

for safe storage

Sustainable containment solutions from CEMO.

Spill containment for industry and commerce

Unbeatable ...

... Sustainability!

Over 60 years of experience

... Selection!

Large range of components

... Flexibility!

Modular components

... Price-performance!

Great value for money

Unbeatable Price-performance

✓ **Modular system components minimize your transport and storage costs.**
Our systems were developed to use standardised components e.g. gratings. These can be used for different sizes of sumps/bunds. This saves on transport and storage costs due to uniformity and stackability.

✓ **We consistently develop successful top-selling products.**
With the new drum bunds, the pallets full of drums can be placed directly on the edge of the bunds. A grating is not required and the price is consequently reduced without affecting the function. Less is more.

✓ **As a system supplier, we make purchasing easier.**
Purchase your complete containment range from just one manufacturer. Your administrative effort and the associated costs are reduced to a minimum. Our system pays off.

✓ **Our products are available quickly due to our large warehouse capacity.**
High production capacities enable us to provide you with a large range of bunds with short lead times, which reduces your storage costs. Safe storage is our philosophy.

Unbeatable Flexibility

✓ **Modular system components can be used with each other.**
The use of standard components enables you to offer alternative modules in the event of bottlenecks.

✓ **We offer an enormous variety of models and materials.**
A range of bund sizes with different grating types and materials enable you to offer the right bund for every requirement.

✓ **Expandable and extendable (workfloor protection).**
Many of the bund types can be expanded to create workfloor protection systems for complete rooms. We grow to meet your requirements.

Unbeatable Sustainability

✓ **Made in Germany – we manufacture in Germany to the highest quality.**
All sumps and system components are manufactured so that they exceed the required safety standards over the entire service life by far.

✓ **You use our expertise as developers and manufacturers.**
In order to bring practical products to market, development and production need to be close together. During the planning phase, the course is set for manufacturing success.

✓ **We have 60 years of experience in the market.**
Since 1960 we have been involved in the development and manufacture of products for the safe storage of hazardous substances to protect people and the environment.

✓ **All products are tested and approved.**
All products offer you and your customers the expected reliability, as we design and manufacture them in accordance with the relevant regulations and approvals. The approvals are carried out by independent institutions.

Unbeatable Selection

✓ **Small containers:**
Sizes specially designed for smaller volumes with matching, modular PE gratings.

✓ **Laboratory trays:**
Safe solution in laboratories for storage of chemicals in small containers on work surfaces.

✓ **Racking sumps:**
For the safe storage of small containers in existing racking systems.

✓ **Drum bunds:**
Optimised with special gratings for minimal space demand for 200L drums.

✓ **Pallet sumps:**
For loaded Euro pallets, which can be placed directly on the sump, without the use of a grating.

✓ **IBC bunds:**
For safe storage of 1 or 2 IBCs with a collection volume of 1100 litres, with or without dispensing area.

✓ **Workfloor protection systems:**
By connecting individual trays, workfloor protection systems for complete rooms can be created.

Your customers store:

Every litre counts when storing hazardous substances.
That's why we develop products for every requirement.
Whatever your customers need to store, we ensure safety.

We would be pleased to advise you!

Additional products in development

PE Hazardous Material Depot:

- For outdoor use
- Small unit 220 L volume for Euro pallet with 2×220 L drums
- Large unit 1100 L for IBCs and pallets with 4×200 L drums
- Doors open to 270°
- Robust domed roof

PE Racking bunds:

- Suitable for the most common warehouse racking systems
- Containment volumes of 230 L, 405 L and 1100 L
- Suitable for racking widths of 180 cm, 220 cm and 270 cm
- Suspended racking bunds suitable for Euro pallets PE or galvanised steel grating (optional)
