity Solutions are used to test the sensitivity of the respirator wearer to a sweet or bitter solution. For use with 3M™ Qualitative Fit Test Apparatus Kits FT-10 (Sweet) and FT-30 (Bitter)

- Sweet or bitter taste sensitivity solutions for fit testing
- 3M™ Sensitivity Solution, Sweet, FT-11 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- 3M™ Sensitivity Solution, Bitter, 55ml, FT-31 uses a test solution of denatonium benzoate to produce a very bitter taste

Product ID	Part Number	Product	MOQ	OU
7100004635	FT31	3M™ Sensitivity Solution, Bitter, 55ml, FT-31	6	Each
7000029587	FT11	3M™ Sensitivity Solution, Sweet, 55ml, FT-11	6	Each

3M™ Fit Test Solution

Replacement fit test solutions for use with 3M™ Qualitative Fit Test Apparatus Kits FT-10 (Sweet) and FT-30 (Bitter). The choice between the bitter and sweet test kit is a personal one, however a small percentage of the population are unable to detect saccharin in which case the bitter test must be used.

- Sweet or bitter taste fit test solutions for fit testing
- 3M™ Fit Test Solution, Sweet, FT-12 uses a test solution of sodium saccharin that produces a sweet tasting aerosol
- 3M™ Fit Test Solution, Bitter, FT-32 uses a test solution of denatonium benzoate to produce a bitter aerosol

Product ID	Part Number	Product	MOQ	OU
7100004634	FT32	3M™ Fit Test Solution, Bitter, 55ml, FT-32	6	Each
7100004636	FT12	3M™ Fit Test Solution, Sweet, 55ml, FT-12	6	Each

3M™ Secure Click™ Quantitative Fit Test Adapter Kits

3M™ Secure Click™ Quantitative Fit Test Adaptor Kits are for conducting quantitative fit testing on 3M™ Secure Click™ Reusable Respirators. Filters are not included.

- Use to conduct quantitative fit testing on 3M™ Secure Click™ Reusable Respirators with speaking diaphragm
- Includes head harness assembly
- Not for use with 3M™ Secure Click™ Respirators without Speaking Diaphragm - for these respirators manually probe the respirator

Product ID	Part Number	Product	MOQ	OU
7100181558	HF-800-03	3M™ Secure Click™ Quantitative Fit Test Adapter Kit, for 3M™ Secure Click™ Half Mask HF-800 Series, HF-800-03	1	Each
7100265593	FF-800-06	3M™ Secure Click™ Quantitative Fit Test Adapter, FF-800-06	1	Each

MOQ = Minimum Order Quantity, OU = Order Unit

Respiratory Protection

3M™ Fit Test Adapters

For an alternative method to sharing a probed fit testing respirator, use 3M™ Quantitative Fit Test Adapters. Our fit test adaptor kits allow you to fit test with a personal 3M™ Respirator, rather than using a shared probed fit test respirator.

- Adapter allows fit testing with an individual's personal 3M™ Respirator
- Alternative to sharing a probed fit testing respirator
- Quick and easy to fit

Product ID	Part Number	Product	MOQ	OU
7000001945	601	3M™ Fit Test Adapter, Quantitative, 601	1	Each

Filter selection guide.

Application	Hazard	Typical Protection Considered
Painting, Spraying, Varnishing, Coating (Non Isocyanates** based)	Solvent-Based Paint**	A2P3 R
	Anti-Fouling Paint Spraying / Grinding	A2P3 R
	Water Soluble Paint	A1P2 R
	Solvents, Resins, Synthetic Resins**	A2P3 R
	Latex-Paint, Residual Solvents	A2P3 R
	Wood Preservatives	A1P2 R
Maintenance	Disinfection, Cleaning*	ABEK1P2 R
Decoration	Spray-On Glue, Foam, Varnish, Adhesive	A1P2 R
Waste Removal	Bacteria, Spores, Odours	A1P2 R
Agriculture	Pesticides, Insecticides	ABEK1P2 R
Wood Treatment	Bonding, Spray-On Glue	A2P3 R
Construction, Grinding, Cutting, Drilling	Tarring	A2P3 R
	Sealing	A1P2 R
	Spray Foam Insulation	A1P2 R
Coating	Organic Solvent/with boiling point less than 65 C	AXP3 R
	Ammonia Based Paint Remover	ABEK
	Polyurethane Coating**	ABEK1P3 R
	Solvent Based Varnish	A2
	Water Based Varnish	A1
Bonding	Solvent containing Adhesives	A1
Handling	Sulphur Dioxide	ABE
	Hydrochloric Acid	ABE
	Liquid Manure	ABEK
	Ammonia	K
	Formaldehyde	A1 + Form
	Hazardous goods storage/transport	ABEK1P3 R

Warning:
This guide is only an outline. It should not be used as the only means for selecting a respirator. Details regarding performance and limitations are set out on the respirator package and user instructions. Before using any of these respirators, the wearer must read and understand the user instructions for each product. Specific country legislation must be observed.
* excluding Formaldehyde
** for occurance of Isocyanates, please contact the 3M Customer Helpline +44 (0) 870 60 800 60 or your local 3M office

What types of filters are there?

Filter Type	Colour	Main area of application
P	White	Solid and liquid particles
A	Brown	Organic gases and vapours with boiling point >65°C.
AX	Brown	Highly volatile organic solvents with boiling point <65°C.
B	Grey	Inorganic gases
E	Yellow	Acid Gases
K	Green	Ammonia and organic ammonia derivatives
Hg	Red	Mercury (vapour) and mercury compounds

Filter Classification	APF with 3M Half Mask	APF with 3M Full Face Mask
P1	4	4
P2	10	10
P3	20	40
Class 1 Gas and Vapour filters	10 or 1000ppm (whichever is lower)	20 or 1000ppm (whichever is lower)
Class 2 Gas and Vapour filters	10 or 5000ppm (whichever is lower)	20 or 5000ppm (whichever is lower)

AX-Filter for low boiling point (organic composition with a low boiling point under 65 °C). AX-Filter should only be fitted to 3M™ Full Face masks. AX filters may only be used for a single shift.
A1 and A2 Filter for organic vapour with a boiling point above 65 °C.
APF = Assigned Protection Factor (For further information on APFs see HSE document HSG53)

Select the right respirator and filter.

Respiratory Protection

Powered Air Respirator Systems

3M™ Versaflo™ TR-300+ Series Powered Air Respirator Systems

3M™ Versaflo™ TR-300+ Powered Air Respirators are versatile and easy-to-use respiratory protection against particulates hazards.

- Slim, lightweight unit is well-balanced and comfortable to wear for long work shifts
- Two user selectable airflows enable the user to control flow settings to allow the user to find the setting they find most comfortable
- Powered Air Respirators automatically adjust airflow to compensate for filter loading to deliver consistent filtered air during use

3M™ Versaflo™ Powered Air Respirator Starter Kits TR-300+ Series

3M™ Versaflo Powered Air System TR-300+ combines performance, protection and functionality with modern, stylish, lightweight design and unrivalled comfort. It is the key to easy-to-use, versatile respiratory protection for particulate environments.   3M™ Versaflo™ Powered Air Starter Kit TR-315+ contains TR-302E+ Turbo Unit, Particle Filter, Pre-Filter, Spark Arrestors, Standard Belt, High Capacity Battery, Battery Charger Kit and length adjusting Breathing Tube. Simply add your 3M™ Versaflo™ Headtop for complete respiratory protection.

- Simple starter kit with all the component parts to get you up and running. Simply add the headtop required
- Easy to use, versatile respiratory protection against dusts, mists, fumes and other particulate hazards
- Kit includes Turbo Unit TR-302E+, particulate filter, pre-filter, high-capacity battery, battery charger, length-adjusting breathing tube, air flow indicator, standard belt and spark arrestor

3M™ Versaflo™ TR-800 Series Powered Air Respirator Systems

Whether you're mixing and granulating compounds in a pharmaceutical facility or working with combustible gases in the oil and gas industry, the 3M™ Versaflo™ TR-800 Powered Air Respirator is essential.* Available in assemblies or ready-to-use kits with everything your team needs to get started. *The 3M™ Versaflo™ Powered Air Respirator TR-800 with 3M™ Versaflo™ Battery TR-830 attached, is ATEX approved for use in certain potentially explosive a™ospheres. It is approved to Zone 0 requirements and so may be suitable for areas where potentially explosive a™ospheres are expected and permanent in normal operations.

- Kits feature headtop, breathing tube, filter, battery charger, Powered Air Respirator, battery, battery attachment tool, belt, filter cover, storage and cleaning kit, an airflow indicator, and select other components
- Battery includes a bumper to help absorb impact; mechanical attachment of the battery helps prevent removal during use
- Audible and visual alarms alert users to low battery and low air flow

Detection & Monitoring Equipment

Detection & Monitoring Equipment

Monitor Badges

3M™ Organic Vapor Monitor 3500+

3M™ Organic Vapour Monitor 3500+ is a cost-effective and convenient way to perform personal air sampling for many organic vapours. It is easy to use - clip it to your shirt lapel, collar, or pocket without interfering with your work activities. No batteries, hoses or pumps or needed to use the monitor to sample your air.

- State of the Art Monitor Design
- Simple, cost-effective and convenient
- High sample capacity for sampling a broad range of organic vapours

Product ID	Part Number	Product	MOQ	OU
7100249088	3500+	3M™ Organic Vapour Monitor, 3500+	10	Each

3M™ Organic Vapour Monitor 3501+

3M™ Organic Vapour High Sampling Rate Monitor 3501+ is a cost-effective and convenient way to perform personal air sampling for low levels of organic vapours and short term exposure limit (STEL) sampling. It is easy to use - clip it to your shirt lapel, collar, or pocket without interfering with your work activities. No batteries, hoses or pumps or needed to use the monitor to sample your air.

- State of the Art Monitor Design
- Simple, cost-effective and convenient
- Highest diffusive sampling rate available for monitoring low contaminant levels and STEL sampling

Product ID	Part Number	Product	MOQ	OU
7100249097	3501+	3M™ Organic Vapour Monitor, High Sampling Rate, 3501+	5	Each

3M™ Ethylene Oxide Monitor 3551+

3M™ Ethylene Oxide Monitor Badge, 3551 is a lightweight device that collects ethylene oxide gas in the surrounding environment. Our badge is made from a plastic housing that contains a permeable, absorbent membrane which can be lab tested to help you assess the airborne concentration of ethylene oxide.

- Collect and separately analyse ethylene oxide in the workplace environment
- Accuracy of +/-25%, at a 95% confidence level for many workplace contaminants
- Lightweight

Detection & Monitoring Equipment

3M™ Formaldehyde Monitor 3721+

3M™ Formaldehyde Monitor 3721+ is a cost-effective and convenient way to perform personal air sampling for formaldehyde and certain other aldehydes. It is easy to use - clip it to your shirt lapel, collar, or pocket without interfering with your work activities. No batteries, hoses or pumps or needed to use the monitor to sample your air.

- State of the Art Monitor Design
- Simple, cost-effective and convenient
- A valid method for air sampling and analysis of formaldehyde and certain other aldehydes

Product ID	Part Number	Product	MOQ	OU
7100251921	3721+	3M™ Formaldehyde Monitor, 3721+	5	Each

MOQ = Minimum Order Quantity, OU = Order Unit

Hearing Protection

40 million workers are exposed to loud noise and 13 million suffer from hearing disorders despite industry regulations*. You can advance your hearing conservation programme with a customised and comprehensive approach to the hearing protection challenge. Implementing a solution that really makes a difference begins with understanding the hazards, the regulation and the factors that impact protection.

The real world concerns of hearing protection

Variable Noise Levels: Every environment is different and workers can face a wide range of sound levels throughout the day and in different areas at the same facility.

The Human Factor: Each person has a different shape, size and anatomy of the ear canal, so there is no one-size fits all hearing protection solution. The key to achieving optimal protection is having the best fit possible.

Employee Communication: Where there is an essential need for workers to communicate or hear warning sounds it is vital that their hearing is protected from hazardous noise levels.

What types of sounds require hearing protection?

At home and work, it's important to understand which sounds may cause hearing loss and require hearing protection:

Decibel scale dB(A)

Left	dB(A)	Right
	140	Jet Takeoff
	130	
	120	Pneumatic Riveter
Chainsaw	110	Hammer Drill
Motorcycle	100	Rock Concert
Lawn Mower	90	Tractor/Hand Drill
Vacuum Cleaner	80	
	70	City Traffic
Conversation	60	Air Conditioning Unit
	50	
Refrigerator Hum	40	Electrical Transformer
Rustling Leaves	30	
Watch Ticking	20	
	10	

Repeated exposure to loud sounds, greater than 85 dB(A), can cause permanent hearing loss and tinnitus. Other health effects related to noise include stress, anxiety, hypertension, sleep disturbance and fatigue.

Ear fit validation

How do you decide what hearing protection you will offer to your workers?

If you are simply using the SNR found on the hearing protection packaging as a guide you may not be providing accurate protection levels for every worker. Ears come in many shapes and sizes and to make sure all workers are getting the protection they need, you need to know their Personal Attenuation Rating (PAR).

Noise-induced hearing loss is 100% preventable.

Why 3M?

As the leader in hearing protection, 3M offers a complete solution, with dual-ear and earmuff testing capabilities plus a user-friendly interface. The 3M™ E-A-Rfit™ Dual-Ear Validation System is the fast and easy way to find your employees' PAR, because we know how important it is to make your hearing conservation program fit seamlessly into your operation.

Learn more: 3M.co.uk/Earfit

What's your PAR?

Every employee is different.
Every job is different.
Every ear is different.

Finding each employee's PAR will help you have assurance that workers' hearing is protected and they are compliant with the law. That's why we made the new 3M™ E-A-Rfit Dual-Ear Validation System fast, accurate and easy.

Fit testing is key

Get results you can trust. The 3M™ E-A-Rfit™ Dual-Ear Validation System measures the effectiveness of the earplug or earmuff inside the employee's ear providing accurate, quantitative results. Because you can simultaneously test both ears, you have more to focus on education including the importance of fit and protection.

❶ Fit
Have the employee insert their hearing protection.

❷ Test
Connect to microphones and begin speaker test sound.

❸ Assess
Use PAR to customise hearing protector selection.
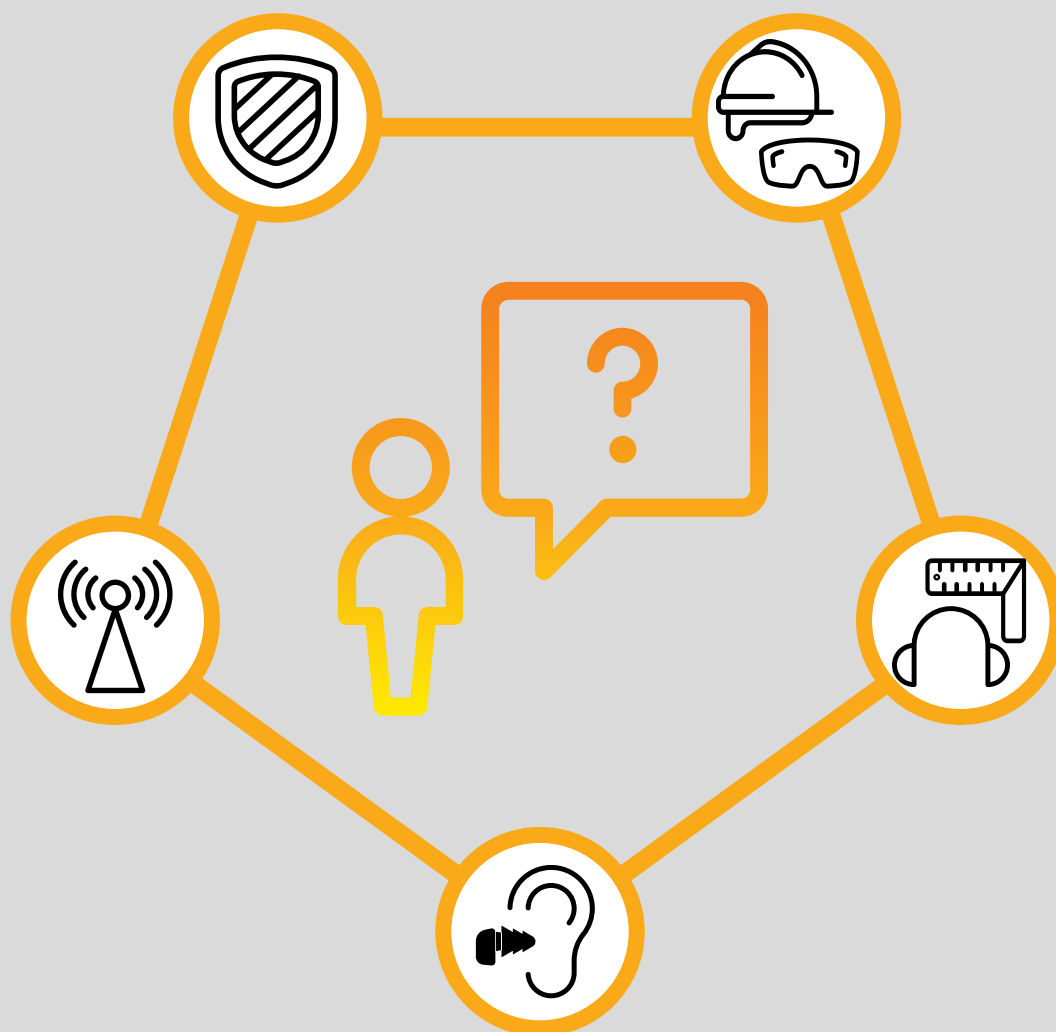

Did you know that 40% of employees incorrectly select or use hearing protection?*

What should you consider when choosing your hearing protection?

Some key factors include the level of attenuation and protection required, also considering if situational awareness and communication are necessary. Compatibility with other PPE is important in terms of comfort and ergonomics, but perhaps more importantly combinations of earmuffs and carriers must be tested and certified against PPE Regulation 2016/425 (EU).

3M believes in the importance of compatibility.

We can help you understand the requirements of EN 352:2020 Part 3 and how it supports your selection of safe and approved combinations of earmuffs and carriers like safety helmets.

*HSE Research Report RR720 'Real world use and performance of hearing protection

Choose the right passive hearing solution.

Do you prefer earplugs (in the ear) or earmuffs (over the ear)?

Earplugs

Do you need reusable, roll-down, disposable or banded earplugs?

Banded

3M™ E-A-Rcaps™
24 dB SNR (U-T-C)

Reusable

3M™ E-A-R™ UltraFit™
29 dB SNR

Roll down

Do you need moisture resistance?

- **Yes** → 3M™ E-A-R™ Classic™ **31 dB SNR**
- → 3M™ E-A-Rsoft™ Yellow Neons™ **34 dB SNR**
- **No** → **Do you need high visibility earplugs?**
  - **Yes** → 3M™ E-A-Rsoft™ Yellow Neons™ **34 dB SNR**
  - **No** → 3M™ 1100 **35 dB SNR**

Push to Fit

Lower than 30dB SNR

3M™ E-A-R™ Express™
28 dB SNR

30 dB SNR, higher or lower attenuation

Higher than 30dB SNR

3M™ E-A-R™ Push-Ins™
31/35 dB SNR

Earmuffs

Do you wear them over the head or attached to a safety helmet?

Headband

Do you need 'dielectric' electrical insulation?

- **Yes** → **Do you need a very high noise reduction rating of 37 dB?**
  - **No** → 3M™ PELTOR™ Earmuff X1/X2/X3/X4 **27/31/33/32 dB SNR**
  - **Yes** → 3M™ PELTOR™ Earmuff X5 **37 dB SNR**
- **No** → **Do you wear earmuffs for extended periods of time and need extra comfort features?**
  - **Yes** → 3M™ PELTOR™ X Series **27/31/33/32/37 dB SNR**
  - **No** → 3M™ PELTOR™ Optime™ **27/31/34 dB SNR**

Helmet mounted

Do you need ABS impact resistant cups?

- **No** → 3M™ PELTOR™ Optime™ **26/31/33 dB SNR**
- **Yes** → 3M™ PELTOR™ X Series **26/30/32/36 dB SNR**

Comparison Chart

This comparison chart helps you understand the key differences between 3M's core line passive hearing protectors. Please note that the chart focuses only on a selection of featured hero products. We have a lot more products available, so if you are looking for an alternative product please contact your local 3M representative.

Hearing protection use and care

Roll down earplugs
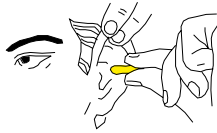

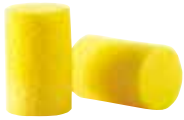

How to use

Slowly roll and compress foam earplugs into a very thin cylinder. While compressed, insert the earplug well into the ear canal. Fitting is easier if you reach around the head to pull the ear outward and upward during insertion.

Care and cleaning

Keep the earplugs clean and free from material that can irritate the ear canal. Wipe dirt and debris from earplugs with a clean cloth between uses. Discard the earplugs if they noticeably change their firmness or do not re-expand to their original size and shape.
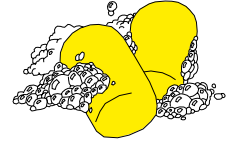

Reusable pre moulded earplugs
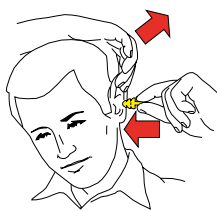

How to use

Reach around the back of your head and pull outward on the ear while inserting the plug until you feel it sealing. This may seem tight at first, especially if you have never worn earplugs.

Care and cleaning

Pre-moulded earplugs could last several months depending on the type and on your work environment, hygiene and body chemistry. They should be replaced if they shrink, harden, tear, crack or become permanently deformed. Wash them in warm soapy water and rinse well. When dry, store them in a carrying case.
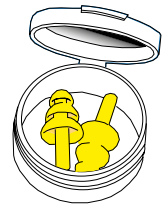

Banded earplugs
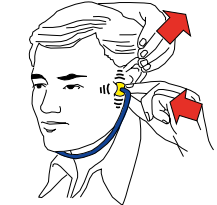

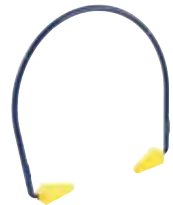

How to use

Hold the large ends of the pods and swivel them to direct the tips into the ear canal openings. Firmly push and wiggle the pods into the ear canal until a snug seal is obtained. Pulling on the outer ear while pushing the pods will be helpful to most wearers.

Care and cleaning

Most semi-aural hearing protectors can be cleaned in the same way as pre-moulded earplugs. Since the band holds the tips in place to provide an acoustic seal, do not tamper with it otherwise the protection afforded by the device may be reduced.
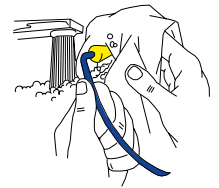

Earmuffs

How to use

Earmuffs must fully enclose the ears to seal against the head. Adjust the headband so cushions exert even pressure around the ears to get the best noise reduction. Pull hair back and out from beneath the cushions. Do not wear caps, store pencils behind the ear or anything that may break the seal.

Care and cleaning

Cushions can be cleaned with warm soapy water and rinsed thoroughly. Do not use alcohol or solvents. Cushions normally need replacing at least twice a year or more – whenever they become stiff, cracked, or do not seal. Do not modify earmuffs in any way, and especially do not stretch or abuse the headband as this will reduce protection.
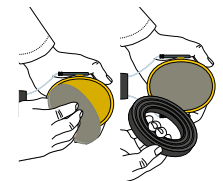

Fitting guide

3M™ E-A-R™ One Touch™ Pro Earplug Dispenser

Conveniently provide hearing protection where employees need it. The 3M™ One Touch™ Pro Earplug Dispenser dispenses one earplug at a time with a simple twist. No more expense and waste of individually wrapped plugs. Made from ABS plastic with a powder-coated steel-back plate, it's designed for challenging environments - indoors and outdoors.

▶ Accurately dispenses one earplug at a time

▶ Dispenses earplug directly into hand

▶ Powder coated steel back plate and durable ABS and POM plastic for tough environments

▶ Free-standing or wall-mounted, could be located inside or outside

▶ Mounting holes designed to fit a variety of competitive dispensers

▶ The innovative design protects against sun, rain and wind, when dispensing earplugs outside

Earplugs

3M™ E-A-R™ Express™ Earplugs

The 3M™ E-A-R™ Express™ Earplugs are a push to fit design for insertion into the ear canal to help reduce exposure to hazardous levels of noise. Offering both a one hand and two hand insertion performance claim of 28 dB SNR tested in accordance with EN 352-2:2020.

- Offering both a one hand and two hand insertion performance claim of 28 dB SNR in accordance with EN 352-2:2020
- Pod design shaped to help provide an effective seal
- Patented 3M™ E-A-R™ foam tips compress easily for smooth insertion and slow expansion for secure fit

Product ID	Part Number	Product	MOQ	OU
7000103732	EX01001	3M™ E-A-R™ Express™ Earplugs, Corded, EX-01-001	100	Pair

3M™ E-A-R™ Push-Ins™ Earplugs

3M™ E-A-R™ Push-Ins™ Earplugs have a 3M E-A-Rform™ Foam tip that's shaped and sized to fit comfortably in most ears.   Our recognisable yellow earplugs have a flexible blue stem for easy insertion using one or two hands. Push in insertion makes fitting and removal easy and hygienic.

- Single Number Rating (SNR) 35 dB (two-hand insertion) and 31 dB (one-hand insertion)
- Unique E-A-Rform™ tip shaped and sized to fit comfortably in most ears
- Flexible stem makes them easy and hygienic to use as you don't need to touch the foam tip

Hearing Protection

3M™ E-A-R™ Classic™ Earplugs

The 3M™ E-A-R™ Classic™ Earplugs are disposable and designed for insertion into the ear canal to help reduce exposure to hazardous levels of noise and loud sound up to 31 dB SNR. These products are available in a corded and uncorded version.

- Reduces noise levels up to 31 dB (both corded and uncorded), tested to EN 352-2:2020
- Soft energy absorbing foam provides a low equilibrium pressure making it one of 3M's most comfortable earplugs
- Moisture resistant making them less likely to swell through moisture absorption

Product ID	Part Number	Product	MOQ	OU

3M™ 1310 Banded Earplugs

3M™ E-A-R™ 1310 Banded Earplugs are designed with a patented headband with flexing capability that adjusts to the movements of your jaw and head, for a comfortable and secure fit with constant low pressure in the ear. Our blue robust acetal plastic band is made to fit behind the head or under the chin, making it ideal for wearers exposed to intermittent noise.

- Reduces noise levels up to 26 dB
- Flexible band design helps maintain a constant pressure, at a comfortable level, irrespective of head size
- Innovative flexible band for optimum fit and superior comfort

Product ID	Part Number	Product	MOQ	OU
7100089592	1310	3M™ Banded Earplugs, 1310	50	Each

3M™ E-A-R™ Caboflex™ Banded Earplugs

3M™ E-A-R™ Caboflex Earplugs are ideal when moving in and out of high noise areas, fitting comfortably around the neck when not in use. Each conical shaped insert swivels to align with the ear canal, providing a move-resistant seal against noise.

- Reduces noise levels up to 21 dB when used with headband
- Banded earplugs with conical shaped earplugs that swivel to align with the ear canal to provide a move-resistant seal against noise
- Earplugs are washable and reusable for improved hygiene and economy

Product ID	Part Number	Product	MOQ	OU

Earmuffs

3M™ PELTOR™ X1 Earmuffs

3M™ PELTOR™ X1 Earmuffs are our lightweight hearing protectors with comfortable, soft ear cushions. Available as headband, helmet attachment and neckband models. The headband model features an electrically insulated, twin headband that decreases heat build-up on top of the head. Depending on wearer preference or application need, the helmet attached versions are available as either dielectric electrically insulated or with robust metal arms.

- Reducing noise levels from 26-27 dB, model dependant, tested to EN 352:2020
- Wide flat headband is electrically insulted making the earmuffs electrically resistant or ‚dielectric'
- Colour-coding makes it easy to identify the level of protection being worn

Validation

3M™ E-A-Rfit™ Dual-Ear Validation System

Fit testing is key for effective wear and hearing conservation. The 3M™ E-A-Rfit™ Dual-Ear Validation System accurately quantifies each wearers personal attenuation from inside both ears when wearing earplugs or ear-muffs. Our system takes only seconds to measure across 7 standard frequencies and gives a simple pass or fail rating for each employee's personal attenuation rating (PAR) to facilitate training on the importance of fit.

- Gives fast, clear, accurate fit testing of your hearing protection as quantified scientific data
- Personal attenuation rating (PAR) is first step in fit testing and hearing conservation programme
- Measures sound levels inside and outside of the earplug in only 5 seconds

Communications

3M™ PELTOR™
Communication Solutions

The Sound Solution

First-class communication and hearing protection! There was a time when wearing hearing protectors meant being isolated and out of contact. Those days are over. Today, 3M™ PELTOR™ offers first-class communication solutions that not only make your working day safer and more efficient, but also much nicer!

3M™ PELTOR™ products are developed for all environments where high safety must be combined with communication. Industrial environments, construction sites, agriculture and forestry are a few examples. We have developed several models to ensure there's a 3M™ PELTOR™ Headset for every situation. Headband models for all-round use, and models with helmet attachments for people who wear safety helmets at work. To ensure easy use of our products and good functions for all environments we use advance technology such as Level Dependent technology and Bluetooth®.

This pricelist mainly focuses on general industry communication solutions, but 3M also offers specialised products for e.g. military or hunting and shooting. Please contact your local 3M representative if you want to learn more about these industries and products.

Oil and gas

Construction

Communicate at distance and boost your productivity

The importance of wearing hearing protection 100% of time exposed

100% usage
Gives the expected protection.

99% usage
Just five minutes of carelessness per day significantly reduces the effect of the hearing protector.

90% usage
Virtually no protection.

Safety

To be effective, a hearing protector should be used 100% of the time in noisy environments. Even taking it off for a short time dramatically reduces its effectiveness and greatly increases the risk of hearing damage. The 3M™ PELTOR™ Communication Solutions encourage longer use because the wearer feels less isolated and can communicate with others more easily.

Function symbols

To help you to understand the functionality of our key communication solutions we have developed a small comparison chart with the following symbols.

Level Dependent (surround)	Bluetooth	Built in Two-way radio	Built in FM-radio	External Audio Input	Two-way External Radio
Hearing protection with level-dependent function for ambient listening	Hearing protection that features Bluetooth® technology, for wireless connection to mobile phone, or communication radio	Hearing protection with built-in two-way radio	Hearing protection with built-in FM radio receiver	Hearing protection with external audio input	Hearing protection for communication with external two-way radio

3M™ PELTOR™ ProTac™ III Headsets

3M™ PELTOR™ ProTac™ III Headset with level-dependent function for ambient listening helps you focus on your work and communicate with colleagues in noisy environments, without removing the hearing protection. Stereo feedback will allow you to hear and better determine direction of alarms, warning cries, backing vehicles and so on. Headset unit has a rugged design with dual shells. The electronics are protected from moisture and sweat, from both the inside and the outside. Smart technology, practical design and user friendly functions will help you weather rough days in the field.

- Hearing protector helps protect against harmful noise, whilst allowing ambient sounds to be heard
- Built-in level-dependent function allows the wearer to hear ambient sounds, such as conversations, machine sounds and warning signals
- 3.5 mm stereo jack to connect to your mobile phone or two-way radio to hear the call right in your ear

Safety Helmets

3M™ SecureFit™ Safety Helmet X5000 Series

3M™ SecureFit™ Safety Helmet, X5000 Series, provides secure, comfortable and adjustable head protection for workers in a variety of situations. Our helmets feature six different settings to adjust positions and 4-point chin strap selector systems to switch between EN397 (industrial safety helmets) or EN12492 (helmets for mountaineers) certification standards. X5000 Series safety helmets are vented, brimless and have 3M™ UVi-cator™ Sensors that indicate levels of exposure to damaging ultraviolet (UV) light. They have easily-adjustable, 6-point ratchet suspension systems which feature the exclusive 3M™ Pressure Diffusion Technology. They're available in a variety of colours with reflective options available.

- Secure, comfortable head protection for working at heights and other hazardous industrial jobs
- Suspension system incorporates exclusive patented 3M™ Pressure Diffusion Technology
- 4-point chin strap selector system unique to 3M makes it possible to switch between EN 12492 (Mountaineering helmets) and EN 397 (Industrial safety helmets) standards

Head & Face Protection

3M™ SecureFit™ Safety Helmet X5500 Series

3M™ SecureFit™ Safety Helmet X5500 Series provides secure, comfortable and adjustable head protection for workers in a variety of situations. Our helmets feature adjustable positioning and easy-turning, 4-point ratchet suspension systems that features the exclusive 3M™ Pressure Diffusion Technology. X5500 Series safety helmets have 3M™ UVicator™ Sensors that indicates damaging levels of ultraviolet (UV) light. They meet the EN397 standard for general industrial use and are available in a variety of colours with or without vents.

- Secure, comfortable head protection against small falling objects and for general industrial use
- Suspension system incorporates exclusive patented 3M™ Pressure Diffusion Technology
- 4-point ratchet suspension allows wearer to customise height and fit with multiple levels of vertical adjustment

Head & Face Protection

3M™ Hard Hat G3000 Series

3M™ Series G3000 hard hat has been designed in close collaboration with industrial and forestry workers. It is intended for use in harsh environments with tough demands for effective protection, excellent ventilation and a maximum field of vision. The slim design means that falling objects slide off easily and do not dislodge the helmet from its position. Softly rounded design, without any sharp or protruding components, the extremely comfortable lining and the simple adjustment of fit makes the G3000 unique.

- Hard hat designed for use in harsh environments, with excellent ventilation and a good field of vision
- 3M™ Uvicator™ sensor disc tells you when your hard hat has been over exposed to UV-radiation and it's time to replace it
- Softly rounded design helps avoid parts snagging on cables or branches

Head & Face Protection

3M™ G3501 Series High Heat Safety Helmets

Temperature extremes, metal sparks and splashes – that's the job. And it's a tough environment to work in. 3M™ G3501 Series High Heat Safety Helmet is designed to offer high levels of protection for the toughest of applications. The helmet is also the platform for a range of hearing, eye and face protection products that are designed to withstand the metal working environments without compromising compatibility, comfort or easy of use. Available in six colours, with ratchet suspension.

- Lightweight high heat safety helmet compatible with 3M eye, face and hearing protection
- Leather sweatband for improved comfort
- Head harness can be rotated 180° for better visibility when working in confined spaces

Welding Safety

3M™ Speedglas G5-03 Pro AIR Welding Helmets

3M™ Speedglas™ Welding Helmet, G5-03 Pro Air is designed for the versatile welder. With customisable adjustment , how air is directed, how you configure the helmet for additional protection, G5-03 Pro Air features our Natural Colour Technology, Variable Colour Technology (VC), and a Tack Welding Mode (TW). The optional Task Light also allows you to see more of your work piece.

- Robust, compact design
- Ergonomic, adjustable head suspension
- GRIND and CUT mode functionality, when using G5-01/03 auto darkening filters

Product ID	Part Number	Product	MOQ	OU
7100319511	632800	3M™ Speedglas™ Welding Helmet without welding filter G5-03 Pro AIR, 632800	1	Each

3M™ Speedglas™ Welding Helmets 9100 Air Series

3M™ Speedglas™ Welding Helmet Upgrade Kit 9100 Air, comes with the welding helmet 9100 Air, welding filter, self-adjusting QRS breathing tube and carry bag. The kit allows users to upgrade their existing 3M™ Adflo™ Powered Air Respirator

- Upgrade kit with 3M™ Speedglas™ Welding Helmet 9100-Air, breathing tube and carry bag
- Side windows (shade 5) can help widen the field of vision
- 3M™ Speedglas™ Natural Colour Technology gives you high contrast and more natural-looking colours

Product ID	Part Number	Product	MOQ	OU
7000044532	562800	3M™ Speedglas™ Welding Helmets 9100 Air, without Welding Filter, 562800	1	Each

3M™ Speedglas™ Welding Helmets 9100 Series

3M™ Speedglas™ 9100 Series Welding Helmets protect workers from radiation, heat and sparks, while providing a precise view of your work.

- Available Auto Darkening Lenses with seven variable dark shades (5, 8 and 9-13) for most types of arc welding
- Available in multiple models with various viewing area sizes
- Available with or without side windows

Product ID	Part Number	Product	MOQ	OU
7100011652	501800	3M™ Speedglas™ Welding Helmets 9100 Series, with Side Windows, without Welding Filter, 501800	1	Each

3M™ Speedglas™ Welding Helmets 9000 Series

The 3M™ Speedglas™ 9000 Welding Helmet offers superior protection for both apprentices and professional welders. Its narrow width polyamide nylon construction is heat and chemical resistant, extremely durable and ideal for working in tight spots.

- Exclusive exhalation venting
- Comfortable and lightweight
- 3M™ Speedglas™ 9002NC Auto-Darkening Lens provides a large viewing area, natural color and customizable settings for multiple welding applications

Product ID	Part Number	Product	MOQ	OU
7100116824	401385	3M™ Speedglas™ Welding Helmets 9002NC, with Welding Filter, 401385	1	Each

3M™ Speedglas™ Welding Helmets 100 QR Series

3M™ Speedglas™ Welding Helmet 100-QR provides head protection at all times because you never need to remove your safety helmet as you attach and detach the welding helmet. Available with or without a welding filter.

- Face, eyes and head protection
- Supplied with the tough, yet lightweight and comfortable 3M™ Safety Helmet H-701
- Safety helmet has a short brim for better upwards visibility

Product ID	Part Number	Product	MOQ	OU

Welding Safety

3M™ Speedglas™ 100 Series Welding Helmets

3M™ Speedglas™ 100 Series Welding Helmet helps protect welders from flying sparks and airborne debris, and the Auto-Darkening Lens helps keep the eyes safe from the intense light of MIG, TIG, and stick welding while offering an accurate view of the workspace, before during and after the weld. With an optional hard-hat adapter, this helmet is a great choice for welders starting off their careers, tradesmen, and DIYers.

- Welding helmet with optional safety helmet adapter
- Great choice for welders starting off their careers, tradesmen, and DIYers
- Auto-Darkening Lens with five adjustable dark shades 8–12 (not applicable to 3M Speedglas 100 Passive Welding Helmet)

Product ID	Part Number	Product	MOQ	OU

Welding Safety

Welding Helmet & Respirator Sets

3M™ Adflo™ Powered Air Respirator System

For effective protection against a range of particulates and gases encountered in the welding process, use 3M™ Adflo™ Powered Air Respirator. The Adflo™ respirator connects directly with any Speedglas™ Series respiratory welding helmet and can protect users against both particles and gases depending on the filter used.

- Can protect you against particles and gases, all in one system, depending on filter used
- Nominal protection Factor up to 500 (TH3) in combination with Speedglas welding helmets
- Connects directly with any Speedglas Series respiratory welding helmet

Product ID	Part Number	Product	MOQ	OU
7100166698	837731	3M™ Complete Adflo™ System, Heavy-duty Battery, 837731	1	Each

7100166696	837710	3M™ Complete Adflo™ System, without Belt, without Charger, 837710	1	Each

3M™ Adflo™ Powered Air Respirator Turbo Unit

3M™ Adflo™ Turbo Assembly is our replacement powered air turbo unit to be used with your original belt, filter and filter cover, battery, and charger.

- Replacement 3M™ Adflo™ turbo assembly
- Depending upon the filters used, can provide protection against particulates, gases and vapours commonly found in welding processes
- Connects with 3M™ Speedglas™ Respiratory Welding Helmets and selected 3M™ Versaflo™ Helmets

Product ID	Part Number	Product	MOQ	OU
7000044338	832000	3M™ Adflo™ Powered Air Respirator Turbo Assembly, 832000	1	Each

Focus

3M™ Speedglas™ G5-03 Pro Air Welding Helmet with 3M™ Adflo™ PAPR System

3M™ Speedglas™ Welding Helmet, G5-03 Pro Air is designed for the versatile welder. With customisable adjustment, how air is directed, how you configure the helmet for additional protection, G5-03 Pro Air features our Natural Colour Technology, Variable Colour Technology (VC), and a Tack Welding Mode (TW). The optional Task Light also allows you to see more of your work piece.

- Robust, compact design
- Ergonomic, adjustable head suspension

Welding Filters

3M™ Speedglas™ Curved Welding Filters G5 Series

Replacement Welding filter for the 3M™ Speedglas™ Welding Helmet G5-02 with curved glass auto-darkening filter (ADF), variable dark shades 8-12.

- Our largest ADF field of view ever (150×76 mm), utilizing the 3M™ Speedglas™ Curved Glass Technology
- Great clarity before, during and after welding, with our 3M™ Speedglas™ Natural Colour Technology
- By selecting just the right settings for each task, you help reduce eye strain and can improve the quality of every weld

Product ID	Part Number	Product	MOQ	OU
7100204034	620020	3M™ Speedglas™ Curved Welding Filter G5-02, 620020	1	Each

3M™ Speedglas™ G5 Series Auto Darkening Welding Filters

G5 welding filters for both G5-01 and G5-03 welding helmets.

- Robust, reliable fuction
- Compatible with both G5-01 and G5-03 helmets
- Bluetooth enabled. Utilizing the 3M Connected Equipment app, users get access to additional functionalities, statistics and documentation

Welding Safety

3M™ Speedglas™ Auto-Darkening Welding Filters 9100 Series

3M™ Speedglas™ 9100 Series Auto-Darkening Welding Filters are designed for the professional welder using 3M™ Speedglas™ Welding Helmet 9100 Series. Incorporating dark shade ranges 5, 8-13, grinding, and cutting modes, these filters are ideal for use with most arc welding processes.

- Auto-darkening welding filter designed for use with 3M™ Speedglas™ Welding Helmet 9100 Series, suitable for most types of arc welding
- Delivers minimal distortion across the entire filter viewing area
- The sensitivity of arc detection can be adjusted for unsurpassed switching reliability. Switching time (light-dark) of 0.1ms.

Product ID	Part Number	Product	MOQ	OU

Fall Protection

At 3M Fall Protection our mission is to bring every worker at height home safely.

Every day on your job, you climb to new heights with two things in mind: getting your work done well and returning home safely to those you love. Our job? Helping you get there. With our two brands, DBI-SALA® and Protecta®, we offer solutions for all your work at height needs.

ABCs of Fall Protection.
A typical Personal Fall Protection System (PFPS) incorporates key components often described as the ABCs of Fall Protection.

The (A) anchorage/anchorage connector, (B) body support and (C) connecting device - when used together – form a complete system for maximum worker protection. But don't forget the other important components of a comprehensive fall protection programme: (D) descent and rescue, (E) education and (F) fall protection for tools.

A — Anchorages

Anchorages are a secure point of attachment. Anchorage connectors vary by industry, job, type of installation and structure. They must be able to hold fast under the load of a fall, working in suspension or a rescue.

B — Body support

Harnesses distribute fall forces over the upper thighs, pelvis, chest and shoulders. They provide a connection point on the worker for the personal fall protection system.
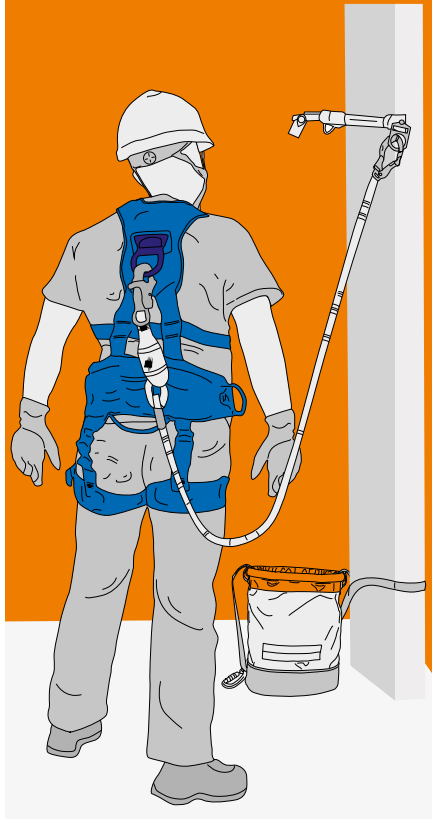

C — Connecting devices

Products such as shock absorbing lanyards or self-retracting lifelines connect a worker's harness to the anchorage.
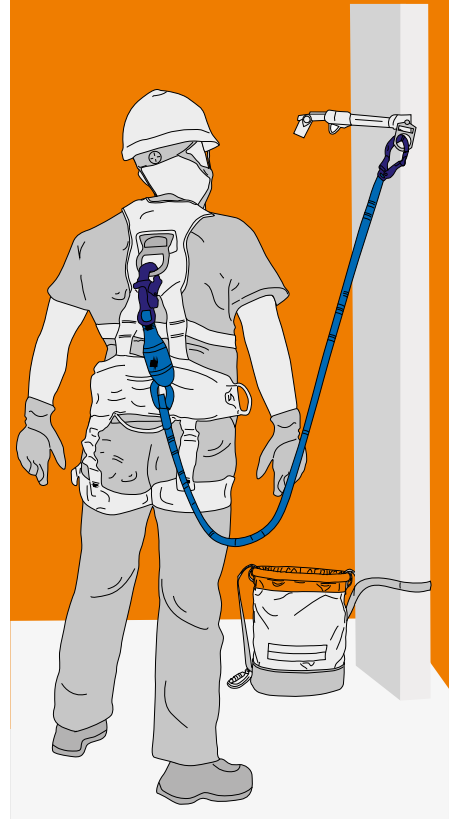

Learn more about 3M Fall Protection

Download the Core Product Range catalogue

Watch webinar: How to build an effective Fall Protection Plan

D Descent and rescue

Descent and rescue devices are used to raise or lower a fallen or injured worker to safety or retrieve him from a confined space.
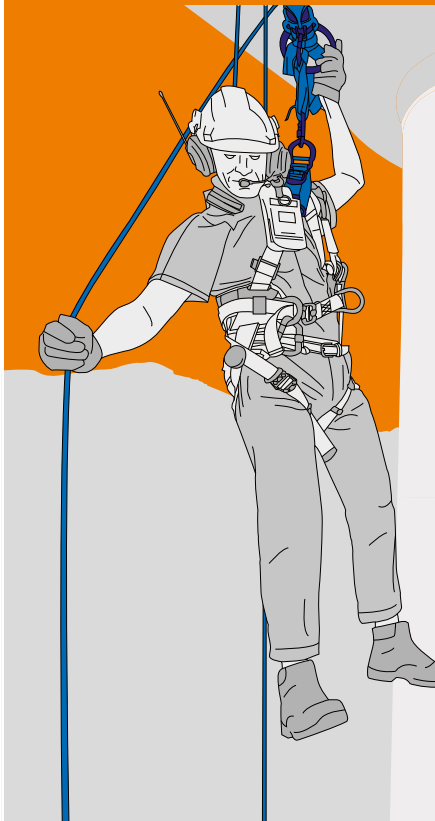

E Education

We offer a variety of best-in-class certified training courses for work at height and confined spaces at our state-of-the-art training centres located around the world.

F Fall protection for tools

Fall protection for tools helps make work environments safer and more productive by reducing dropped object incidents.

Fall Protection

Anchorage

3M™ DBI-SALA® Fixed Beam Anchors

3M™ DBI-SALA® Fixed Beam Anchor fits variable width I-beams. It is built to allow most of connection types for anchoring self-retracting lifelines on horizontal or terticals I-beams. It's engineered to glide easily, provide ease of use, and deliver exceptional safety and performance for your fall protection system.

- Compatible with various fall protection systems
- Compact, lightweight design
- Ideal for use with personal fall arrest systems with self-retracting lifelines

Product ID	Part Number	Product	MOQ	OU
7100230828	2108412	3M™ DBI-SALA® Fixed Beam Anchor, Fits 6.3 - 30.48 cm Wide, 3.81 cm Thick, 2108412	1	Each

3M™ DBI-SALA® Sliding Beam Anchors

The 3M™ DBI-SALA® Sliding Beam Anchor. This system provides a high-strength anchorage point that follows you while you work. Once you secure it to the beam using the integrated adjustment buttons, simply connect your Self-Retracting Lifeline (SRL) or lanyard to the rotating D-ring and you're ready to work.

- Compatible with various fall protection systems
- Compact, lightweight design
- Ideal for use with personal fall arrest systems with self-retracting lifelines

Product ID	Part Number	Product	MOQ	OU
7100243117	2104710	3M™ DBI-SALA® Sliding Beam Anchor, Fits 3.5 - 14 in Wide, 1.25 in Thick, 2104710	1	Each

3M™ Protecta® Sling Anchors

3M™ Protecta® Nylon Webbing and Galvanized Steel Sling Anchors.

- Portable and reusable
- Compact and lightweight design
- Recommended for use in the construction, general industrial, mining, oil and gas, transportation, utilities, and wind energy industries

Product ID	Part Number	Product	MOQ	OU
7100231205	AM450/60	3M™ Protecta® Nylon Webbing Sling, Blue, 0.6 m, AM450/60	1	Each

Carabiners

3M™ Protecta® Screw Gate Carabiners

The screw gate is ideal in working situations where opening is occasional during the working day, as the gate can be opened by the action of pushing it onto the anchorage point, the gate can then be manually locked once the carabiner holds the weight of the device.

- ● User friendly compact design
- ● Variable width gate opening steel or aluminum carabiner
- ● Versatility of attachment to fall protection systems

Full Body Harnesses

3M™ DBI-SALA® ExoFit™ XE200 Comfort Safety Harnesses

Designed for those who refuse to compromise, the 3M™ DBI-SALA® ExoFit™ XE200 is made with high-quality components specially developed to enhance the safety, convenience, and performance of your team during work at heights. The XE200 comfort harness is built with durable 26kN polyester webbing, lightweight aluminium hardware, hybrid comfort padding with breathable mesh under-side with added air channels, and reflective 3M Scotchlite™ panels. Equipped with new technology in the dorsal D-ring area for efficient connections and a secure harness fit for your workers, the XE200 also features revolving torso adjustment alongside auto-locking quick-connect buckles to optimize the fit. The 3M™ DBI-SALA® ExoFit™ XE200 is compatible with a range of 3M™ fall protection accessories for tools. All models are equipped with low-profile suspension trauma relief straps.

- Cross Chest Buckle assembly for central front fall arrest attachment point - optimised position on body
- Revolving torso adjusters (patented) for quick and easy harness fit and adjustment
- Auto-locking quick connect buckles secure contact with webbing, reducing the need to readjust

Workers' lives are on the line every day, but ensuring their safety starts long before the job begins. No one understands this better than 3M™ Fall Protection. Our training is based on more than 70 years of expertise and jobsite implementation around the globe.

When it comes to protecting your work site, we deliver. We offer superior courses in world-class training facilities, based on standard curriculum's or custom programs specific to your jobsite.

Our training services include:

- Regional facilities to avoid extensive delegate travel or ability to facilitate courses at your own sites

- Ability to build bespoke course programme's to ensure that training meets your specific company requirements

- Access to and use of the widest range of fall protection equipment to ensure delegates receive a broad training experience

Our comprehensive training provides practical, hands-on experience across a full range of fall protection training, fall arrest training and industrial rescue courses at our state-of-the-art training centres located across Europe, as well as on-site training customised to your needs.
